# NPDC's Draft 10 Year Plan

Office Use Only: 2251

**Submission No: 1001**

**Zane**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

This will bring a lot more sport and activities to the region- which will help with cost recovery

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2254

**Submission No: 1002**

**Steph Downs**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Alot of people are struggling already to pay rates ,mortgages and bills this will be the last straw taking away the right to clean and water vegies etc.How about NPDC not spend on art , walkways etc and fix the basic"s with the money for all the people.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

I would like the council to fix the basic "s and leave the art walkways etc until all the basic living fixtures are fixed up and running as they should be.I think every rate payer would rather have that done than poor basic inferstructure but great walkways and art projects.

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

### Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2264

**Submission No: 1006**

**Coral Tamblin**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### ***Comments***

It is vital to protect the health of residents through clean water rather than enhancing tourist sites. Clean Water should be the priority.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### ***Comments***

Public education should be first priority. Water should be free.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### ***Comments***

Public health needs to be prioritised over tourist improvements.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### ***Comments***

You can do more options than this ... invest in maintenance only OR do either walkway or mountain to sea. Money saved can be invested in clean water or other infrastructure necessities

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### *Comments*

I would prefer less vehicles in the fleet and more judicious use of them. Focus should be on public transport and the NPDC staff should be seen to utilise that also rather than running separate vehicles that for convenience fir appointments within NP.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

As rate payers, no matter where they live, pay rates that in turn needs to be FAIRLY distributed back to them - no matter where they live. The current plan unfairly discriminates against certain 'less popular' townships despite similar population size and hence similar population requirements. Every rate payer deserves to feel value for money and see some improvements within the first 3 years within their own community which benefits THEM rather than tourists currently. This should not include water or plumbing as these are basic requirements for public health and hence a Human Right.

# NPDC's Draft 10 Year Plan

# NPDC's Draft 10 Year Plan

Office Use Only: 2270

**Submission No: 1008**

**Erin Nicholson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### **Comments**

I feel like there are other initiatives that would be a better investment for climate action... what about encouraging others to have electric cars (not just NPDC) and just get electric cars for council when the old ones need to be upgraded. Better yet, put proper intersections, roundabouts and crossings into our roads so it is easier and safer to bike and walk?

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

Get this going asap please!

---

## What else?

Please consider the second Waiwhakaiho crossing sooner, traffic is already bad and is only getting worse as growth continues to the North. Please consider putting in proper intersections around town - no other town that I've been to has so many uncontrolled and dangerous intersections.

# NPDC's Draft 10 Year Plan

Office Use Only: 2273

**Submission No: 1009**

**Natasha Good**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

#### ***Comments***

Don't penalise the people, this will add to the high poverty we already have. How about having new builds adding a water tank to ease the usage and to utilise the rain nature provides us.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### ***Comments***

Saving water comes to education and life style changes. Why not use the odd and even system all year round for outdoor water use.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### ***Comments***

Just ensure they are wide enough enough to provide for our ever growing population.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

#### ***Comments***

Cut down on the amount of vehicles purchased, can some vehicles be shared?

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Sooner the better, this would be elevate so much traffic around schools and sporting grounds. Plus for families with multiple sports at similar times or over lapping times would make it more manageable with less driving

---

### **What else?**

Rather than always putting the costs back on home owners and renters, make some cutbacks at the higher end within the council. Keep it real and be mindful of what the population of new plymouth already do and pay for to help support our community. Council could show their appreciation by not putting the cost back on us all the time. Be more proactive at your end and also educate people rather than punish.

# NPDC's Draft 10 Year Plan

**Submission No: 1010**

**Jocelyn Parker**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Water meters may be a good idea for large cities but not here in New Plymouth. We will see more people getting into debt because of having to pay higher rents so that the owners of the house don't have to pay the new rates themselves, which could make those in lower income end up living on the streets more due to be unable to pay the new rents.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Water meters not required. Spend the cost of water meters towards infrastructure upgrades. Water meters will only serve to mask the underlying problems. NP has a plentiful supply of water, primary storage (lake) required. Lets celebrate the point of difference with the likes of Auckland who have a real water problem. This is one of the beauties of living in NP! Embrace it, enhance it, not follow our poor cousins in Auckland!

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Your numbers look rounded, needs more accurate analysis.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

### *Comments*

Not enough information provided

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

Work on the trees. Research more into electric cars and the impact the materials required needed to make batteries have on environment and people mining rare elements

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Focus on optimisation of the sports hub's existing and how better to utilise them during the week

---

### **What else?**

All the options are biased. Bad questions with false assumptions. Not scientific. Leading people on.

# NPDC's Draft 10 Year Plan

**Shane Dunlop**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

How was it overlooked when funding venture taranaki, len iye, walkways, sports stadiums should have gone back in queue.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

We are already being charged for water if meters go ahead can you prove we get a rebate back on what you are already charging?

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

These tracks are not intensively used now and extended the walkway is ridiculous as all these things have to be maintained which pushes rates unsustainable as well the coast should be left natural so penguins and seals can rest and breed without dogs and people everywhere ecological disaster.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

If you didnt have so many non essential jobs at npdc you wouldnt need so many cars

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

This is a want not a need another thing to have to maintain and neverending rate increases which people are struggling out there.

---

### **What else?**

We were promised we would have zero rates bill when you sold powerco and now rates are huge you cant blame people for not trusting you

# NPDC's Draft 10 Year Plan

**Submission No: 1014**

**Sarah Ashworth**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2287

**Submission No: 1015**

**Julie Trigger**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2293

**Submission No: 1016**

**Mark Wilson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

There is an allocation in the rates for funding. If this has not been managed according then people should be held accountable.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Water is not in short supply in Taranaki. Water supply is already a rateable item. This is purely a revenue gathering exercise.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Investment in tourism is senseless at this time with the current global situation. There would be very little return on investment.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

It's a myth. There is no significant evidence that any funds invested will make any change what so ever.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Should provide economic growth for the region

---

### **What else?**

Please do not waste rate payers money on climate change nonsense. Otherwise make a section in my rates optional.

# NPDC's Draft 10 Year Plan

Office Use Only: 2296

**Submission No: 1017**

**Rocel Dollesin**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

All aspects should be taken in consideration

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Allocating a certain cubic meter of h2O to each household and pay if they exceed that allocation. That way they would still control their usage. It's not good to charge the public with all their water consumption. It's hard esp to the low earners

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Put the funding into more important matters that need instant attention

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

#### **Comments**

I agree to the proposed framework of NPDC

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.  
NPDC's preferred option.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2299

**Submission No: 1018**

**Wayne Thompson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

No water meters

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

These are called wants, money needs to be spent on infrastructure first

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

Wants and needs again. Spend money on infrastructure only.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

# NPDC's Draft 10 Year Plan

**Submission No: 1019**

**Jason Elder**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

This is a priority for the community. We need more people in sport to reduce crime, health issues etc. We have poor facilities as it is.

---

## **What else?**

What is happening to Pukekura Park for cricket. The NPDC needs to make better use of this park for cricket. It is the most favoured cricket ground in NZ. In addition, the council should be supporting the development of grounds with grass wickets. This will increase participation and the quality of the sport to a level matching Napier etc

# NPDC's Draft 10 Year Plan

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

Overhaul the drainage team that aren't performing and fix the pipes that have failed.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Option 1 was the only option without water meters. There should be an option for improving water collection and saving without water meters. It should be compulsory for new builds to have water storage tanks and there should be incentives for existing home owners to add tanks. Incentives not low interest debt.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Do nothing until you have fixed the infrastructure that is failing.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Fix the infrastructure first

---

# NPDC's Draft 10 Year Plan

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### **Comments**

Better to redevelop yarrow stadium as a multi sport venue than have another location in New Plymouth with heavy investment..

## What else?

The plan does not fairly reflect the needs of communities outside of New Plymouth, and those initiatives that do address non NP areas do not fairly allocate money across all spaces. You are effectively slowly but surely running down the regions outside of New Plymouth town to fund the initiatives there. More funding for libraries and pools, better regional parks and recreation areas for kids in the small places where there is not a great deal of choice, and a clear road map for when assets which depreciate over time will be replaced, ideally before they fail.. oh, and work with NZTA to provide a safe crossing across SH3 so we don't have another child killed on the roads in Inglewood.. its only a matter of time :( we are here you know please don't forget about us

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

### *Comments*

Yes saving water is a must. But we don't need water meters here. Just don't need them.

---

## Improving stormwater management in Waitara

### *Comments*

Have all costs been work through on this stormwater management for Waitara. Not just some one saying it need to be done. Don't use out sider. Get local guys to check this out.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

again here. One need to keep a check on costs. It nice to have these walkways and trails for us all to use. But it the cost that comes with it all that needs to be checked .

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

The greens want us all to run around and get electrified cars at a very high cost. I say wait for a time. Remember you are using rate payers money . not your money . I which i could go out a buy a car and charge it to some company as long as it not my money. Would that feel so good. So don't just go out there and jump into things. Think of were that money has to come from. The tree planting sounds good and what trees would you be planting. Is it Pine trees or native trees ??.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

a good idea and help kids get into sport and of the street were they cause trouble. We need a good multi sport hub. But it has to be for all and not for just a few.

---

### **What else?**

I think i have said what i want to say. But just don't waste the money. The cost of living is getting higher for people . We don't need a lot of extra costs.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

Use locals contractors, use local consultants. Keep it in house

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

We already pay rates on our water, why tax us more. I really struggle with the idea that we use more water than everywhere else. Maybe we have lots of leaky old pipes instead, that no one knows about.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

### *Comments*

This should be funded out of rates in waitara. User pays

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### *Comments*

Fit and active lifestyles leads heathy people and communities.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

This is a necessary, there are more sports than just rugby. Think of the whole community. Every other region has one. We are in catch up mode.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

I don't support water meters, Taranaki has significant rainfall, it's the lack of resource to adequately capture and store the rain water that is the issue. Water meters will only serve to punish vulnerable and low income households with an additional cost, which if combined with a rates increase will see the quality of life for many in the region suffer.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

Why has NPDC ignored Inglewood in the Greening our Place plans? Why is Inglewood not in any proposed connection to other parts of the district? Why are our walking trails so under developed? The Windsor walkway is a joke, Trimble Hill unfinished, the connecting trail to Joe Gibbs, a gift from a resident in good faith, painfully slow in development.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### *Comments*

What percentage of the 17 hectares and where will trees be planted in the Inglewood area? Why have so many community gardens been established across the district but not in Inglewood?

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### **Comments**

I 100% oppose any such development on the basis that NPDC consistently and deliberately chooses to ignore the basic needs and requests of residents in areas that aren't seemingly desirable to the council. Until basic amenities are provided for all across the district and residents are equally catered to and safe in their daily lives. 40 million for a sports hub is not equitable.

---

### **What else?**

Since moving to Inglewood 6 years ago, I have heard and joined residents pleading for a crossing on Rata Street. We have attended every feedback session, completed every survey over and over, to no avail. Claims that Rata streets status as a state highway ring hollow when the latest set of TRC planning has shown NPDC not only supporting projects on state highways in other areas, but part funding them too. Does NPDC consider it ok for parents and children in Inglewood to have to play chicken with logging trucks to get to school? To have to cross a state highway with no crossing? A simple set of painted lines across a road to ensure the safety of our children is all we ask for. It's hard to read NPDC's own strategies state the desire to make roads safer for our most vulnerable road users and encourage greener modes of transport while looking at Inglewood. What has NPDC done or planned for Inglewood to make our roads safer in these plans? What has NPDC done to encourage greener commuting in Inglewood? In fact the only opportunity we recently had for investment on Kelly St was shut down before it even got off the ground. What has NPDC done to push forward the purchase of the railway land? It is not ok to consider raising prices of amenities like public pools or cut funding to libraries, facilities that add so much to our communities for all levels and demographics, in the same plans that propose 40 million dollar sports hubs. It isn't ok to raise rates for projects like that when many families struggle as it is. I'm not opposed to big projects and admire the vision this council has for New Plymouth. Taranaki can well and truly be the lifestyle capital, and in many ways it already is. I love this place as much as the Mayor, but the council needs to make its vision equitable, for all its residents and families, to improve all our lives for the better. All we are asking for, is to have our concerns heard and acted upon in the same good faith that we acted in when electing each councillor to NPDC. We ask that our community is not ignored and fairly included in NPDC's future plans.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Water meters are a false savings. In my opinion, the amount of water saved will not offset the potential costs, including probable over runs, of sub contractors installation of meters. Water meters also increase potential for privatisation of the water supply, thus in the end costing everyone more in a profit driven environment. Taranaki people need to be educated and incentivised by local and national governments to catch rainwater and reduce, reuse, recycle their city supplied water.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

NPDC should wait to ensure electric vehicles are not greenwashing and in fact environmentally damaging from, for some examples, increased use of imported coal in NZ, unsustainable mining in source countries, etc. etc.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

NZ probably heading into recession. This is not affordable in an uncertain covid world.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

I think the council need to look at rain water storage options rather than water meters which just raises the cost of living even further (on top of huge rates hikes) for the average kiwi

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### *Comments*

You need to make sure the 17 hectare which gets planted needs to be land that isn't suitable for food production or for housing. There is plenty of land that can't be used for anything else so you need to make sure it's that land that you are planting on

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

This will be great for New Plymouth but suitable allowances need to be made for New Plymouth equestrian sports including the New Plymouth pony club. Asking these kids to travel to another pony club (Waitara, oakura, okato or Inglewood) means that they can't afford to go to pony club as there parents will need to buy suitable horse transportation. This would be a great loss for urban kids wanting to enter the sport.

---

### **What else?**

Keep in mind the price of housing and living is sky rocketing. increasing rates is the last thing anybody needs at the moment and will not help the huge issues people face trying to purchase there own home.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### Comments

Meters in New build. Retrofit expensive cf savings. Encourage rainwater/ greywater collection and use. Monitor flow (occasionally) for leak detection.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### Comments

Some tracks are not safe or suitable for cycles, mobility scooters or less able pedestrians. Tight turns and bollards exclude those that need access most and discourage commuters. Rough surfaces are dangerous and again exclude many users. Roads are perceived as unsafe. To encourage people out of cars alternative paths needed.

---

### Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### Comments

Currently small efficient petrol cars used sparingly / driven wisely are just as green. As they need replacing by all means go electric (not hybrid) extra cost should be saved on fuel. Almost. And batteries are improving. Try using electric bikes? Greater gains can be made elsewhere.

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Should this be a loan? Balance date against sector activity. If overheated no workers available, higher cost, at slack time supports local employment.

---

### **What else?**

Please consider broader options to achieve goals and look at holistic planning and the impact of developments ahead of the changes. A statement or study by the developers is insufficient. With an aging population and climate change why are newly developed areas still designed around cars? What about safe accessible pathways? Public transport? Perhaps water saving technologies as many other cities have adopted. Our development is based on cars but without required changes to the road network to accommodate extra traffic. Or safe crossing for pedestrians.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

The proposals I have seen for the multisport hub look sound. I would like to offer a word of warning as far as the overall tendency to amalgamate clubs and codes in terms of venues. Playing home and away at a diverse range of venues is part of the beauty of club sport. The community values of friendship and inclusiveness are exemplified by means of hosting teams and being hosted at clubs home grounds. Some sports lend themselves to multisport facilities, ie hockey netball and basketball, as per the proposal, but it is important to understand the distinction between those sports and say cricket, football and rugby where continued investment must be sustained for the upkeep of those grounds for the sake of sports participation and community engagement. Please do not use the likely success of the multisports hub to tempt you into joining existing sports clubs through facilities in the ways that other parts of the country have at the expense of the beauty of club sport: a range of clubs and grounds with identities.

## What else?

Fund the arts! We proudly advertise ourselves as a province of natural beauty, our sporting engagement and success, and a place of thriving creative exploits. In this submission outline their is options to submit on accounts of both funding for the natural environment and on our sporting future, both worthwhile causes, but less focus in this plan on sustaining and growing engagement in the arts. Organizations such as Creative Taranaki are developing the means to connect our grass roots organizations into an enlivened community. The people to do the work are there, the plans are there, supply the funding and the results will yield.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

100% against electric cars as the batteries used to fuel them are made from an irreplaceable source called lithium. The process of getting lithium is way more destructive and uses way more resources than extracting oil ( not to mention oil will naturally replace it's self). Also there is no known way to get rid of lithium batteries as they are incredibly toxic and bad for our environment. My suggestion would be invest in better more regular public transport. Offer cheaper bus fairs. By doing this your are getting more cars off the road. Which means less pollution, you are also making it safer for children walking to school and cyclists and making it easier for people with low incomes to make it to work, get groceries etc

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Make sure it's somewhere out of town so there's less congestion and more parks

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

Why did it come to this ,it should have been maintained previously from rates and taxes

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Water should be a basic human right and you shouldn't have to pay for it.I am not against water meters but I am against charging for water.If water meters were introduced then a basic family should only be charged if you use more than average usage.It's the big companies that use lots of water that should be charged

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Seems like councils never plan for the future

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Water is more important than trails or tracks use this money for the water.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

These goals will change when a new government comes to power

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

### **What else?**

Water should only be charged if you are using more than average if you use under the average then you don't get charged. I am worried when meters go in water will become privatised and we will be pay to much.

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Well overdue it's beyond a joke.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Agree that it needs to be done and I believe option 3 to be the best.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Love this idea!

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Yarrow Stadium is being repaired but I would have preferred the multi-sport hub to include rugby i.e no more Yarrow Stadium

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2469

**Submission No: 1070**

**Rebecca Walton**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

It is still working there are bigger issues. Leave this til next time

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### *Comments*

We are a rural community, water meters are definitely the option for the suburbs I do not think they realise how much they use. Set a date and all switch at that time. Eg. 3 years time. Market projects around the different costs so people see they are not being picked on. Eg show difference from residential to rural how it is charged with examples, cost break down per quarter

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

### *Comments*

Approach the Maoris get some money off them to support their local infrastructure to benefit both pakeha and Maori.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

It is perfect as it is currently, wait a few years Look at light rail tracks for commuters.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

It is rude these two things have been bundled together. Almost sneaky I say. I am pro the trees but not the cars, as a coordinator I have seen many times where staff can share or be more organised in car pooling. MASSIVE price difference between the two projects, support ya trees all the way, total no to the cars, get some e-cycles for councillors and staff, a fraction of the cost and set the example.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Push this back further. Do we have something that functions, yes.. Focus on getting few things correct, not messing all up.

---

## What else?

Look after your long term staff they have the knowledge.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

#### **Comments**

Plumbing is high on the necessity list! I believe needs should be addressed before wants

---

## Saving water and water meters

#### **Comments**

Unsure but agree something needs to start happening. Could Council introduce water tanks to homes with an interest free payment plan included in rates? It doesn't feel right that we should pay for water.

---

## Improving stormwater management in Waitara

#### **Comments**

Again unsure

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Re the Walkway, yes it would be nice to have it extended but going back to the plumbing issue, I believe this should be dealt with first. Re the Mountain to Sea, let nature take it's course. If people want to visit nature they will regardless of a nice track.

---

## Boosting our Climate Action Framework

#### **Comments**

Yes I believe Climate Action should be addressed asap. Perhaps finding sponsors for Planting our Place could lessen the cost?

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

This survey fails to include an option whereby a multi sport hub is built in another location. That is my preference. We do not want to lose this iconic, green, open 'lifestyle' space in the middle of NP city. Sports hubs can be built anywhere. Once green space in a city is gone, it is gone forever. The current site has a myriad of problems. 1. The racecourse allows no expansion for sports in the future. 2. It likely ends racehorse sport at NP. Racing contributes \$25million annually into the local economy. Taranaki racehorses, sports horses, and their riders are winners throughout New Zealand. 3. The impact of additional traffic onto Coronation Avenue and down across the one-way systems will be significant and therefore dangerous. With the huge number of logging trucks and other commercial vehicles using Coronation Avenue already, exiting right-turning 'hub' visitors from either Saddle Row or Rogan Street will take chances and road accidents are likely. 4. Lighting towers at the hub to enable winter evening sports will bathe the local area in daylight until 9.30pm weekdays. Local residents will suffer and it is unsightly. Has the effect on Pukekura Park's birdlife been considered? 5. Covering 2/3rds of the racecourse in artificial turf will create a water dam. In 1993, a rainstorm caused the racecourse to overflow and landslides followed. Drainage infrastructure improvements were made but sealing the racecourse surface was not anticipated then. It is most unlikely the 1993 improvements will be sufficient to handle the vast increase in water catchment that will result from the hub. 5. The current cost is estimated to be \$91 million. No detailed plans have yet been made for roading alterations or significant drainage improvements. Once known, the cost will then be added to the existing \$91m. 6. The Long Term Plan proposal doesn't say where the additional \$50m is coming from. Is a multisport hub at the racecourse, with its additional traffic and drainage costs, the best use of \$40m plus of ratepayer funds? Do what is done in every other North Island city - build the hub between 4.5kms and 10kms from the CBD. A sensible 'greenfields' plan.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

#### **Comments**

This is not essential at this time. More thought should be given to a suitable site that is easily accessible and are not in a built up area on a main thoroughfare. Investigate a long term plan for a sports hub in a currently undeveloped area (e.g. outskirts of Waitara) and ask your planners to work to draft a USER FRIENDLY venue, that satisfies the needs of all sports and users.

---

## What else?

PRIORITY 1: Deal with the critical issues first - Plumbing, PRIORITY 2: water, climate change and protection of Waitara. PRIORITY 3: Extending and developing walkways and cycle ways will bring more people to Taranaki, and enhance the well being of a percentage of our community. The sports hub is not a priority at this time. All sports have adequate facilities and no doubt would like them to be improved at some time. Please commit to spending the next 10 years in providing adequate services for our community. Continue to investigate a best for all venue for a Sports Hub. If necessary purchase land in readiness.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Ensure that as much work as possible is done by local Taranaki contractors

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

I would say that water meters would be a good idea, only if there was a certain limit before charging for the water occurred. Being charged for basic drinking water doesn't seem fair. Maybe new homes should be specified with water tanks from here on out as part of consents. Slim line ones up against a wall maybe rather than huge round ones?

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

With a big plumbing/3 waters bill looming, this item should be less of a priority

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.  
NPDC's preferred option.
