Submission No: 4019

Jaimee Clifton

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

RE: Submission on Long Term Plan 2021 – 2031 Consultation Document

The Three Waters are fundamental to community wellbeing and are basic services that must be at the forefront of our spending. The Three Waters are non-negotiable must haves, not optional commodities and services. Council must ensure there is a clean, tested, consistent supply of drinking water, and there is no leaking sewerage before they consider any other spending.

Big Call 1: Fixing our Plumbing:

Drinking water:

I support spending as much as required to ensure that every home within the District has a safe, consistent supply of drinking water. In Urenui, we currently do not have a safe constant supply of drinking water. We are continually left without water for long periods of time, as the pipes, especially along Whakapaki Street blowout and stop the supply of water to the whole town. This accumulates over time, and has a significant impact on health and wellbeing. This leaves people with babies, and small children under pressure, it leaves people living alone, and those already vulnerable in an unsafe environment. The impact on hygiene, such as toileting, nappy changing, and feminine hygiene is also extremely unsafe. This is not an acceptable level of service.

I also have serious concerns about the cross contamination of waste water with our drinking water. The number of burst pipes and the close proximity of these to resident's effluent beds, and seepage that could be occurring. We have no indication of the extent of this, as the water is not tested outside of New Plymouth.

Fixing our supply of water must be at the top of the priority list. It cannot be an option.

I support installing water meters, to build awareness around household usage of water, and create a conservation mindset. This will help with identifying leaks, and high water users, who should be charged comparative to their usage. I also support identifying leaks on Council water main's, and a form of penalty imposed on Council for leaks, this may also help with preventing reoccurring leaks. Council needs to lead from the front and set the example.

Urenui Waste Water:

Urenui has a severe problem with their waste water leaching and leaking into the waterways. This should have been listed in the consultation document, to ensure the whole District is aware of the issue and can support spending money in providing a solution to this problem. It is my understanding from the community meeting in Urenui on Wednesday 31 March 2021 that a reticulation system is to be operational in Urenui within 5 years. This is a

fantastic achievement and I hope that it can be realised. However, we need to ensure that enough spending is allocated to this, so a sustainable fault free system can be installed. I have concerns about pumps failing, and raw sewerage then going straight out to the river, which would possibly be a worse situation than the current one. We need to consult and engage the appropriate people to ensure the system/s that is installed would be the best system for Urenui and its unique environment.

Our family have been residing in Urenui for 9 years. We moved here as it is my husband's tūrangawaewae. We purchased a home over looking the Urenui awa, and were thrilled at the prospect of our children growing up on the awa, and being proud of their environment. Unfortunately, the reality is a stark contrast to this, as we cannot swim or eat from the awa.

Waitara Storm Water:

I support spending to ensure that storm water in every part of Waitara meets the requirements, and there is a standard level of protection for all households.

Big Call 2: Greening our Place

Rolling out a Climate Action Plan is the only area I believe we can responsibly spend on, given the issues and the expenditure that is required for our Three Waters.

I believe that until we have fixed and invested in our must have's (Three Waters), trails and walkways must remain status quo.

Big Call 3: Paying it forward:

I believe further enquiries need to be made around potential external funding for a multi-sport hub, before we can responsibly spend on this. I believe there is a need for this hub, and as it is for the benefit of the community and particularly our rangatahi, this should be considered before trails and walkways.

Other Matters of Interest:

Brooklands Zoo – I support ensuring that the Zoo is up to the required animal welfare standard.

Zero waste projects – I support this initiative in conjunction with localised community groups. Finding out what works best for people in smaller communities that do not receive curb side rubbish collection.

Thank you for taking the time to read my submission.

Yours sincerely,

Jaimee Clifton

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Funds recovered by water savings providing additional funding.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Offer rain water tanks as an option to meters at least for one person dwellings as a more cost effective and water saving option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Stop removing and increase riparian planting and wet lands.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The existing coastal walkway has not contributed to greening our place with token planting at Rewa Rewa Bridge partially replacing destroyed fauna, grow some shade and don't use concrete for track surfaces.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Develop community by using local school facilities and avoid further traffic congestion of NP's southern entrance. Options do not include a pool that the population of NP could easily accommodate two of now.

What else?

Encourage and educate residents to use water storage tanks, composting toilets, green space for water uptake. Stop removing existing green space. There used to be a restriction on removal of any trees of a certain height. This restriction seems to have been removed.
