## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Patching things up only costs more and more (do it once and do it right) each year as costs risen. Do the lot properly, the whole lot then it won't cost every year. Money well spent. Instead of like slapping a coat of paint on a house to make it look pretty, while everything out of sight is falling apart - total waste of money.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

All other options to me seems like we pay our existing rates plus a new water rate. Looks like just a way to get more money.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Maintain what we have and spend the money on getting the basics sorted. Add the 'window dressing' at a later date.

---

### Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

Keep chipping away at things, but if one checks back in history over 1,000s of years the climate seems to go in cycles regardless. Electric cars - great but a new battery costs more than the car !!! hardly a saving.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Just trust that when you do it's done properly and not just 'something that will do for now'.

---

### **What else?**

Seems too much money is spent on the likes of doing away with parking spaces and putting a seating/eating area instead. These types of businesses supply their own areas. At Christmas all the small towns have lovely lighting. New Plymouth? Not a thing. Sure saving money there. So what's that spent on? also lighting for Festival of Lights is pretty feeble after what is used to be like with a spectacular show. Oh well - sign of the times I suppose.

New Plymouth City Council  
84 Liardet St  
New Plymouth

22 MAR 2021

Call 2.40pm

19th March 2021

Dear Sir / Madam

**Re: Water meters**

My father and I would like to register our opposition to water meters.

New Plymouth is usually the top city in New Zealand for rainfall. We also get the benefit of extremely high rainfall from the mountain and ranges. (See Metservice and the Taranaki Regional Council for data.) This is a wonderful resource that most places in New Zealand do not have. We need to utilise it well.

In addition, the world is in the midst of climate change and our rainfall patterns are changing. We need to take action now to prepare for the future.

Water meters would not contribute to our future. It would be much better to invest in ways to keep and use our rainfall. Some possibilities are:

- 1.. Improve the infrastructure to get water to the community.
- 2.. Increase storage in existing lakes.

3.. Build dams

- They don't have to be huge and extremely expensive.
- With our hills there must be a variety of places that would work.
- If they are also hydro-electric dams, we will reap the benefits in the future.

4.. Require new buildings to store and use the rain from the roof.

5.. Subsidize existing buildings to put in a water storage system.

Putting in water meters would be very expensive and would not provide for the future. We recommend investing the funds in constructive ways to keep and manage our wonderful rainfall.

Yours sincerely

Lyn Smith

Gordon Smith

## **SUBMISSION TO LONG TERM PLAN 2021-2031**

### **REQUEST FOR FUNDING SUPPORT FOR NEW ZEALAND MEMORIAL MUSEUM & VISITOR CENTRE, LE QUESNOY, FRANCE**

#### Background

In the closing days of the First World War, our soldiers on the Western Front, exhausted survivors of battles on the Somme, Messines, Passchendaele and from halting the 1918 Spring Offensive, had one last wall to climb – literally.

The small town of Le Quesnoy in northern France had been under German occupation since August 1914 and this was November 1918. Surrounded by a moat and a 17th century wall complete with ramparts, the medieval town was like a fortress that had survived many an invasion in the preceding centuries. It had one more force to reckon with. The New Zealand Division had arrived to liberate the town from the German occupiers, who continued to defend the ramparts using howitzers, machine guns and rifles. Orders had been given to the New Zealand troops not to shell the town, to avoid any casualties among the 1600 civilian inhabitants.

Instead, some 300 flaming oil drums were fired onto the ramparts to create a smoke screen obscuring the assault by New Zealand infantry using long ladders to scale the outer walls and inner ramparts. The liberation of the town was completed with the capture of over 700 German soldiers, against just on 500 New Zealand casualties including 142 dead - the liberation was achieved without

LE QUESNOY

**Charities Commission No: CC54965 | [info@nzwmm.org.nz](mailto:info@nzwmm.org.nz) | [www.nzwmm.org.nz](http://www.nzwmm.org.nz)**

the loss of a single civilian life. This is an achievement which the town and its people have never forgotten, even today - over 100 years later - which is now beyond living memory. They speak of the liberation with awe, still amazed that men would come from the far side of the world to free their town and citizens, to rescue them in their darkest hour.

The liberation of the historic walled town by the New Zealand Rifle Brigade just one week before the end of the Great War was a demonstration of Kiwi ingenuity and an act of courage. The story of Le Quesnoy is different from that of many other World War One sites – the town was liberated without being destroyed, and the residents were not displaced, and in that respect, it is a story of hope. The town was preserved intact and stands as a place where memories are lived and relived to tell the story to all who will listen; of the price that was paid for freedom in a war that stole much from our world.

### The Project

The NZ Memorial Museum Trust - Le Quesnoy (a non-profit charitable trust) believes it is time to build a permanent memorial to our soldiers who perished on the fields of Flanders and France in the “war to end all wars”. Indeed, it did not end all wars and many more New Zealanders lost their lives on European soil in the Second World War. Over 12,400 New Zealanders are buried in France and Belgium. It is appropriate that the sacrifice of a significant number of New Zealanders, who will remain forever in a place far from home, is acknowledged and remembered.

The Trust has had the opportunity to purchase a heritage property, the former Mayor’s residence and Gendarmerie (military police headquarters), in Le Quesnoy, which is directly connected to New Zealand’s World War One experience in Europe.

The Trust is working towards the vision of creating “a Kiwi place in France where memory and relationships are alive”. We are working towards this goal through the establishment of a Museum and Visitor Centre in Le Quesnoy where our story will be told across multiple platforms – through artefacts, interactive activities, movies, audio stations, an app and other media.

PATRON Rt. Hon. Helen Clark ONZ SSI PC  
TRUSTEES Rt. Hon. Sir Donald McKinnon ONZ GCMG PC (Chair), Maj. (Ret.) Mark Hall,  
Britson (Buddy) Mikaere., Rt. Hon. Sir Lockwood Smith KNZM, Jude Dobson

Charities Commission No: **CC54965** | [info@nzwmm.org.nz](mailto:info@nzwmm.org.nz) | [www.nzwmm.org.nz](http://www.nzwmm.org.nz)

The museum itself will include space for exhibitions and interactive activities, both digital and manual, designed to encounter and explore the stories of New Zealand's liberation of Le Quesnoy, New Zealand's contributions to the war in Europe, the history of the town of Le Quesnoy, an introduction to New Zealand's culture and heritage to Europeans, and the unique relationship that has developed between New Zealand and the French in Le Quesnoy.

### Our Objective

Through this project we seek to celebrate:

**Freedom** – which inspired our people to go to war

**Friendship** – the unique bonds which developed between the people of Le Quesnoy and New Zealand which are still strong 100 years on

**Future** – the opportunity to create a better future with a focus on how to avoid war

### Our Partners

To fully realise the link between past, present and future, we have engaged New Zealand's most respected professional museum experts to help shape and guide the concept through strategic planning and interpretative masterplanning. We have recently approved the Internal Experience Design Brief for the Museum and Visitor Centre prepared by museum experts Lily Frederikse, Tim Walker and Karl Johnstone. The Feasibility Study prepared by French company, Lamaya, was signed off last year and our Māori Advisory Group has provided a Māori cultural framework to inform the overall visitor experience.

We are in discussions with the French government about a potential partnership. They are very supportive of the project.

We have raised \$8M to date towards the \$15M total. Most of this has come from private individuals and businesses, who are on board with the vision of establishing "a Kiwi place in France where memory and relationships are alive". This is not just a project about remembering the past but focuses on the future, developing an experience which is cross-cultural, connecting across nations, through educational experiences and exchanges, offering an opportunity to reflect and learn from the past as we step into the future. As it is so beautifully expressed in Te Reo:

Ka mua, ka muri

We walk backwards into the future.

### Our Request

We have previously presented to your Mayor at the Regional and Provincial Council Sector meeting. We wish to request that you consider a funding commitment to this project as part of your Long-Term Plan.

PATRON Rt. Hon. Helen Clark ONZ SSI PC

TRUSTEES Rt. Hon. Sir Donald McKinnon ONZ GCMG PC (Chair), Maj. (Ret.) Mark Hall,  
Britson (Buddy) Mikaere., Rt. Hon. Sir Lockwood Smith KNZM, Jude Dobson

Charities Commission No: CC54965 | [info@nzwmm.org.nz](mailto:info@nzwmm.org.nz) | [www.nzwmm.org.nz](http://www.nzwmm.org.nz)

**Our submission is to request that New Plymouth District Council supports the project to build a Museum and Visitor Centre in Le Quesnoy with a donation equivalent to \$1 per resident of your district, to remember those who gave their lives in the World Wars to give us freedom.**

The funds are not required immediately and can be paid over the next three years. We are seeking a commitment from you towards the project at this point in time.

Soldiers came from this city and region as evidenced by your War Memorials. Their names stand in perpetuity here in our country. Their descendants live here and maybe even sit in this Council Chamber. New Zealand soldiers came from cities, towns and villages across New Zealand, not knowing what they were going to face on the other side of the world but stepping forward with a courage and belief in what was right and just and good for our country and our world. They went with a belief that tyranny and injustice threatened the very essence of our lives, threatened the freedom, friendship and future which, because of their sacrifice, generations that came after them have been able to enjoy.

In this day and time, we cannot even imagination what they must have faced on the battle grounds of Europe, but we can remember and honour them.

The NZ Memorial Museum Trust asks that you do just that through support of our project.

Thank you for the opportunity to make this submission which we hope will be favourably considered.

Rt Hon Sir Don McKinnon ONZ GCVO  
Chairman

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

There needs to be an intersection on sh3 and egmont road, this is an extremely dangerous intersection also with now adding the ambulance bay on oropuriri road. There have been numerous accidents here and one was witnessed recently that was near fatality if timing had of been the slightest of difference. Easy solution for such a dangerous high use intersection

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

### What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION I write to express my deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. I am an Business owner at KidsZone Preschool . The intersection at Egmont Road/State Highway 3 presents a great danger to the community unless immediate measures are taken to improve the safety at this intersection. We will see a fatality! We can no longer wait to see action. Due to the busy State Highway 3' East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme risks to exit to the East against 80km/hr traffic heading into New Plymouth. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and roadblocks to incoming and outgoing highway traffic to New Plymouth. I have personally witnessed many vehicles taking huge risks crossing the intersection and so many near misses that could have resulted in horrific accidents. As a business owner of a childcare centre with over 100 children attending and the majority of these families using this intersection we are hugely concerned that an accident soon will involve one of our families from KidsZone Preschool. I understand the council were to build a connecting road between Egmont Road and Henwood Road. This has not happened, and communication regarding this plan has fallen silent. I request the council urgently prioritise this issue to either: 1. Introduce traffic lights for motorists to enter and exit Egmont Road safely 2. Build a roundabout 3. Build the interconnecting road between Egmont Road and Henwood Road as planned NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore I/we request for the NPDC to step up and take responsibility for the safety of their citizens and constituents.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Years of local government neglect and frivolous spending has caused the issue, time to re prioritize back to the core items councils were asked to address in the past and less of the look at us, look at what we got playground politics.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Having lived in Auckland and payed for my water I can tell you now this will not work, the haves will continue to use what they want and those struggling will be slaped with a bill, incentives will not work and subsidies will not prevent the hardship many are already experiencing. Landlord will pass on the new interest they incurred from this government's capital gains tax and they will also pass on any costs associated with water use ans water meter installation. Now is not the time to increase household costs for renters and middle nz.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

You will only I crease it next year anyway.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Back to basics local government is what is needed not the time to be looking the best, what we have is adequate while more pressing issues are prevalent. By the way better monitoring of the contractors fixing the roads is required, the use of cheep metal is a significant issue - there is money to be made in roads that need constant repairs

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

### Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

#### *Comments*

Again what we have is adequate, better promotion of what we have, there are sports hubs all over Taranaki that are under utilised. Nice to have but unnecessary

---

### What else?

Water meters will hurt the poor, noting you can do will stop that. The people need a back to basics local government, one that recognizes the wonderful assets we already have and promotes these instead of always reaching for the next shiny thing.

# NPDC's Draft 10 Year Plan

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

Intersection Egmont and Devon Roads... still accident prone. Why not put in a great big roundabout, similar to the one on main road, Waitomo. Easy way to manage traffic flow and make safer at such a busy intersection.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Water meters are not proactive. Spend money on infrastructure to prevent water shortages as well as initiatives such as residential water tanks to make better use of the water we have access to eg. using rainfall for flushing toilets etc.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

### Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

Spend money Planting our place. Electrifying vehicles should not be invested in until a sustainable solution to electricity is found. Currently using coal to provide electricity has a negative impact on the goal.

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

### **What else?**

Review housing policies: - implement rules to restrict rental price of property to a maximum of 5% higher than bond repayments to reduce the attractiveness of this as an investment option.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### *Comments*

Don't agree having water meters

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION I write to express my deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. I am an Employee/Business owner at Applied Industrial Technologies on Hurlstone Drive. The intersection at Egmont Road/State Highway 3 presents a great danger to the community unless immediate measures are taken to improve the safety at this intersection. We will see a fatality! We can no longer wait to see action. Due to the busy State Highway 3' East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme risks to exit to the East against 80km/hr traffic heading into New Plymouth. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and roadblocks to incoming and outgoing highway traffic to New Plymouth. I personally do not use this intersection and avoid it where possible due to feeling unsafe. I understand the council were to build a connecting road between Egmont Road and Henwood Road. This has not happened, and communication regarding this plan has fallen silent. I request the council urgently prioritise this issue to either: 1.

Introduce traffic lights for motorists to enter and exit Egmont Road safely 2. Build the interconnecting road between Egmont Road and Henwood Road as planned 3. Large roundabout NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore I/we request for the NPDC to step up and take responsibility for the safety of their citizens and constituents.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Improvements are necessary and must be prioritized.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

I do not think water meters are the way forward for making savings. If people are paying for water usage, and can afford to, they are likely to use more "if I'm paying for it I'll use it".

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Makes sense to invest and correct the issue.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

The Coastal Walkway is an absolute gem and needs to continue to grow. Any development of and tracks and trails can only have positive benefits to the community. In the perfect world option 3 would be my choice, however at that cost I feel option 2 will be sufficient.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### *Comments*

This is an important development and should be pushed forward as soon as possible.

---

## What else?

NPDC is doing a good job. We need to be willing to spend extra money to continue to develop and grow as a community. The future is now and improvements need to begin before issues arise.

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 4393

**Submission No: 1857**

**Mark Brown**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 4394

**Submission No: 1858**

**Matt Clarkson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### Comments

I have concerns that poorer families will be disproportionately affected by charges on water. I would like to see each house allocated a 'free' amount of water based on the number of bedrooms. The 'free' amount be enough that if people are careful they will not pay any charges for water. This would encourage people to be more frugal in their water usage without being disadvantaged. I also feel that the NPDC needs to address excessive water pressure as this results in higher usage. I recently had my pressure measured by a plumber at over 900kPa, well over the 500kPa that most fittings are rated/warranted for. I opted to install a pressure reducing valve and have really noticed how my water usage has dropped.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### Comments

The coastal walkway is an amazing asset - I use it everyday for transporting kids to school and kindy on my cargo e-bike. I think that the 10 year plan should include extending the coastal walkway to Ōakura as well as Waitara.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### *Comments*

If it comes down to a matter of finances I feel like the multi-sport hub should be the first project to get dropped, or at least it shouldn't be done at the expense of things that give New Plymouth some cultural flair (cutting funding to Len Lye, Womad losing camping space, etc).

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

I live rurally so not connected to this service. I hope rural rates will not increase to offset costs of urban services

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Too much water is wasted. You do not need to wash your driveway Karen. Use a broom! Rainwater and greywater collection at urban properties should be pushed for new builds

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

I live rurally so not connected to this service. I hope rural rates will not increase to offset costs of urban services

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Horse riders should be considered for shared pathways

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

NPDC needs to walk the talk and be a climate leader to encourage other organizations/businesses in the district to do the same

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

The Hub is needed but not at the race course at the expense of New Plymouth Pony Club

---

## What else?

The sports hub should be built put at Bell block in conjunction with central football on the land they own near airport drive

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

## **What else?**

Given the expansion of the built-up area of New Plymouth City, there is little in the District Plan that recognises a large increase in population, and the need for new amenities in the areas of projected growth. We need to see that the plumbing will not only be fixed, but expanded, that more sports hubs will be required, and that tracks and trails will have to extend.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

renters will end up paying more with meters, landlord currently pay water charges via rates. we have enough issues with govt only considering first home buyers. How about water meters for anyone with a spa pool or a swimming pool- they use way more water than the average family.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

**Submission No: 1877**

**Keely Feaver**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Now is the time to borrow whilst interest rates are so cheap. Fix the leaking water supply and reduce consumption. Credit back metered water charges that can be attributed to the leaks. EG before leaks are fixed meter says \$100, once fixed meter say \$75. \$25 credit because it was due to leaks. We use heaps of water, are named and shamed compared to other cities, but it is probably mainly attributed to leaks in the water supply network.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

Now is the time to borrow whilst interest rates are so cheap. Fix the leaking water supply and reduce consumption. Credit back metered water charges that can be attributed to the leaks. EG before leaks are fixed meter says \$100, once fixed meter say \$75. \$25 credit because it was due to leaks. ## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

We have plenty of tracks and trails. Fix what is broken before spending on fun stuff.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### ***Comments***

Ignore climate change at your peril. It going to more the more we put it off.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

This is important to our well being in social interaction, physical and mental health. Improve the infrastructure around the hub to provide good access and parking for cars, buses, bikes, and e-scooters.

---

## What else?

Don't sit on the fence Neil Holdom. You are elected to lead, and sometimes that means tough decisions that are not going to please all the people all the time. We want progress Murray Chong, not all the time spend nothing, and ignore climate change because it cost less and hopefully you'll be right at your age the world will see you out. All councilors are civil SERVANTS.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Curious that the water network is considered run down, as I would have thought the previous Assets Manager ( A. Wilson ) as a competent engineer would have maintained the network adequately.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

We believe too much water is wasted and water meters will address this problem in an equitable fashion as well as facilitating leak control.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

The Coastal Walkway is an outstanding asset and connection to Waitara makes good sense for both NP and Waitara. Our Maunga Taranaki is an under utilised asset with too many of the tracks in poor condition. As the Pouakai Traverse has shown we have a great potential to develop walks on our Maunga.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Many of our sports facilities are becoming dated and it is a pity we are spending so much on our rugby facility for such limited usage. Whanganui's swimming complex for example puts our swimming pool facility to shame.

## Extending our tracks and trails network

---

## Boosting our Climate Action Framework

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

The position the Council is proposing for the Hub, is not at all suitable. Coronation Ave, is the main entrance from the south, The Hub will cause huge traffic problems, the flood lighting of the tracks will be annoying to house holders living near by, not to mention the noise. The council have 200 acres at Bell Block, "Hickford Park", A perfect place for the Hub, so much room, easy access from north or south, with motorway access. The Hub at Coronation Ave has been pushed to quickly without looking at other avenues or even venues.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

The build up in the pipe lines are crazy. In some houses the water pressure is so weak and the water that comes out is contaminated with pipeline debris

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

During autumn and winter the streets can get quite backed up with stormwater and natural debris

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

I think we need more tracks and trails. Though I do appreciate the repairs being done on the walls around my Taranaki in the mean time

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

#### **Comments**

I do think that our climate is definitely depleting, so whatever we can do help preserve our climate is top priority

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I don't think we need another one. Potentially another for odd sports that need different requirements etc beach volleyball but other than that there are already enough facilities to accommodate

---

---

## Boosting our Climate Action Framework

---

## Developing a multi-sport hub

---

### What else?

I do not wish to comment about the proposals. However, I do wish to make the following reminder to Council. I am an 86 year old widow, living in my freehold home. My only other assets are a car and a small investment...highly unlikely to cover my funeral expenses. My only income is Superannuation which I have calculated will rise \$2.95 per week in the coming year. [National Superannuation will rise by \$1.34 per fortnight to \$848 on April 1st 2021.] I receive a small Government Superannuation of under \$170 per week. My House Insurance has risen 15% since 2019 and Contents and Car have also risen. A further charge of 12% on my rate demand will be of real concern, as even with a Rate rebate I live on the edge of my budget. There will be many citizens like me, who struggle to make ends meet. We will have to find the money somehow if we wish to remain independently in our own homes. Just reminding you.

# NPDC's Draft 10 Year Plan

Office Use Only: 4512

**Submission No: 1891**

**Deano Larsen**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### ***Comments***

Agree we need to start attacking backlog of work but should fully debt fund Option 3

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### ***Comments***

Option 2 and charge the developers and new house builders more for putting new infrastructure in place to handle the growing population. They are the ones causing the added strain so charge them more

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

#### ***Comments***

People chose to live where they live and the council have already added more protection for those homes from major flood risk with the construction of the stop banks. This has been a huge ongoing cost and we do not need to spend more here. Stop the bleed.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### **Comments**

Option 3 but spend it on the high gain projects already identified. Don't do Whitecliffs or Fort St George tracks (not high enough priority). Spend the budget on Maunga to Moana. Secure land and do modest track development ie gravel not concrete motorways! I have just spent 3 weeks in South Island and all the cycleways down there are just modest, reasonably narrow gravel tracks with modest culverts and bridges where needed. The people will come and use in droves (just like down south - its a biking destination). We are missing the point totally at moment. NPDC has had the historical fixation of making these tracks of a quality and accessible to the likes of wheelchairs and mobility scooters and this is not the target market for these tracks (its bikers, walkers and runners and a modest gravel track is just fine). Don't over-engineer, over-spec and then spend too much or not even proceed because the cost is too high. Contractors to the NPDC see you coming from a mile away and cook their contract prices accordingly. Keep it simple stupid principles should apply.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### **Comments**

Not big on the EV vehicle replacement policy but rest is good. Think EV vehicles will come down in price and be subsidised sometime in future so don't rush this policy in just yet.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

More debt funding if required. Sell surplus rugby park land into residential to subsidise new hub facility. Don't get me started on the Yarrows stadium white elephant spend please. You need to urgently provide facilities for all the sports (other than rugby) that are actually growing exponentially and have no home - NO MORE MONEY ON RUGBY FACILITIES PLEASE

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Use the government funding that is available for upgrading this.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Needs to be outlined how the water meter will work! Most people won't be able to afford something that should be free. People with extreme high use should be charged but don't like the idea of people having to pay like power

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

### What else?

Great ideas, but raising the rates by 12% when it goes up and up year after year is not fair, people are struggling and don't need that huge increase!! It's crazy!! Find another way to fund your project instead of just turning to the tax payer to pay for it every time!!

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

Let's fix our essential services first

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

**Peter Wisnewski**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Why don't you offer incentives for new home builds to have water tanks installed to collect and use rain water. Even existing builds. This would take pressure off the system. We waste this rain water ie it goes down the drain

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

As per my previous comments about water tanks

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

#### **Comments**

This is long overdue. We need this for our children. Get them off the couch. Also so we don't have to travel outside the province for sporting events

## Boosting our Climate Action Framework

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

My main issue is, why not use the sporting facilities already available within NP and the surrounding districts, and save the rate payers 90million.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

## What else?

The Junction at SH3 and Egmont road needs a roundabout. There have been many accidents here and it is a matter of time before a fatality occurs.
