

No Mt Messenger Bypass - save Mangapēpeke Valley

To: NPDC Mayor Neil Holdom, TRC Chairman David MacLeod, Transport Minister Phil Twyford, Assoc. Min. of Transport Julieanne Genter, the Minister for the Environment and Minister of Conservation

We strongly urge you to decline consent to NZTA's proposed Mt Messenger Bypass. This new road will destroy 44.4 hectares of indigenous forest and wetlands, home to dozens of threatened or at-risk endemic species including North Island Brown Kiwi, the 'threatened-nationally vulnerable' Archey's frog and the 'nationally-vulnerable' NZ Long-tail Bat.

It is time to move on from fossil road projects and create a vibrant, sustainable Taranaki economy. An upgrade of the existing road makes far more sense.

Why is this important?

This new road will damage the "physically, spiritually and socially significant" Mimitangiatua River and Mangapēpeke Stream of Ngāti Mutunga, Ngāti Tama and Poutama. It will destroy 44.4 hectares of indigenous forest and wetlands that are home to dozens of threatened native species such as the North Island Brown Kiwi, Archey's frog, Long-tail Bats, Fernbirds, North Island Robins, Giant Kōkōpu and Shining Cuckoo.

This proposal is opposed by the Department of Conservation, Forest & Bird and landowners who are being forced from their homes. Some iwi are yet to be fully consulted and other iwi are still deciding, being so far unsatisfied with mitigation offers.

Mangapēpeke means 'frog stream' and frogs are a well known environmental health indicator species. No amount of proposed tree planting and pest control can mitigate the damage actual forest removal and pest introduction this road will cause.

The 'bypass' should not go ahead. It makes no sense to destroy ancient forest communities just so cars and trucks can get from A to B a few minutes quicker. The touted safety improvements do not stack up when well-known fog and black ice in the proposed area is taken into account. Nor when increased speeds will also increase accident rates. The age of large truck transportation is coming to an end as fossil fuels become ethically unaffordable. So let's be practical, do we really need a brand new \$200million road?

It is time to move on from fossil road projects and create a vibrant, sustainable Taranaki economy. An upgrade of the existing road makes far more sense.

Public submissions are to be heard on June 11 in New Plymouth where we will deliver this petition to the decision makers: New Plymouth District Council and Taranaki Regional Council. We will also email the Ministers of Parliament.

If you want to know more about the proposed road plans click the link here to see NZTA's resource consent application <https://www.nzta.govt.nz/projects/awakino-gorge-to-mt-messenger-programme/mt-messenger/rma-applications/>
