NPDC's Draft 10 Year Plan

Office Use Only: 123

Submission No: 1

Jean Moffat

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

New buildings include water tank connected to roof for storage water

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Please keep them maintained Money well spent

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Keep the public informed and ask their help

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

1 stick can be broken, a bundle is too strong. Benefits. ! One drop off for families 2
Sharing facilities 3 Easy to change or mix different sports for children

NPDC's Draft 10 Year Plan

Office Use Only: 129

Submission No: 2

Jenna Town

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Can we have option one with increased education and emphasis on conserving water, while also making it mandatory for any new builds (commercial/residential) to have water tanks and any major renovations (if you are adding bathrooms/making the house bigger) to have water tanks. It seems crazy that we have so much rain here but very few properties have their own water tanks other than those who have too. Water meters seems like a monumental waste of money (when there are so many high priority things for us as a region that, that money - \$45 million could go towards). Not to mention the then ongoing admin / maintenance costs required to keep them working. Just look at the parking meter issues we have currently.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

These are great for everyone to use and as long as they are thought through (road congestion / parking / alternative ways to get there - walk/bus/bike / impact on the environment, rubbish bins/recycling bins and frequent collection).

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

No electric cars... doesn't a lot of the research point that these are no better or marginally better than what we have... because of how the batteries are made and then disposed of. Shouldn't we be endorsing solutions that are a full cradle to grave solution not something that is adding to our problems by not being able to deal with the waste? Wouldn't a better option be reducing your fleet to what is absolutely necessary - so that people whose jobs are to be out and about can share cars / car pool where applicable / bike / bus / walk where applicable? That way you are reducing the cost to us rate payers by having company cars and reducing the impact on the environment by using less cars and walking the talk of wanting to take action on climate change.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I cannot see what is wrong with all our current facilities and why we can't utilise these better. This seems like a really cool idea but given the amount of work and cost we are facing getting our core infrastructure up to par... this seems like a nice to have, when we have done all the must have's.

What else?

This has been a really easy way to provide feedback.

NPDC's Draft 10 Year Plan

Office Use Only: 131

Submission No: 3

Emma Crofskey

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I think the plumbing is a necessity to get sorted, however I am slightly annoyed at past councils who have not made this a priority and kept up maintenance/upgrades over the past years.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I think water meters are inevitable, but my concern is what happens when a person or family cannot pay their water rates. I don't believe that we can have families living without running water in our District. Also water fountains and schools/public places that have running water have the potential to get exploited by a few.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara is a key part of our district and they need to have appropriate stormwater facilities.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The tracks and trails around New Plymouth District are fantastic, and if we want to be the Leisure Capital of New Zealand then we need to have absolutely outstanding tracks and trails, connecting many of our towns across the District. Fully support this initiative.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Definitely carry on the good work of the CAF, with additional measures to counteract climate change.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The need for decent sporting facilities is now desperate within the New Plymouth District. The scarcity of decent court space for sports such as Volleyball and Badminton is appalling not to mention the lengths Netball has to go through to try and book courts for their Premier competition. I think delaying to Year 6 would be detrimental to the whole project as it would lose momentum and the sporting codes will need to spend more money to come up with other temporary solutions to their lack of sporting resource. If the overall cost of changing from Year 6 to Year 4 is negligible, then it should be prioritised, as I wouldn't like to see my now six year-old, disenfranchised and not playing sport when she is 15/16 once the Hub has finally been built. The construction timeframe alone would be 5-6 years, so why double that by delaying it for 5-6 years? Sport has proven to be such an amazing tool for all ages to develop social networks, confidence and resilience, not to mention the physical benefits. Please move the construction of the Hub to year 4.

NPDC's Draft 10 Year Plan

Submission No: 4

Paul Scott

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 137

Submission No: 5

Megan Peters

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The development of a hub complex for our community is a need not a want. We have not had a facility developed for 25 years and when that was build it was at capacity we now have our children not being able to be physically active as the facilities are not fit for purpose. No wonder we have a problem with child obesity in our country. OUR CHILDREN ARE MISSING OUT!!!!!!!!!!!! This is about the wellbeing of our community not just for now but for future generations. We need this hub NOW not in year 6 of the LTP!!!

NPDC's Draft 10 Year Plan

Office Use Only: 138

Submission No: 6

Guy Honnor

Organisation: Sport Taranaki

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This is more than a want but a necessary investment into the lives of our young people. Many sports (indoor in particular) are turning kids away due to a lack of facilities. My children need this important facility for them to be active and play a variety of sports

NPDC's Draft 10 Year Plan

Office Use Only: 139

Submission No: 7

Cam Murray

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

The infrastructure has been neglected for too long. It needs urgent attention now and, as this will be a long life asset, it needs to be fully debt funded - to spread the costs over the long term

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

I'm not sure of the funding figures provided. How will a cost increase of just \$ 5 million save twice that of the low option?

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

We can't address all the problems in one go. Start with option 2; let's see how that works. I grew up in Waitara so this is not a NIMBY attitude for me.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

This would be a good start

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

This is a long-term issue. Bite the bullet - make a long-term commitment

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

We've talked about it for long enough: we need the hub; don't put it off for another 2 years. Delays in construction estimates mean it'll probably be 6 years anyway!

What else?

Thanks for the opportunity to participate

NPDC's Draft 10 Year Plan

Office Use Only: 141

Submission No: 8

Rob Murray

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Don't waste money

NPDC's Draft 10 Year Plan

Office Use Only: 142

Submission No: 9

Marina Healey

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Provided that this is not paid for by leasehold land money.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

We have an amazing network of trails and it's an amazing way to keep the company active and attract visitors to the region. Waitara is a growing community with potential residential sub divisions in the future and growing traffic on the main road to New Plymouth. Would be great for our community to be able to use safe, sustainable transport to and from Bell Block and greater New Plymouth.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The need for a multi sport facility is now! - not in 6 years time. Currently kids are missing out on playing indoor court sports due to lack of space or are playing late into the evening. The ability to bring visitors to the region due to sporting tournaments and the like would have to be positive for local business. Having space that is not only devoted to sport but also to other recreational activities right beside the iconic Pukekura Park and in a central location to the city and to many schools makes sense! Please bring this forward in the long term plan - it only makes sense for our community wellbeing.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Please try and make more Good,safe Parks for under 6 year olds. There are parks around New Plymouth but mostly for older children. We need more places for young families to enjoy. I am a Grandmother , struggle with the parks that are around.Thank You. Plus maybe a extra swimming pool complex.The beaches are to rough for littles also.

What else?

I know im asking for alot, but please help families who don't own a car, please can buses run more & cheaper. Plus taxi or uber grow more, so there will be less cars on the road! England is a prime example.Plus help those who work part time who don't own a car the help in getting there either on a bus or Taxi. Car parks won't be overcrowded either.

NPDC's Draft 10 Year Plan

Office Use Only: 157

Submission No: 12

Blair Thomson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

This is a long term asset that should be funded over the period of it's life. The cost of bad decisions by previous councils should not be lumped on the current rate payers alone - it should be shared by future ratepayers also

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Quite hard to have a strong opinion without much knowledge on this

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Only replace vehicles with EV's as required

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Need clear information in the public asap regarding the overall (finished) concept, the timing of the different stages, and intended funding. (ie, what current sports assets like the Fitzroy netball courts can be sold to fund the multi sport hub)

NPDC's Draft 10 Year Plan

Office Use Only: 158

Submission No: 13

Natalie Kennaugh

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

This is punitive rather than encouraging. Is this 'high water' confirmed as residential users? my friends & family are not high water users, and I am always surprised by this statistic. Support urban rainwater tanks, that also build resilience. You charge for water meters, you will charge for water... even if we are a low user, we will still end up paying more.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We already have a lot of free outdoor attractions in NPth, and this doesn't add anything difference. It only brings supplementary income via accommodation and hospitality, it is not a tourist-paying attraction. And the walkway is not capitalised on anyway, hardly any businesses front onto it.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Plant the trees, but electric vehicles not a sensible investment at this stage. It is a luxury, and ratepayers don't need to assist that. Save emissions by encouraging biking and walking.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

It is necessary and overdue, provides for families rather than just hobbyists.

What else?

Do not raise fees at the pool, it is one of the only year-round affordable options we have for exercise and family fun.

Office Use Only: 161

Submission No: 14

Vanessa Vujcich

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Submission No: 15

Colin Clarkson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electrifying vehicle fleet has not yet been proven to have any effect

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Get funding from other sources

Submission No: 18

John Thomas

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This is a must have and the NPCD needs to focus on fixing and maintaining existing infrastructure. Not adding additional nice to have infrastructure such as trails (more maintenance and capital cost) especially when the justification for these trails is based on attracting tourist who put more demand on local infrastructure and crowd our local quite areas. Rate payers (NPDC and TRC) must stop subsidising tourism and tourist operators and destroying high value natural areas for the same reason. Please read reports recently published by the commissioner for the environment (Simon Upton).

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Please no water meters!

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Get it fixed, get storm water out of the sewage system!

Extending our tracks and trails network

Comments

No additional nice to have infrastructure such as trails (more maintenance and capital cost) especially when the justification for these trails is based on attracting tourist who put more demand on local infrastructure / environment and crowd our local quite areas. Rate payers (NPDC and TRC) must stop subsidising tourism and tourist operators and destroying high value natural areas for the sthis reason. Please read reports recently published by the commissioner for the environment (Simon Upton). Stop wasting my money on nice to have trails that the economic justification is based on tourism. This is a failed model!

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

This spend is pathetic on such an important issue. The NPDC is willing to spend 5.6 million on the Kaitake trail to encourage tourism and the associated carbon foot print and a only 200,000 - 350,000 on Climate action. Have the NPCD noticed that the we are in a climate crises per Government declaration?

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

This is money well spent, its for the community as a whole not just one small part of the community. It is not based on the false economics off attracting large numbers of tourist. Locals pay, locals benefit!

What else?

People like live in the NPCD region as it is relatively quite and unspoilt (not overrun by tourist). Please stop using rate payer money (my money) to promote tourism in the area and pay for tourism infrastructure. For example you do not subsidise the local dairy industry (this creates many jobs and is the economic engine of Taranaki), so why subsidise tourism. Focus on providing must have infrastructure for the people who live in the NPCD area.

NPDC's Draft 10 Year Plan

Office Use Only: 172

Submission No: 19

Jocelyn Charteris

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

With more people moving here, the infrastructure, like water, can't cope. Plus our water system needs a lot of money spent to bring it up to scratch, and I think meters might be needed to curb usage

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I think we need water meters to curb usage

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 175

Submission No: 20

Paul Woodgate

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The network will not collapse overnight. Nevertheless, as indicated, a start must be made, vulnerable areas first if practicable. Ratepayer burden a priority here.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Would agree- too much water wasted. However, if meters introduced, council's responsibility to maintain a fair rate; and current water levy to be removed from rates

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

No, except to say that Waitara folks would be pleased NPDC has them on it's list

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Nice to have and improve; and an income earner for many, BUT must not take priority over more urgent issues

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

As I see it, this would proceed, but not to be hijacked by over-zealous groups or individuals

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Given what has to be spent on fundamental infrastructure over time, I don't think it appropriate that money is spent here. Presumably Yarrow Stadium - and refurbishing of - is a separate issue.

What else?

NPDC must revisit its proposed 12% first-year rates hike, and produce a result the people of Taranaki can live with. The fallout from COVID is ongoing. Folks on low or no wages, the elderly and retired, are becoming anxious. As our Mayor has said, a rebate won't necessarily be there for some of those who might otherwise qualify. So, show some courage Council. File back in there, and resolve to make some hard decisions. Prune away some of the nice-to-haves for the moment. Please don't dismiss submissions. ^

Submission No: 21

Michelle Jackson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

You have tried to fix our water in our street for the past 12 months and still trying! It's quite a joke. If you do upgrade; make a map of all the connections, so contractors don't need to keep ripping up peoples driveways looking for pipes!

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Oursupply of water comes off the mountain, if you want to meter New Plymouth, but leave the towns that don't use from the reservoir

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Nope

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is a bonus not a need

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

All great planting stuff but then you have to pay To maintain

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

One stop shop, good idea but make it practical!!

What else?

No money to the stadium. Do something about the potholes in roads. Actually watch the traffic management that you pay for in your contracts - most twiddle there thumbs. Waste of money. Our street for example, continuous waste of money with stuff ups! Actually get out there and care what residents have to put up with. And to the mayor, if you are walking around town, smile at everyone, not have your head down not caring about your community

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Comments

I believe we should be planting more, so tick for that! Making the NPDC car fleet electric? No way! Do you realise that in order to make electricity in this country, we have to rely on the burning of coal at Huntly so we have enough, especially in times when there is not enough renewables to be at maximum capacity, because there is no more exploration of gas fields? Did you realise that coal, whether being imported from overseas or from NZ is worse for the climate than gas? Did you ever read the report that was done about electric cars producing MORE emissions from woe to go than a diesel vehicle?! Electric vehicles are NOT the 'clean, green' solution people would have you believe and I am strongly against having MY rates pay for these.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

A multi-sport hub would be amazing for everyone in the entire region. The perfect place for it would be at the race course. That area could then be used year round, all the time, and the land from where Yarrows stadium is could be subdivided and sold by council to raise funds to go towards this investment in our region.

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Invest in tracks, no need to take the coastal walkway to Waitara. No one will use it and way too costly

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Most important thing for the community as a whole. Can't come quickly enough

NPDC's Draft 10 Year Plan

Office Use Only: 200

Submission No: 33

Markham Mail

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We had water meters in Auckland years ago. Didn't save any water because we didn't waste any, just added to our expenses.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

We don't really need to extend the walkway to Waitara. That's just for cyclists and it's a WALK way.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Keep up the good work.

NPDC's Draft 10 Year Plan

Office Use Only: 202

Meg

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Time for water meters

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

This brings people into the place and brings money in. Worth it

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This needs to be stated ASAP! 4 years is still too long to wait for this! Children are not able to access sports at decent times due to lack of facilities. This is the most important thing for my family.

What else?

Please start these projects as soon as possible especially the sports hub.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Get started on it, don't get us into debt to fix it

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I don't want an extra cost of water metres

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Don't think this is a wise use of money in these times

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I think planting trees is important but not sure about upgrading the fleet

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Save money in these times

What else?

I think it's massively important to be using our money wisely and not getting into more debt for unnecessary projects in these times, we should be looking at reducing our debt and maintaining our infrastructure

Barry Adams

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Should be user pays , those that are using city water and waste systems should pay for upkeep and upgrades ,not all ratepayers . In my personal case I don't use any of these systems because they are not available to my property so have invested in my own infrastructure so shouldn't have to pay for someone else

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

As mentioned before should be user pays, water metres would save water for the system that I'm not connected to

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

As before user pays

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Spend the money on infrastructure that needs upgrading like water . Coastal walkway is a want not a need

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Rather ironic that council has declared climate urgency but are going to lose ratepayers as the oil and gas industry contracts in Taranaki and have to find funding for CAF

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Again a WANT not a need. water infrastructure is stuffed , roads need attention , the list goes on re basic services needing funds . thought council might have learnt with the airport terminal fiasco . People would like these fancy projects but always want someone else to pay

What else?

Council should stick to basics like roads rubbish water etc, not building fancy stadiums when the Taranaki economy is going to decline in the next decade with the hits to the oil industry and farming sector

Fiona Spark

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I noticed only option 3 had expanding the leak detection, and wondered why it wasn't included in all the options, as it seems like a good idea.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

It's really daunting to see such a massive rates increase in the first years, is this due to underspending in previous years that we are now having to pay for as a massive spike?

NPDC's Draft 10 Year Plan

Office Use Only: 227

Submission No: 44

Chris Wheatley

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

I don't understand how the water infrastructure has got to this state without continual smaller investment to keep on top of it

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We live in a high rainfall area. The issue should be addressed with supply not us paying huge amounts to use it. I don't understand on what basis you say we use too much water? What proportion does commercial/industrial use and what will they contribute?

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This money is better spent in critical infrastructure like the water not adding more to our rates

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.
NPDC's preferred option.

Caryn Rhodes

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 260

Submission No: 62

Jason Lyes

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Absolutely do not want water meters. This is a horrible idea. We have so much rainfall here that is criminal to even think about introducing water meters and incurring further costs on households. This would unfairly hit families when many are struggling to make ends meet weekend ro week as it is. The council does not own the water so how does it think it has the right to charge for water through meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The sports hub cannot wait any longer to be built. Sports are struggling now as it is. The extra space and fields are required asap for the development of the individual sporting codes and to meet the growth happening year on year in Junior sport alone. I am involved in Junior hockey and we need the extra space and update facilities asap. The Multi sports hub should be high priority for this council to ensure that kids in particular are not missing out on playing sport.

What else?

Absolutely NO to water meters.....we do not need them! We have so much rainfall! Build more infrastructure to capture and utilise this rainfall that we are blessed with here.

Office Use Only: 261

Submission No: 63

Amy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We already pay too much in rates. I'm not paying for water as well. Unless you decrease the current rates levy.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

New Plymouth storm water needs improvement too. Everytime there is heavy rain our property and the one next to us floods because the stormwater drain doesn't work properly. Its been that way for years, its ridiculous.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

There is a large increase of heavy trucks using our residential street to avoid going into the city centre. These trucks are so heavy they shake several houses on our street. I have raised this issue before but you guys don't seem to care.

Comments

I would love to see Bell Block beach as a safe swimming zone. The leaks going into our beach are unacceptable. It's continuously flooding outside our house on Mangati road and we haven't even lived here in a winter yet - I'm nervous as to how bad it will be

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

More cost to home owners through meters is not desirable. I would have to understand more how home owners would be charged for this but I feels like more stress on top of our rates

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

I'm unfamiliar with the area so cannot offer any sound judgement

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I often use the bell block walkways and have people stop and asking me if it ends or goes to waitara. It appears there's a want for it

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Sounds like an amazing investment

What else?

Amazing initiatives for our future. I love our innovative council

NPDC's Draft 10 Year Plan

Office Use Only: 293

Submission No: 78

Michelle Richardson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

A high need in Taranaki

What else?

Imagine the money we could bring in hosting major sporting games in Taranaki

Office Use Only: 300

Submission No: 81

Jill Leathley

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I do not want water meters. Taranaki has a very high rainfall, invest in more dams, reservoirs and introduce water tanks for new builds. Use our natural resources for long term investments.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

I do not want you to invest in eclectic cars. There is no way to dispose of the batteries. You are adding to an already existing problem of waste disposal. Invest in having less cars and more in public transport for your staff.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Just build it and get on with it.

What else?

Overall you do a very good job with our parks and reserves. However as a long time resident of Bell Block (40+ years), the Mangeti Reserve/walkway has deteriorated over the years. It needs to be better maintained with better weeding, edging etc.

NPDC's Draft 10 Year Plan

Office Use Only: 301

Submission No: 82

Robin Bruning

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

With the growth of our city, our current stormwater systems are insufficient to carry the amount of water coming from new housing developments especially in Bell block! We are sick of being flooded (as are our neighbours) when we have a huge downpour just because our house sits at the low point of the road. We never had this problem until the Kingsdown subdivision increased substantially. While we appreciate the efforts of the council in initiating double drains to remove the water quicker, this is not enough as the problem lies with the underground pipes not being big enough to cope with the amount of increased water. This needs to be given higher priority in sorting the problem! We have also put more soak holes on our property , as well as raising the level of the entrance to our property recently when we concreted our driveway! Please can this problem be sorted ASAP!

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Evidence (both statistics and anecdotal) suggest that sporting numbers are growing. This needs to be fast track to be within a 4 year period. However, what Sport Taranaki now need to do is think about funding vs the design and plans. This will ensure all the ducks are in a row. While it's needed on principle, how we're going to build it should be the number one priority for Sport Taranaki.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

In times like this, where COVID has affected a lot of people. People are struggling mentally and are extremely stressed. With suicide rates being as high as they are, a sports hub that we so desperately need would be an outlet for people to reduce their stress. A hub where the community can band together. We are also the only major city without one. As a sports fan it is hard to watch sports teams and individual players struggling with current sport facilities. I see this as a major priority compared to the other issues.

Mark Douglas

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Those figures seem odd - how can spending an extra \$6M initially end up reducing the long term savings?

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

We need to look at managed retreat for these kinds of low lying, flood prone areas

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

We should prioritise maintaining the tracks we have (and that are most used) before committing to building (and then maintaining) more walkways

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Look at managed retreat in order to focus spending where it has the most impact

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I don't think now, with the challenges facing key infrastructure and the need to invest to prepare for climate change, is the best time to be investing in large additional assets that come with the burden of ongoing maintenance. Leave the racing club to look after the area and revisit this when (if) things calm down

What else?

I'd love to speak to the council about my feedback but I'm not particularly keen on standing up at a council meeting

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Do not agree with charging fir water usage with a metered system

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We are charged a set amount for water in our current rates. If water meters are introduced, this current charge should be removed from the rates amount.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

These are future focussed in developing our region and maximising what we have to offer for both locals and tourism, providing recreational options that benefit all.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Tree planting for beautification and to support climate change initiatives should be in streets not just parks and open land. Our streets look very bland , mostly treeless compared with some other regions.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We need to make better use of Yarrows stadium and adjacent land for multiple sports and utilise existing facilities better.

What else?

Walking the CBD yesterday was saddening. So many empty shops looking shabby. A new plan for the CBD needs to consider concentrating all retail in one section of Devon Street. You have to walk too far to get to things from one end to the other and also consider allowing time to get back to your metered car space. Perhaps NPDC could commission large photos of iconic local scenes and tourist spots (as seen in TSB central bank windows) to erect in empty shop frontages to make the CBD look less rundown. Removing the trees will add to the current unattractiveness.

NPDC's Draft 10 Year Plan

Office Use Only: 330

Submission No: 97

Jake Rapira

Organisation: Box Office Boxing Inc.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The multi-sport hub is a much needed project with so many sporting codes not having adequate facilities for them to participate. This project will boost our local sporting opportunities and also invite national and international sport teams and events to the hub and ultimately boosting local revenue in the CBD.

Chris Williams

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

The listed options to pay for this fix are insufficient. There needs to be water meter usage in the district, with water charges divorced from rates and charged like electricity or gas. Water and sewage supply is a key core competency of council and should be highly prioritised, certainly much higher rated than support vanity projects like the len lye centre.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Better enforcement of water usage need to be happening. Not just residential using water for superfluous reasons when restrictions are in place but also businesses that are high users for low value usage such as washing vehicles, watering landscapes areas etc. Adoption of water storage on all dwelling for grey water and garden usage should be encouraged by council, roof run-off storage and measures to slow down soakage and entry to storm water system should be encouraged.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Invest in systems such as planter boxes or reed beds to slow down and hold storm water, releasing it over a longer period to relieve pressure on the system.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Critical core infrastructure that will add for more investment and value to the region then continually prioritising roads. This should 100% be done as fast as practical

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

electric vehicle while cleaner themselves are not a panacea, especially considering the source material and the energy and pollution caused to extract, process and ultimately dispose of them. There are bigger, more important issues to focus on than the vehicle fleet being electric. Not trucking waste to Palmerston North, re-establishing the recycling of all plastic types or banning use of non recyclables. Other initiative such as solar on all buildings, small scale wind turbines and reduction or reliance on fossil based power production. Far more cycle lanes and cycle parking facilities as well as an expansion of the Lets GO project to continue to publicise and prioritise cycle usage in the city and region would be beneficial. Removal of council staff car parking and encouragement to cycle or use public transport instead. Provision of better public transport, restoration of tram routes, closing Devon street to traffic between SH44 and Robe st to improve the environment of the city centre

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Work should be started as soon as possible. Confirm with the racing club that they have no prospect of having the invalid lease renewed, take control of the land and start the project.

Sam Westlake

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

I've lived in New Plymouth for 14 years now. Originally from Plymouth, England. In Plymouth we have tons of sports hubs and Artificial turfs where people can go and play lots of different sports. For grass roots it's vital to have somewhere they can go, offer coaching, in the long run it's an investment for the people and NZ as a whole. NPDC could make more money via hosting tournaments and gatherings.. In turn boosting the regions other businesses.. I would love to speak about this given the chance.. Ive played football (soccer) my whole life and also coached for a number of years. This is something we need
