NPDC's Draft 10 Year Plan

Office Use Only: 6579

Submission No: 2601

Huw Edwards

Organisation: Central School

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I am 10 years old and I think we need a multi-sports hub in four years because it will help kids get fitter and stronger. It will give more children more opportunities to play and learn sports and go on to be active and healthy adults.

NPDC's Draft 10 Year Plan

Improving stormwater management in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

on first note i think we should have the sport hub cause it would be a great opportunity for sport lovers. this would be great for lots of sport fans. on second note it would be great for peoples fitness. this would disincreas the obesity rate in new plymouth.

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

It is essential for our area to build a sports hub as soon as possible because our tamariki need more facilities to play and learn different sports. The new hub will allow give them these opportunities. I teach year 6 students at Central School Te Kura Waenga o Ngāmotu and can see the need in our community. It will be very accessible for our students and we are looking forward having this facility available.

How do we pay for fixing our plumbing?

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Dear New Plymouth District Council, I would like the Sports Hub to go ahead in four years because otherwise children will lose interest in sports if they haven't had the opportunity to play or are forced to play late at night. It would be an honour if you let us have a new sports hub in four years and not six. Kids will be amazed by the new sports hub and will learn to be more active.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Find an alternative location for the hub.

What else?

Sports hub would be better suited to another location, perhaps bell block area. Current roading and storm water system does not support the implementation of a sports hub. The racecourse will likely be too small of a venue in years to come And is already occupied by other clubs. A sports hub will cost more than 40mil

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I think we should support this and go forward with building the multi-sport club in four years because right now I am 10 years so if we build this in 4 years I will be 14. So when we are that old sports for us would still be fun and exciting. and the chance to play different varieties of sports would be amazing. But if we don't do it and keep it suspended for another useless 2 years without more sports and exercise. I WANT TO SUPPORT THIS CLUB. If you support me and the others who want to build this club in 4 years we offer you reading this a big thank you.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water consumption isn't the problem. It is the plumbing that is that issue. If this was fixed then there wouldn't be so much wasted water

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 6593

Submission No: 2612

Murray Lowe

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 6597

Submission No: 2613

John Konijn

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Use part of the "sovereign fund " ex Powerco investment as that arose from previous infrastructure ,and sold off .

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Water meters are like a power meter. User pays & would be an effective control & record of usage .

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Good tracks & trails attract visitors , & represent a virtuous investment in health , recreation & anti CO2 emissions . You can create further urban tracks that connect to the existing concrete path network too .

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Consider the bike and walkways in the CAF /budget . They go together because who doesn't like biking through trees as part of a bigger bike network .

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I believe you should defer expensive developments on the Racecourse until NPDC has secured all the land & Racing agrees to relocate South . ie work with Stratford & Hawera on the relocation and once the Racecourse land is unencumbered then commence a sporting redevelopment . Afterall we ratepayers are already burdened by the unexpected Rugby Park Yarrow stadium redevelopment , with more costs expected . The current plans are compromised by the present usage of Racing & could be so much better . Patience is a virtue & sensible economically , with an aging population , & Post Covid , post OIL & gas economic contraction just around the corner .

What else?

Work with DOC & TRC regarding establishing a 'BUS depot 'Park & Ride facility in Egmont village or Inglewood with a view to restricting private vehicles or permitting private vehicles up to the often congested North Egmont Taranaki area . Then extend our biking walking network to connect NP , Burgess Park /Meeting of the waters , , Lake Mangamahoe , Egmont Village , Inglewood & environs .

I am writing you regarding the planned multisport hub. A great project! But I was disappointed to see that no beachvolleyball courts are planned. Is there a way to have two or three included in this project? It is a growing sport and a lot of countries all over the world have manmade beachvolleyball courts that have a high popularity amongst people. There even exists one in Mosfellsbaer, a small town close to Rejkavik (Iceland)!

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I've noticed the difference in the amount of toilet flush is quite large in cafe, hospital, home, etc. This uses a huge amount of water so some type of uniform amount of water going down the loo would be less strain on sewerage system. When tiling or paving an area on a residential property, owners should be using porous tiles so a lot of stormwater seeps thru the tiles + is absorbed on the property.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I've been plugging for water meters for years. Its a user pay society. Introduce immediately so by 2024 a dummy run can be carried out. Must have graduated scale, first 50,000 litres at low cost, 2nd 50,000 litres more costly, third 50,000 more costly etc. Its just like paying for power, you can learn to economise. So this means those in a rental property pay their own water, just like power? There should be a huge price on commercial car washes. Not good for their business but good for the water supply, maybe the water could be recycled for the next wash? I have serious concerns about water meters not working for the rich upper class families. If water is available they will use it just like power, because they won't care about the cost. They will fill the swimming pool, wash motorhomes and boats etc without caring. We need to reduce the availability (like power cuts) for an hour every day, to trickle flow. Or some other idea that your highly paid councilors will decide. When Cyclone Gita took out the water, everyone rich or poor was on same footing because the water just wasn't available - another good reason to have water tanks installed at every new build. These water tanks would need to be "tested" every year for hygiene and safe to use etc. Have council even considered the "grey" water option. All dishwashers should be considered. Not the shower as the toilet needs a certain amount of extra water to keep pipes from being clogged by solids. And reservoirs? We need more to be constructed to save the water in the first place. The Regional Council consent arrangement needs to be more flexible so when we are having heavy rain, it could be filling reservoirs for use later. Rain is Gods gift, and is free to everyone, we don't own it, only have right to use it. So when it floss down the rivers we should be catching it and saving it. Water is like your vege garden you preserve and reserve your surplus - we shouldn't be letting too much valuable water just flow into the sea. Remember WATER IS OUR MOST PRECIOUS COMMODITY. It's free, unpolluted and available in Taranaki. It should be used several times.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I'm interested to know what work is going to be done on the Tangaroa Stream which was only a stream, in the last 15 years before the development there it was a boggy farmland. The area behind the Maori pa needs cleaning thoroughly and paid by the Maoris who have been given millions. Behind the schools its a horrible mess but the marae should pay. all housing should have own water tanks which would reduce stormwater. Every new build from 2022 should have tank installed, part of the building permit. Overflow only goes into stormwater, used for car washing, watering garden.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Good idea. Do we have manpower to maintain these tracks? We could do with less paper pushers and more actual workers in the field if we are to make the above work.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

All vehicles should be kept on site and not used for personal use. Planting trees is necessary for a healthy environment, but need manpower for maintenance. I live by Tangaroa Stream, which is tiny in comparison, but is not kept up and very messy. Residents of the area could be asked to help keep it tidy.

Developing a multi-sport hub

Comments

Option 4 - Community funded like the TSB Stadium. While I am not against a sports hub, but it should be funded by those who use it. Maybe the council could fund up to 20 million and the rest should be by fundraising. Its been done before, its a user pay society. You pay for swim. Start now, don't wait for year 6, but only spend the money already targeted. We know the council always goes over budget but NOT on this. Stop. Encourage coming to Waitara to use the netball undercover.

What else?

The document is too wordy, well presented, but many of my friends said, oh its too complicated and hard to read, so didn't bother.

NPDC's Draft 10 Year Plan

Submission No: 2622

Tom Stephens

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Once Yarrow Stadium has been completed our Regional Council must appoint someone to bring in more international sport like rugby (test, womens, mens, 15 + 7 aside) rugby league the same scenario, soccer the same scenario and maybe be available to get some real international entertainers as I do believe our TSB Bowl of Brooklands is a great venue, but to have several international entertainers groups, etc, etc Yarrow Stadium would be the ideal venue. To have another sporting hub in our province would not work simply because towns like Waitara, Inglewood, Stratford, Opunake and Hawera all have their own sporting hubs. It would be far better to help cut racecourse which many upon many top race horses, trainers, jockeys, harness racing and reinsmen and women have graced our racecourse. Its a great pity our city doesn't have a proper international cricket ground so maybe our council could take a good look at upgrading Pukekura Park and have lights for any cricket day/night games. We must utilise our sporting grounds and venues we have available here in New Plymouth so maybe upgrade both the TSB Stadium and the YMCA Stadium in Liardet Street.

Submission No: 2623

Richard Dravitzki

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

A falling tree broke a water main 2 years ago. Don't/need to go overboard try and keep rates low.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

This will definitely conserve water use I know from experience.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Don't use Covid-19 as a good excuse to increase rates by 12%+ its a massive rise in 1 year. Fund the basic must do infrastructure look very hard at the frills.

Option 1: Do not develop a multi-sport hub.

Comments

I believe we should be looking at our sporting facilities as a Province and have a good look at what we actually have as far as facilities. The drivers of this project should be carrying out a Spatial Plan that takes in what we already have and how do we develop them first. I haven't seen any business plan around if it will be self sustainable, or will we as ratepayers have to continually pay for the ongoing costs of maintenance and the running of the space. I feel it is all a bit rushed and not totally thought out. Parking, Access, will it attract national tournaments, who will run the space, etc etc

What else?

Submission for Long Term Plan

There has been talk around that Waitara is the poor cousin of New Plymouth. I have never thought that I always looked at Waitara being the Fortunate Cousin being only 10 miles away we get the best of both worlds being close to New Plymouth's shining Jewels. Walkway, Windward, Yarrows Stadium, Pukekura Park, Womad, Festival of the Arts. I was there when these Jewels were not so shiny, but with vision and determination and a bit of Brasso/Cash they are glowing and something to be enormously proud of. I was managing the Most FM in 2003 when I was approached by Roger King and David Innes to see if the Most FM would be interested in supporting a thing called Womad, we were the only Local Radio station to support in the first two Womad's. So I have been part of New Plymouth's transformation. And I as a Waitara rate payer have never grumbled about my rates going towards the polishing of these Jewels within the New Plymouth role.

What I am here to ask our Mayor Councilors and New Plymouth ratepayers is to share some of your brasso to polish some of Waitara Jewels My submission is based on two things Needs and Wants: For Waitara I ask that our Needs are looked after as well as a few wants:

NEEDS: The Waitara Storm Water needs to be followed through; I see it is to start this year if it stays on the LTP. It is the 21st century and everyone who lives in a town deserves to have kerb and channeling. We have some exciting housing developments happening and about to happen in the town, but they all sit on high ground and their runoff will impact negatively if the older part of the town. These district rate payers have been very patient. I ask that the Waitara Storm Water project stays in the LTP. The Waitara Library upgrade or renewal, Waitara was in line for an upgrade or renewal as the first Library in the district to have this, and that now sits at year 11, I would ask that this project for Waitara is brought back in at year 4 and not year 11. Libraries have always been an important hub for any community. A Library caters for everyone in its community, it is a safe place for children and adults alike. Libraries, Library Programs in the Holidays, Children's activities, Cool stuff for teens, Heritage and Culture and Community Events. Te Ara Whakamua O Waitara would like to partner with Council and attach our Community information centre and an Arts Centre to this space. Research has shown how a Community greatly benefits from combining these assets.

WANTS: Marine Park Waitara This is a partnership with NPDC, Te Kauwhatu Tu Moana, Te Ara Whakamua O Waitara and the Waitara Community. I am asking the Mayor and Councilors to support and sign off on stage 1 of the re-development of Marine Park Waitara at no real cost to the ratepayer, when this arrives at their desk.

NPDC's Draft 10 Year Plan

Office Use Only: 6594

Submission No: 2627

John McLean

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I live in Fitzroy, an old part of town At times our water stinks and has a foul taste. Our house is only seven years old so our pipework is not at fault. It's time to upgrade the water supply system. The NPDC also needs to find out how much leakage there is in the network that they don't know about.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I don't have a problem with meters if they are needed. How about more storage. A hell of a lot of water flows out to sea each year. Does NPDC have any knowledge of how much water is currently leaking from the existing network?

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

The introduction of electric vehicles may take a while to play out. A lot of unanswered questions re cost and battery life etc. Nice to have basket.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The Sportsville hub in the Hutt valley is leaking money. It is used by 6 sports, the 2013 membership was 1990. By 2020 this had dropped to 1040. Team sport is in decline. What would be the cost to run a sports hub. Who would bear the brunt of the cost. The inside racecourse area is very exposed to outdoor sports. Rugby park complex is underused. There is room to put another indoor Stadium close to the existing one.

What else?

What are Councils long term plan for the outdoor pool at Todd Energy Aquatic Centre. The maintenance being done appears to be the bare minimum to keep it operating. The complex is starting to look a bit tired. This is a great facility and we wouldn't want to see the outdoor pool turned into a carpark as was shown on a plan floating around a couple of years ago would we.

Office Use Only: 6601

Submission No: 2628

Erin McDaid

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

I believe that money needs to be spent to upgrade infrastructure to a point where the system will provide a reliable water supply. In my and my husband's particular case we purchased a section in Waiwhakaiho in 2019. Built into the section price was the cost of providing the subdivisional infrastructure PLUS substantial development levies required for every new housing unit, so we have already paid a large contribution to upgrading the water supply. This is in contrast to those who have purchased an existing house in older areas and would have contributed little to infrastructure upgrade. If we get a 12% rate rise we are unfairly paying more than our share.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

I fully support the introduction of water meters PROVIDED that water restrictions end, which should be possible due to the large water usage savings which will be made within a user pays environment. I have seen this happen in other areas that I have lived in and where water meters have been introduced.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

With the proposed 12% rate rise, which many ratepayers, particularly those on a fixed income will not be able to afford, stick to the basics. In our case we are on NZ super married rate and this income alone precludes us from obtaining a rates rebate.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

It is nice that Council can afford to upgrade its car fleet to electric cars, however to make a real difference, cheaper electric cars need to be available to the masses. I acknowledge this is beyond Council control.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

See comments under greening our place. Less of the grandiose schemes and more of the basics

Steve Venables

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Education is the key. Not finding new ways to charge people. We are in, and will move into more challenging economic times. We must be mindful of the financial status of our community. Adding meters is a big cost. Increasing subtle and continued education is key to a sustained successful change. people want to do better. Don't make them pay

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Option 2 is really important, current and future generations will thank us!! we must include Waitara and better connect with them as part of our connected community. This should extend to Oakura where possible too. This make it a destination activity like the Traverse walk

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

lets control what we can control, and not invest/or waste money on virtual singling activities. Lets get out water right. lets changes cars as it becomes more economically appropriate.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Include the aquatic centre. The 50m outdoor facility is an outstanding facility, and in particular it's iconic architecture. Lets ensure we maintain well what we have.

What else?

Nice plan. I'm conscious we can't do everything, but primarily focus on the core activities we elect you to ensure are safe, working and reliable. We can see the mess other councils have created around the country. lets get the BASICS right!!! then focus on the premium initiatives, like the sports hub, walkway etc. Thanks for the opportunity to participate.

NPDC's Draft 10 Year Plan

Office Use Only: 6606

Submission No: 2631

Simon Cayley

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Our approach to the water network should be over a 100 year horizon to prevent a return to the underinvestment which has created the current issue. The approach should also and take into account projected climate change data such as <https://www.mfe.govt.nz/climate-change/likely-impacts-of-climate-change/how-could-climate-change-affect-my-region/taranaki#:~:text=Compared%20to%201995%2C%20temperatures%20are,rare%20in%20Taranaki%20by%202090>. While Taranaki is projected to get warmer, its winter rainfall is projected to also get higher. This means improving our ability and capacity to effectively store water is an essential part of this strategy and should be included in the budget.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters are not required to address the issue at hand and will also cause more problems than they solve. Taranaki actually has enough water and climate projections indicate we will get more, especially across winter months in future. Being better able to store a higher quantity of water for longer periods is a much more future proofed approach than water meters. Families are also being burdened with this cost even though industrial water use is a significant cause of the pressure on the system. Introducing water meters will have a range of negative consequences including: 1. Increasing pressure on low income households with significant potential impact on wellbeing of children as parents worry about water usage for cleaning, washing, cooking etc 2. Creating a major disincentive for people seeking to grow their own fruit and vegetables due to the cost of watering. This is not a consequence we should tolerate as we continue to encourage people to grow more and more food on their own properties. 3. Compromising recycling initiatives as people are more reluctant to use water to thoroughly rinse their recycling due to the cost. Water meters also commercialise the provision of a key life asset that should be available to everyone.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Will the budget also ensure comprehensive trapping programmes within the newly planted reserves to ensure these areas become safe havens for increasing our biodiversity and contribute to the regional efforts towards pest eradication? Will partnerships with Sustainable Taranaki and Wild for Taranaki inform the planting programme?

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

It is time for the region to accept that the sports favored by older generations such as horse racing, bowls, rugby and golf no longer carry the sway they once did and we need to accept that the far wider array of sports engaging our young people need to be given the same level of precedence. Maintaining a vast race track for the sakes of a handful of horse racing meetings each year is no longer justifiable, neither is investing vast sums of money maintaining a massive asset dedicated to rugby with little focus on its multi-use potential. The multi-sport hub is a way to acknowledge these changes and deserves to be supported and developed.

NPDC's Draft 10 Year Plan

Office Use Only: 6607

Submission No: 2632

Jacqui Heal

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

In favour of water meters to curb the wastage, but concerned about members of the community less able to pay and want to be sure that they will have access to fresh water for basic needs

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I would like to see improvement in indoor facilities for such as volleyball, badminton and basketball without them having to fight over bookings, but with the water infrastructure needing upgrade and taking priority the full spend of option 2 is unnecessary at this time or could be spread over a longer period.

Comments

After listening to the Mayor blame all previous councils for not investing in the water networks, it dawned on me that it is their second term & they are as much to blame as anybody else.

Saving water and water meters

Comments

It is possible to introduce a water saving plan without installing meters. Interesting how carefully the options are worded to get the desired results.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

needs fixing, do it. It's a core duty

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Do nothing at this time. Do it later & explore some sort of private partnership. Unfortunately we have been told we need to tighten our belts, after the last 12 months, with Covid 19 having such an impact. My business had a significantly worse year in 2020/21 so I need to spend less, but you seem to have decided you can spend more.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Surely a central government issue. I'm surprised there hasn't been any leaked emails suggesting the Mayor wants to subdivide the land between hickford park & Te Rewa Rewa bridge.

Developing a multi-sport hub

Comments

Sounds like a good idea, but not sure we can afford it

What else?

I know the Mayor doesn't want cars in the CBD, but many people need to drive to get places. My business is in the CBD & as a destination business people are wanting to park close to my shop & often have to carry heavy boxes with them. Don't make it any harder than you already have by making it illegal for them to stop at loading zones.

NPDC's Draft 10 Year Plan

Office Use Only: 6617

Submission No: 2636

Rachel Law

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Please apply maximum appropriate cost recovery from developers. Additional upstream development must have the biggest impact on sewage system both new and existing as well as place greater tolls on existing water supplies. Developers must pay for current and future issues that the new properties add to the city. There is clearly money in development so they should pay for their future impact. Additional green spaces/green paths should be added to all new areas under development to reach our targets for a sustainable lifestyle capital :)

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

As long as the water meter charges replace the existing one charge for all (not having both) in the rates I am happy to support water meter options. It should definitely be a user pays equation

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

In regard to proposed coastal tracks. Please take in to account all coastal ecological principles and traditional Maori principles for the land, sea and species. Some of us dream of having the lost coastal species including sea birds lizards and plant species back in abundance along our coastal area with these species taking priority over human activities at the coast. Please make sure these aspirations are not impossible to achieve. Thanks

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Make use of what we have! Do not build another! There are more important projects that this money should be put toward.

NPDC's Draft 10 Year Plan

Office Use Only: 6621

Submission No: 2639

Jacqui Jones

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

People knew the risks of building there. The storm water management shouldn't have been inadequate.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

I wish to express my support for the submission that Western Institute of Technology at Taranaki (WITT) made to NPDC's 10-Year Plan, in April 2021.

NPDC's Draft 10 Year Plan

Office Use Only: 6622

Submission No: 2640

Philip Cassidy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

No to water meters Water meters are a red herring; the key issue for many ratepayers is whither, why and by whom has the depreciation funding which has been levied for many years been "redirected"? We still don't have satisfactory answers from the Council. Unless we deal with mismanagement there is no assurance additional resources will achieve anything. I am convinced the appointment of Commissioners is now essential to sort out the mess we find ourselves in.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Meters are a "knee-jerk reaction" to the water conservation issue Do you punish people, or do you educate and involve them in understanding the issue. Installing water meters at households across the city would hit lower income residents hard. If you've got a bigger, older house with more people in it, it might be crowded, you're going to end up paying much more for water than a house that is modern, energy efficient and which tends to be owned by wealthier people NO TO WATER METERS

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Taranaki residents are already paying for the Rugby Part upgrade...again. No need to build a multi-sport hub. Taranaki offers plenty of sporting venues to play sport in or at.

What else?

Respect & listen to the people

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I think its very important to have good, clean water, something that we probably don't appreciate as much as we should. Definitely need to future proof.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

the sooner it is built the better, I believe it will bring money into Taranaki as sports events take place bringing in parents and children from all over new Zealand. spending money in new Plymouth...

What else?

I don't want to spend more money on rates but I think that all the proposals make a lot of sense. I think council could save a lot of money through stopping colour printing of leaflets. black and white printing would save money, its the little things that add up. Also they print way too many of them...

NPDC's Draft 10 Year Plan

Office Use Only: 6634

Submission No: 2649

Urs

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Spending \$248m on plumbing but only \$3.15m on the Climate Action Framework (OPTION 2) is disproportionate. Yes, fixing the plumbing works towards resilience and long-term intergenerational equity (and indeed long-term financial savings). Why are we not matching our plumbing efforts with adequate funding for climate change mitigation and adaptation?

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I oppose water meters as a solution to preserving water. The right to water is a human right. I disagree that a regressive charge should be applied on water. Should a low-wage single-mum pay the same as a millionaire CEO? The idea that the working poor should have to budget whether they can afford to run the washing machine or have a drink of water is abhorrent. Water is a community taonga and should be made available free of charge to everyone. Metering is a usual first step towards involving the private sector in the management and distribution of water. The potential profits available to businesses managing household water supply are huge. Whether publicly or privately managed, a user-pays system is unfair. People on low incomes or with large families are disproportionately affected by charging for water. On top of this people have no choice but to use water – consumers can't shop around for an alternative. Water is a public good and a human right. Its supply should not be left to the whims of the market. Access to sufficient quantities of clean water is the most basic of public health measures and something that benefits us all.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

I support OPTION 3 under the proviso that the focus of the project shifts from a solely recreational outlook to also address the need for active transport as a means to commute, to get to school and work as we rebuild our transport active and public transport networks. The cultural aspects of any access in the National Park should be considered: the positions of mana whenua should taken into account in this, via active involvement.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

I strongly recommend significantly more resources be allocated to the roll-out of the Climate Action Framework and encourage Council to be significantly more transformational in its long term vision and ambitions in this space.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I want to council to focus on climate change and transport - including active and particularly public transport - rather than a sports hub. I support the track and trails which is already mostly going towards recreation. So another recreational project seems badly timed.

What else?

CLIMATE CHANGE - focus on that. For future generations!

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I do support new of tacks and trails if data can be provided that they will get high utilization. I don't support the extension of the walkway to Waitara

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Infrastructure funding for the Patterson road new development/residential area as identified in the Proposed district plan and also possibly the wider Waimea valley sewer extension needs to be brought forward from year 7 in the LTP to year 1 or 2 of the LTP. Housing is one of the major issues facing New Zealand today and the New Plymouth district is no exception. The number one issue around shortage of Houses and affordability is the lack of availability and supply of land. Building of new houses not only provide new builds but also frees up existing stock for potential buyers at all levels of the market. Section prices have increased dramatically in New Plymouth over the last year and this is solely down to lack of supply. The current focus on infill and intensification of the current urban areas is not a solution. Simply by reducing the minimum allowable lot size in the current urban area and then hoping that people will subdivide their backyards is not a plan but wishful thinking. No one can give a definitive number on how many sections this may yield and larger sections that are available to subdivide are becoming fewer and fewer as time goes by. The funding for the council led Patterson road infrastructure and also the wider Waimea valley sewer extension is 100% paid for and recovered by developers through development contributions as per the DC policy. The funding of this infrastructure will not add one cent to the rate bill of any New Plymouth rate payer. The acceleration of this council led infrastructure can only benefit the wider community through more available land supply for housing, creation of walkways and cycle paths, which in turn creates connectivity and reduces the amount of vehicles on the road, also access to natural features that exist in this area (lake, protected native bush areas) and also continue to keep the building industry busy and hundreds employed with the building of new homes. We have a critical shortage of residential land available, New section supply is required now, not in 7-10 years and this needs to be a priority, housing is an absolute necessity. Funding for the council led infrastructure to allow development to occur needs to be brought forward to year 1-2 of the LTP.

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

I support the WITT plan to deliver a notable service in tertiary education to the Taranaki region. The plan for infrastructure development is significant and will act to draw students out of the region to this place to attend our tertiary institution. It will also give our people the opportunity to gain highly regarded qualifications and skill sets; some of which we will benefit from as they stay in the region. The WITT plan is bold and ambitious but timely and the most significant investment we can make in our young people. It will also provide a dynamic and responsive workplace for people living in the region.

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The submission by Meghan Gundeson is endorsed by me- our greenspace at the racecourse as it is being used at present is a timeless asset to New Plymouth- I am not against a multi sport hub , but not in that space - please listen to the people-

NPDC's Draft 10 Year Plan

Submission No: 2656

Graeme Alldridge

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I note that the future of the 'racecourse land' is up for consultation again.

My opinion is that the draft proposal lacks imagination, and that overused modern word – vision. Should it happen, the city will owe you a debt of gratitude which I don't suppose they will ever acknowledge or even recall.

The Council has a chance to build something really special, a facility which the city could be proud of, but instead has drafted a piece-meal design consisting of planting a few sports fields in and around existing out-dated structures. Surely the Council should develop an overall idealistic concept, regardless of the ultimate cost, and then work towards it as funds become available.

The horse aspect must go, and should be faced now to prevent its impedance of an over-arching design. Human sports and related activities are incompatible with horse racing and to continue to deny this is ludicrous.

The Stratford racecourse is ready, willing and able to cater for all of Taranaki's (New Plymouth's) racing functions on what is a superior course. The SRC continues as a going concern, having at the present, more than \$100,000 in cash and \$40,000 receivable debts, operating on

NPDC's Draft 10 Year Plan

Greg

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Bite the bullet and do as much as we can with the available capacity

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Fix leaks in network asap then see what actual household use is

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Needs to be done

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This can wait until infrastructure is fixed

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electric vehicles are expensive and it takes approximately 100000kms to catch up to petrol vehicles. Also the cobalt used in batteries is mined by child labour. Would suggest waiting . Good idea to plant the trees though

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Agree it needs to be done correctly

What else?

Plan has some great ideas. One thing I have not seen is any suggestions to secure water supply in the event of volcanic eruption. Is it in another plan ie civil defence

NPDC's Draft 10 Year Plan

Barb Viner

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Please make some horse friendly!

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The NPDC survey fails to include an option whereby a multi-sport hub is built in another location. That is my preference. We do not want to lose this iconic, green, open 'lifestyle' space in the middle of NP city. Sports hubs can be built anywhere. Once green space in a city is gone, it is gone forever.

The racecourse site has a myriad of problems:

1. It allows no expansion for sports in the future.
2. Additional traffic onto Coronation Avenue and the one-way system will be significant. Exiting right-turning 'hub' visitors from either Saddle Row or Rogan Street will take risks in front of logging trucks, and road accidents are likely. Will the ratepayer face another increase for substantial roading changes? Do we want another Waiwhakaiho netball courts bottle neck on the local streets?
3. Lighting towers at the hub will bathe the local area in daylight until 9.30pm weekdays. Local residents will suffer and it is unsightly. Has the effect on Pukekura Park's birdlife been considered?

4. Covering 2/3rds of the racecourse in artificial turf will create a water dam. Drainage infrastructure improvements made after the 1993 flood and landslide but sealing the Playing Oval surface was not anticipated then. It is most unlikely the 1993 improvements will be sufficient to handle the vast increase in water catchment that will result from the hub.
5. The current cost is estimated to be \$91 million. No detailed plans have yet been made for roading alterations or significant drainage improvements. They are under investigation. Once known, the cost will then be added to the existing \$91m. NZTA may contribute to any Coronation Avenue upgrades but how much, who knows?
6. The Long-Term Plan proposal doesn't say where the difference between NPDC's \$40m and the estimated cost of \$91m is coming from.
7. The proposed hub likely ends racehorse sport at NP. Racing contributes \$25million annually to the local economy. Taranaki racehorses, sports horses, and their riders are winners throughout New Zealand. And horses translate to jobs – riders, trainers, stable-hands, coaches, vets, farriers, feed stores, riding schools, fencers, arena and stable builders, fertiliser and spray applicators.

The list goes on.

Is a multisport hub at the racecourse, with its likely additional traffic and drainage costs, the best use of \$40m plus of ratepayer funds? Do what is done in every other North Island city - build the hub between 4.5kms and 10kms from the CBD. Adopt a future thinking 'greenfields' plan on the northern outskirts of NP for the hub. Save the precious inner-city green space for young and old and for which NP is known and loved.

What else?

Please preserve and develop more horse friendly areas for the thousands of riders in Taranaki.

NPDC's Draft 10 Year Plan

Office Use Only: 6671

Submission No: 2660

Nicola Stevenson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Comments

None of these options are acceptable. Considering how much rain water we get in Taranaki why are you not giving us the option of NO water meters but spending the funding on better catchment and storage? Taranaki should NEVER have to pay for water. We just need to manage our vast amounts that fall out of the sky better.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Lets sort out the water issues first.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

No option for Yes to planting the trees, but lets have a look at Bio fuels while we wait for the cost of electric vehicles to come down? Bit of a No brainer don't you think?

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Once again, not enough options! There is only so much funding we can afford. Water and plumbing should be our limit and our priority. Why do we have to fund this at all? Shouldn't Sport Taranaki or the different codes be organising and funding this?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Essential for a first world country.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

I've lived in many drier regions than NP. Ridiculous that we should have ANY issues at all.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is a "nice to have" vanity. Not essential. Costs HAVE to be cut somehow.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Nice to have but simply too expensive for ratepayers when we all know it will make ZERO difference to climate.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Another vanity project just simply too expensive for ratepayers to handle at this time. Nice to have but Council needs to stick to the essentials, like fixing our plumbing.

What else?

Proposed rates increases are preposterous. Especially as a retiree come to live in NP, it is simply ludicrous to contemplate such massive rates increases.

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

I would like to commend that Council for its amazing services it provides in terms of Parks and the Art Gallery. I am also supportive of the Sports Hub.

I would like to see the Govett-Brewster Art Gallery/Len Lye Centre funded in a supportive way so that the Institution can continue to thrive. It is a huge asset to this city. For me it was a big factor in moving to this province 12 years ago. The Mayor has recently mentioned running the Gallery 6 days week. The huge frustration this caused in the past (when this cost cutting measure was implemented) for out of town visitors and the difficulty communicating the change is not worth the savings NPDC would make from people who are on the living wage. It's a terrible idea! I would also like to add that I believe NPDC should fund a Regional Arts Organisation for Taranaki. Other regions in New Zealand have done this and it has really boosted the Arts scene in those areas. Waikato for example. By supporting our Arts, Creative and Culture sector, we're building a stronger, smarter and more resilient community and economy. There is plenty of talent here but it's unusually disjointed and needs co-ordinating and unification. Keep up the great work though Council! Thank you.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

I wish to emphasize that the extra increase on rates for the water improvements and proposed water meters should be user targeted for receivers of New Plymouth water supply only. I am a rural resident of the NPDC District and I pay for my own water supply. I have already paid out \$3000 this year on a new water tank and I need to buy a new water pump soon, another \$2000. If I run out of water in the summer, I have to pay for a tanker load. That is only for the house supply. Another pump feeds the farm, which I also have to pay repairs and maintenance for. There is absolutely NO WAY that I or any other rural residents should have to pay for improvements and meters for someone else's water supply.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Install water meters at property owners cost. That might make the water wasters think twice about using too much. Some residents on the outskirts of the city already have meters, this will make it fairer for everyone.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Comments

Delay electrifying fleet as disposal of the batteries is going to be an massive environmental problem. Hydrogen power is the clean solution.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Developing a multi-sport hub will take events away from the smaller Taranaki towns which already have great facilities. A multi-sports hub would also create a significant parking problem.

NPDC's Draft 10 Year Plan

Office Use Only: 6706

Submission No: 2675

Louise

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Focus on what is important, arts and crafts need to take backstage. Bringing people to NP is great business but this money does not go to the working class, it may supply some jobs but mostly it does not out way the amount you are taxing them in ever increasing rates. Learn to live in your means, a great council is one that saves its people's money and reducing their rates in years to come.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Put meters on businesses you can tell which are the high user area, start with those, and the ones that use water in their process. Learn to live in your means, a great council is one that saves its people's money and reducing their rates in years to come.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

This has always been an issue, not an unforeseen issue, which means you should have been dealing with this every year. One would hope you have been slowly improving it each time an issue came up, or it would be considered insane to be doing the same thing each year. You say this is the first part, \$20 mill and then another \$20 mil would it not be cheaper to move parts of the town to higher ground? I want to say no money on this, but you should have been making improvements each year. Do we have a council of project managers, cause that is all you seem to be interested in big sweeping projects - instead of slow and steady!!!

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Give it a rest for a year or two, we have enough to attract visitors until things get back to norm. If every council is rolling lots of money out to attract visitors, it will then cancel each other's efforts out! This will not attract more visitors over the next year or two. Stay the same for now, we will still attract the same 'Bubble' visitors as they will be doing the rounds. Think of the locals that have had an extremely heavy two years, and extra bill is the last thing they need, when we already have so much!! Reduce spending!!

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Planting lots of trees is wonderful, and everyone is doing it, get more inventive! The council's fleet of car's are fit for purpose, and just a weak token gesture to climate change and more a look-at-me status moment for NP Council staff.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Big hubs are not sustainable, massive up-keep and look dated very quickly, imaging how empty it would have been over the last few of years. We had a few events buildings in the past, one where spotlight stands, and NP council was not interested in helping with the upkeep. More med/small is better, nestle them. Think outside of the square and look at what we have and how they can work together better and build on that.

What else?

I see some interesting ideas, but NP City Council works for the people and most of the people do not have endless amounts of money, most do not even get over 1% pay increase a year. Asking for his rates increase shows you have lost a grip on what is going on around you, what the people who live here really need and what we can really afford. As I get older, it is a dream my bills will get less, but now if you guys are still running the show, that is never going to happen. There is no endless supply of money, you are not here to make money out of what the rates pay for and then keep ask for more money for the upkeep, make it work, work in your means. Help the climate by reducing your footprint, use & reuse what we have, stop your executive spending, get smarter with how you are doing things, stop hiring consultants. Lastly stop being a massive consumer, new buildings are extremely bad for the climate and wasteful in materials, replacing the fleet of cars is just another example of your excessive consumerism.

NPDC's Draft 10 Year Plan

Office Use Only: 6708

Submission No: 2676

Matthew Stuck

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Fixing the water infrastructure in the district is crucial in ensuring the long term security and supply to the residents.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

hopefully your employing apprentices or cadets directly to reduce future costs

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

just maintain what we have, there is only limited need .we just don't need to make every fitness fanatic happy. keep the majority happy not your usual fanatic whinges . its time to say NO to every want demanded

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

be careful who u put in charge or on committees. I am not happy people representing npdc who have practiced and trained to bring down the govt , even if they got off charges on the technicality of practicing terror tactics on private land. I am referring to Emily Bailey TRC and her partner Urs Signor? both practiced with weapons and explosives in the past , you are playing with fire . don't be fooled by wokism and hidden adgenders.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

yes do it sooner ,this project is really needed for the region. Be Bold and don't worry about the corrupt racing club. and don't forget parking , u should develop a large bus lane and car parking on the under used corner and land opposite Boys High

What else?

Develop a large Parking area and a bus lane opposite boys high on our under utilised corner of race track land. Coronation Ave is very busy and the Logging industry contributes to many dangers for parents dropping off , as parking is limited and restrictive. It would also be of benefit to growth of the polytech, as well as the future needs of the Sports Hub

NPDC's Draft 10 Year Plan

Office Use Only: 6723

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Plumbing is an essential service and needs seeing to

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters is just another way to increase rates

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Money needs to be spent on essential services and unless the council has the money (without increasing rates) it shouldn't be spent. The walking trails are already amazing in Taranaki and this huge spend isn't a necessity.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

There's plenty of planting going on elsewhere and I don't see why we should have to pay extra for this. Take the bus!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I'm very disappointed in this council overall the proposed spending is ridiculous. What happened to user pays, I absolutely don't support you spending MY money in this manner. If you don't have it don't spend it. A 12% rates rise is simply not affordable for many people and you will be forcing people from their homes.

What else?

As I said earlier, I cannot fathom how you think rate payers will swallow the bitter pill of a 12 per cent rates increase. Absolutely you must maintain and improve essential services such as sewage water and roads but I simply won't support spending on sports facilities etc. I can see if these things go ahead I will be voting you all out and imagine the rest of New Plymouth will too.

NPDC's Draft 10 Year Plan

Office Use Only: 6725

Submission No: 2685

Eileen Murphy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Infrastructure with a burgeoning population is an ongoing necessity. The ball as you say should never have been dropped.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

I'm happy for New Plymouth to have water meters. Hopefully it will stop those people who water the concrete in summer.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Option 2 is enough. Your intention to raise rates to cover so many things is going to cripple many ratepayers. We are not a bottomless pit of money .

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This needs to be used pays funded. Perhaps those ratepayers who will benefit from this can opt in to pay for it. It will be of no benefit to me personally so no I dont wish to pay for it. Again making rate rises unmanageable for many.

What else?

You need to be more prudent with your spending at the expense of ordinary people.

NPDC's Draft 10 Year Plan

Submission No: 2687

Tyla

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It's no secret that Urenui is in desperate need of upgrades. For the first time in my 30 odd years, I couldn't swim in the river. Our awa is a tonga and something needs to happen asap.

Saving water and water meters

Comments

Perhaps add water meters to new builds only and encourage water tanks on all new builds! When people know they only have a certain amount of water, they tend to be more conscious of their usage.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara absolutely needs an upgrade asap. It's been an ongoing issue for many years now and option 1 should not be an option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

While I would love to eventually see more tracks and trails, there are far more pressing matters that could do with \$36m over the next decade.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I would love to see a multi-sport hub built in New Plymouth but if Waitara can source \$6.5m from external funding, surely Sport Taranaki could work hard to do similar. I'm sure New Plymouth residents will be more than supportive of fundraising initiatives if it means they don't have a rate increase.

What else?

I love the idea of zero waste but the best way to achieve that is going to be by looking at what is available to buy, non-recyclable plastics, imported crap from China. I understand this is probably an issue that needs to happen a bit further up the food chain but the conversations need to be happening nevertheless.

NPDC's Draft 10 Year Plan

Office Use Only: 6752

Submission No: 2688

Peter Boisen

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

It seems like the main way to find out where the leakages in the system currently are, is the installation of meters. Charges for this should be on the basis of the first say 100cubes are free and then a minimal charge after that. Finding where leaks are and updating maintenance/replacement has to be the priority.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Not keen on electrification of vehicle fleet until we are very aware of the supply chain for the manufacture of batteries - ie the sustainability of the mining for the raw products and who does it as well as where do the old discarded batteries eventually end up.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We have Rugby park being rebuilt which is going to cost ratepayers. Don't like the fact that there seems to have been little action to combine sports at one location before the rugby park rebuild. Most sports have facilities now which are Council funded. What happens to them? Do we/they need the 'gold' standard?

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The access to water is a human right care must be taken to see that it remains so.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We do need to save water BUT I'm against water metres it will put a strain on already low income families and could result in very poor health outcomes. suggest the council fix all the leakages in the system.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

In the long term plan there is nothing for the development of any substantial walking or biking tracks in Inglewood seems to be an unequal share going to Oakura (much smaller number of residents) than Inglewood. Given that by 2030 1 in 5 people will be over 65 there seems to be no will to look out for that demographic in Inglewood as present the only walkways in the area are unsuitable for anyone with a disability.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

As mentioned the population 1 in 5 will be over 65 by 2030 there seems to be no mention in services for those people in your long term plan for Inglewood. There is also the reading problem it is getting more and more dangerous to even park on the roadside outside the shops as MANY MANY huge trucks blast through the town. We need more pedestrian crossings (raised) and or traffic lights it is really not ideal s the road cuts the town in half its difficult to get to the Libary on foot and the parking outside the library is no use to anyone with a disability given the huge slope on the parking spots. Every year i have requested that we need an aquarobics class in the summer with no results also the pool opening hours are limiting to older folk . I had hoped that when I retired I would be able to walk and bike around my town but it is impossible and dangerous for us older folk and our children, we cannot all afford to go to New Plymouth for our recreational activities and given the state of the roads its not a very nice trip anyway.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Taranaki has many tracks and trails. Let's look after what we have rather than develop new ones

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Massive improvements/upgrades need to be made. I don't want a massive rate increase to fund it though.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

As a low water user, I am not keen on meters. I do think high users should be charged though.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

We need a dog park, I am all for investment in our outdoor areas.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

To your Worship the Mayor and Councillors,

Thank you for the opportunity to offer into your Council Planning. I am an Auckland-based academic and Head of Elam Te Waka Toi, one of the country's leading art and design schools. It is in this capacity that I offer these remarks.

I would like strongly to encourage you to enable students at all levels of education to have free access to the Govett Brewster Art Gallery and Len Lye Centre, which are an integral part of your local economy and of the cultural life of the whole country. As you know, they form an internationally celebrated and significant centre for the presentation of the very best of contemporary and modern New Zealand art.

The Director and curators have an outstanding reputation for innovation and excellence that is richly deserved. The value of their and your contribution to the creative, artistic and intellectual development of generations of students (from primary to tertiary) is considerable. The impact of that work is of even greater and more lasting value. What students encounter at the Govett Brewster Art Gallery and Len Lye Centre is of transformative to how they see themselves and their place in the world. The art shown there and the experiences students are able to have in galleries and in the outstanding education and learning opportunities teaches and inspires them to be game-changers in their chosen fields.

The inspiration they find in the wide range of art and activities they can engage in offers expansive and meaningful ways to develop into curious, searching and responsive adults, more thoroughly informed about the world they inhabit, more enabled to act with responsibility and imagination in that world. The educational and civic benefits of this are substantial, helping these young people to reflect on who they are, where they come from and what they want to make of their futures. These are powerful and important outcomes of their engagement the work of the staff of the Govett Brewster Art Gallery and Len Lye Centre.

It is my hope that all of us engaged in civic service will actively work to minimise the hurdles to these real and laudable outcomes for the betterment of the young people themselves but also to local and national communities - we all benefit from the open-mindedness, curiosity and the questions posed by the young. I have spent my entire life (child, youth, student, academic, director, trustee and citizen) in support of this idea and work daily with the reality of its effectiveness. Any barrier to supporting the young and their development as citizens is a barrier we should all actively seek to minimise or remove. It is with that firmly in mind that I strongly encourage you to ensure that students can have free access to the Govett Brewster Art Gallery and Len Lye Centre.

A Maori whakatauki is apposite: He toi whakairo, he mana tangata - where there is artistic excellence, there abides human dignity.

Many thanks for reading this feedback and considering this matter in your current work. Warm regards Peter Shand

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

No water meter!

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Most people dont need this. Current design is terrible.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Just hurry up and do it

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

No water meters. Just sort the broken pipes. You can do in line monitoring without spying on people.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Big problems should be sorted

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Nice to have, but only if the cash is there. Live within your means like the rest of us.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Live within our means and stop expensive virtue signaling.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Nice to have but only if you have the cash. Live within your means like the rest of us.

What else?

Council should be funding core infrastructure, but all other things, while sounding nice, are unaffordable. We all know councils like to leave a legacy, try solvency for once and spare us the massive bills for walks and stadiums that we can't afford.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Not so sold on the extension of the Coastal Walkway but believe the Taranaki Traverse should be developed further

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

It would be great to see a lot of that planting happening in the CBD. Let's revitalize the CBD with green spaces both in the center of town and also up the eastern end of Devon St. Make it a space that people want to come to and spent time at, buy their lunches from local stores and sit in these green spaces to enjoy it with friends.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

It's time for the racecourse to go completely. Racing is becoming less popular year on year, socially it has a reputation for drinking, gambling and questionable animal welfare. Let's replace it with a hub that can be used by many, encourages active lifestyles, aligns with the culture of our region.

What else?

Please let's look for ways to green up and revitalize the CBD, remove the racecourse and make the sports hub a priority. If rates are going to rise exponentially over the next few years let the increase go to the things people are actively asking for, especially the younger generations of the region as these are the people who will get the most out of them for many years to come.
