# NPDC's Draft 10 Year Plan

Office Use Only: 7185

**Submission No: 3101**

**Alan Crawford**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### ***Comments***

We have an abundance of water in Taranaki and will continue to have so with our mountain. make sure our supply is protected (environment, agriculture, manufacturing, farming) is controlled and infrastructure is maintained.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### ***Comments***

We are lucky we have an abundant water supply, one of the reasons we chose to live in Taranaki.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### ***Comments***

If this is what is needed to protect our natural resources get it done.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### ***Comments***

The walkway to Waitara will be a great asset, but how much it will benefit locals is debatable. This project can wait for better financial times. Maintain and improve the established tracks and trails that have been neglected as of late. Puakai Crossing and the proposed Taranaki Traverse can be a great tourist pull for the future.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### **Comments**

The established planting have become overgrown with trees planted to close together growing for light and not presenting any recreational benefits. future planting should be done with the idea of producing specimen trees that families can get shade and play under and on. Electrifying the NPDC fleet at this stage is a complete waste of money, until technology has come up with a fuel cell that is better environmentally and more cost efficient (hydrogen!) than petroleum. I hope NPDC has a good vehicle policy that they are not including company vehicles in salary packages. Most companies have stopped this with the fringe benefits tax being to expensive.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### **Comments**

Expensive but needed.

---

## What else?

Rates are a big burden on 80% of the populace of the region. Rates need to be kept under control. Once they've gone up they cant come down. 80% to 100% over ten years is a huge increase. Older residents are struggling and being forced out of their family home. When you stop earning there is not an endless stream of money. 'Nice to haves' take up over 30% of our rate take these need to be controlled sooner than later. the cycle of pruning trees on road sides and verges needs to be halved by pruning much harder each time. How much longer are we going to pay (\$6,000.00 X 10 Per annum, \$600,000.00 over ten years) for the straitening over Oakura Beach streams? The battle against the rising ocean will be a huge coast in the future. Be innovative, learn from examples overseas and create groins to actually improve Oakura Beach and stop the sand drift up the coast.

# NPDC's Draft 10 Year Plan

Office Use Only: 7190

**Submission No: 3102**

**Ainslee Taikoko**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 7193

**Submission No: 3103**

**Suzy Carswell**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

Funding towards events for the creative community in Taranaki would be hugely beneficial to all age groups in the community. The creative community has so much to offer in Taranaki, musicians, poets, artists, dancers and much more, encouraging connection, expression and communication. Events for the creative community act as a platform for us to share and expand our talents through ourselves and others.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 7196

**Catherine Cheung**

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

#### **Comments**

It is crucial that any repair, relocation or development of new water infrastructure is planned and implemented with thorough consideration of potential climate impacts, and to maximize resilience. In general, decentralised local systems are likely to be more flexible to local needs and provide self-sufficiency and resilience to the communities.

---

## Saving water and water meters

#### **Comments**

I don't believe the mandatory installation of water meters is necessarily the most effective in conserving water. I think a combination of the following should be considered instead: - Increase the price of water supplied to industrial users - Make the installation of water tanks and greywater reuse systems mandatory in new residential and commercial development areas - Roll out a substantial support program to subsidize/assist households and marae or other communities who want to install water tanks and/or greywater reuse systems, in addition to the current Sustainable Homes rate-based loan scheme

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Give more emphasis and investment to assist active transport for commuters, rather than mainly catering recreation and tourism.

---

## Boosting our Climate Action Framework

### *Comments*

The amount proposed to be allocated for the CAF is pitiful comparing with other areas of work, and considering the urgency to act in a climate emergency. Planting trees is good, but like the Climate Change Commission says, we can't plant our way out of this mess! We need real climate mitigation by cutting emissions. Council should invest in reducing its own emissions, notably transitioning off fossil fuels in its key infrastructure like the NP wastewater treatment plant, the Aquatic Centre, Len Lye Centre and Puke Ariki; with electricity and/or biofuel. Council should expand the Sustainable Homes program to support more homeowners as well as tenants and community initiatives.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

This is a luxury item at a time when huge spending is desperately required to deal with failing water infrastructure services and to climate mitigation and adaptation. What is the climate footprint of the multi-sports hub, including embedded carbon of the construction materials (notably artificial turf) and the carbon from energy consumption throughout its operation? There are plenty of sporting opportunity, including the trails and tracks that to be constructed, as well as other nature based activities, with valuable education opportunities like orientation, survival skills and ecology. There are far better, more environmentally friendly and socially inclusive, uses for the racecourse, such as community orchard and food growing hubs with training, education and market opportunities.

---

## What else?

On the Brooklands Zoo, I believe funding should be prioritised for education about Taonga species and wildlife rehabilitation, rather than upgrading or expanding the exotic animal collection.

On material recovery, investments should go into driving the industrial and commercial sectors into high levels of product stewardship, so that everything is returned to them rather than having to be dealt with using ratepayers' money.

On organic wastes, invest in household and community composting through education, giving away compost bins, bokashi and/or wormfarms, and funding community composting initiatives. For industrial food wastes, such as poultry, abattoir and dairy waste, conduct feasibility study on using them to produce bioenergy for electricity generation, process heat or transport fuel.

We cannot design climate action in isolation. We need to see everything with a climate lens and make every decision and every investment prudently, to mitigate and adapt to the changing climate; and to foster community wellbeing and resilience.

# NPDC's Draft 10 Year Plan

Office Use Only: 7205

**Submission No: 3106**

**Kirsty Jane McMurray**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Get it done before it becomes real problem.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Can you please link to the relevant page in the document in future.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Focus on infrastructure first. These are gravy.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

#### **Comments**

Do it somewhere else.

---

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Build it using sustainability principles. All water collected & used on site. No huge carpark as proposed; rather parking to suit public transport priority. All building materials sustainably sourced and NZ made as much as possible. Heating /lighting using smart sustainable materials eg solar panels & water collection on the large roof spaces. Community gardens on the green spaces. Its a chance to educate the community on taking Climate Change seriously, showcasing local sustainability principles and saving the NPDC dollars in the long term.

#### **Comments**

An additional recycled water pipe system should be added at the same time to supply high water use industries who don't require drinking quality water. Eg. Stadium, parks, market gardens, orchards, car washes, washdowns etc. Why spend all this money treating waste to a high standard to pump it out to sea.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

First 200litres/person/day should be free to help this who want to save. Then a high rate for excess use. Then people who wash cars, water lawns and gardens, have pools pay for this excess use without affecting the poor communities

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

#### **Comments**

Need a managed retreat plan for these low lying areas. Would much rather see the 20million spent moving houses to a permanent high ground.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

The planting price seems way to high for 17 hectares but definitely need to have council vehicles electric. Also need a short replacement window for these as new Zealand needs electric vehicles on the second hand market as new is out of reach of most individuals. We need companies to step up and get the cars here.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Like the idea of this but there is too much other demands on money currently with the water upgrading and climate change. Needs before wants.

---

## What else?

A new New Plymouth ring road is required to remove congestion from the one way system.

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

While I agree it needs to be fixed I would like to see the costs challenged at every step. This is a huge investment for the council and the people of New Plymouth and approval to go ahead should not be a blank check to spend the amount in the plan. I would also like the costs to be allocated as proposed i.e. water and waste water through targeted rates and storm water through general rates. This way is fair with user pays.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

I am not on council water but I agree NP residents use too much water. This expenditure should be targeted rates for users.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Needs to be fixed and general rates should be used but I question the need to spend \$20 million.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

The next 10 years will be challenging for the area with many residents losing their jobs with the ramping down of the oil and gas industry. The council needs to be prudent with its money and with the massive planned spend on the water projects other 'nice to have' projects need to be put on hold. We already have a fantastic system of tracks and trails and we don't need to extend them further at the moment.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

We already have enough green space. Focus on water. If you want more forest keep the existing trees at Lake Mangamahoe and turn it into a forest mountain biking park like the Red Woods at Rotorua.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Focus should be on fixing the water. We can not afford to do everything at once.

---

## What else?

I am very disappointed that the council is proposing such large rates increases when the long term effects of Covid19 are poorly understood and many residents will be losing their jobs as the oil and gas industry is closed down. I think you are severely underestimating the flow down effect this will have on New Plymouth and its residents. The focus should be on fixing the water and other projects should be put on hold. I am extremely concerned about the proposed rates rises for small holdings. In the last plan the council increased the small holdings differential which resulted in an increase in our general rates of over 30% over the period 2017 - 2021. The new 10 year has further massive increases despite small holding seeing far less benefit from most of the proposed changes than residential properties. Because of the way the rates are calculated small holding actually see a greater rates rise than residential properties every year of the 10 year plan. The current rating system, and the allocation of the proposed rates increases, is grossly unfair and I would ask the council to review the current rating system.

---

## Boosting our Climate Action Framework

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

I would LOVE to see New Plymouth use some of our gifted minds such as Jodi Roebuck who knows how to farm livestock and grow in a way that protects our land equips farmers to manage their farms regeneratively. He already gets farmers from around NZ doing his courses. I can't understand why Taranaki being one of the biggest dairy producers in the country isn't training our farmers. Instead they're criticised. It's not the cow it's the how. We could be leaders in this movement!!!

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

We can't keep putting up the rates, for some people it will come to expensive to live here soon, I think the NPDC will have to borrow the money to get the job done and done right & complete it, yes get into dept! remember we don't have a big population here!

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Maybe the NPDC needs to look at our water storage options, alot of water comes off that mountain why are we not storing more of it!! Another option is new builds have water storage tank included can do this under decks even (and Solar panels worth thinking about too!!)

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Leaving these things only makes it worse!!

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

I feel the NPDC needs to sort out and fix our infrastructure for the long term! Putting money into more walkways at this time is a low priority, a nice to have. A to do after fixing our infrastructure first then look at this!

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Again if we don't have the money on hand and the NPDC is having to increase our rates even more to do all these projects! Borrowing the money might be a better option than increasing the rates to do these projects!!

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Borrow the money to make this happen!!

---

## What else?

The NPDC cannot keep increasing our rates to do projects we require. Our infrastructure should be the first priority. We can't keep leaving these things and wait for them to break then do a quick fix. If you keep increasing rates people won't be able to afford to live! As it is your I sure some of your rate payers are struggling to survive! That is while I think borrowing the money now (especially with low increase rates!!) would be a good option. Maybe not all of what you need but enough so that you are not increasing the rates too much.

---

## Developing a multi-sport hub

### *Comments*

I do not think the current location is the preferred location for the sports hub a large unspoilt green area in the centre of town should be celebrated for just that. Why do we need to develop everything. Access to a large open green space in my neighbourhood is an amazing asset and was a life saver over COVID. This green space has been there for generations any development will increase the flooding risk to our street and home. I think the increased traffic will be a safety risk to people in the area in particular children leaving school all at the same time. I would suggest an alternative venue is considered that has access to better transport links including air and bus terminals and has considerable additional space to be increased in the future. I think the current location will be outgrown in a few years given population increases. I would support access to the area by shared public transport only or pedestrian this could be the only venue that has to be accessed by green public transport or cycle pedestrian access a leader in its field.

Charge people to use the tracks.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

#### **Comments**

Climate change has come about by there being too many humans on planet earth, somehow this needs to be addressed or nature will do it e.g. war, famine, pandemics etc.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Having an indoor sports hub building inside the horse racing track is ludicrous especially when there is available land next to the TSB stadium. Using the track inside area for sports playing fields is ok, BUT to have buildings and trees there in my mind utter stupidity, there are other win win options. Rugby Park should have been used for the multi-purpose sports hub, yet more incompetents by planners.

---

### **What else?**

Having the sports hub at the race track; is there enough vehicle parking, and what about sports day / race day clashing. For safety reasons we won't be able to have race meetings and sports events at the same time, I can see this causing extreme aggravation. No buildings in the inside of the race track.

# NPDC's Draft 10 Year Plan

**Submission No: 3130**

**Dianne Hekeua**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### Comments

We pay enough, water should be free only need education on how to save waters. Councils need to set the biggest example.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

### Comments

This is a shocking problem in Waitara. Council has been very slack in not addressing this problem earlier. Waitara is a beautiful place yet the council has neglected in for many years but still collect their rates etc. Make Waitara the best most beautiful, artistic regional area in NP. It is just waiting to get started. Please pull your finger out and show respect to the dollars NP has taken yet not done anything about fixing the place up. Check out the nature strips beside each resident - they are far to wide, no trees on them, yet the road signs eg GIVE WAY more often than not are situated in the middle of the grass strips!!! With narrow roads, nature strips wider than the roads and you expect the owners to maintain area yet not have any footpaths or guttering on the road verges???

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### Comments

Open up and include Waitara as part of NP regional area, not just take their money and ignore them as too hard...

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

If we dont do something about climate action we wont have a place to live in - shame

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Already plenty of sports sites - ultise these over new and flash.

---

## What else?

On Hutchins Street there is the old abandoned Health Annex. This is prime example of what could be done without too much work as plumbing etc already in place to improve the area along with the IWI owners. Start negotiations as this would be the perfect site for ADULT COMMUNITY/ARTS CENTRE with childcare alongside. Bring people to Waitara where their is so much to do and so many creative people needing to create art and teach their skills. Help and discuss with the local IWI and the Waitara ratepayers. Give something back towards something for all especially when the dollars have been taken from stolen land etc. The population needs help and deserves respect. Driving to NP is such a nightmare due to poor structure of the road system I wont drive into NP as far too dangerous. Willing to discuss this idea further.

# NPDC's Draft 10 Year Plan

Office Use Only: 7283

**Submission No: 3131**

**Christian Schmitz Hallen**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

### Comments

I'm confident that water meters will change people's awareness of using water sustainably. I'm also aware that opinions are very controversial with this topic as the council needs to invest a lot of money. I highly recommend water meters. E.g. a resident in my neighbourhood is running a taxi business and is washing his business vehicle(s) regularly which is completely understandable. But this resident is paying the same fee for water usage as other residents in similar houses? Other residents just ignore water restrictions during hot periods in summer but this could change significantly when water metres are introduced and people have to pay for it. People possibly switch off the water during shower/brushing teeth activities which side effect is a reduction of monthly power bills.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

### Comments

Improving stormwater management in Waitara is also a clear sign of valuing their residents as we're growing together with an increase of the population.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### Comments

Great idea can't wait to experience a Coastal Walkway between Waitara and New Plymouth. NPDC shouldn't promote this walkway as an extension. Just build a Coastal Walkway from Waitara to Bell Block that will connect Waitara residents with them in Bell Block and New Plymouth. Waitara always had and still has to deal with its reputation. I'm not a Waitara resident but these people deserve to feel more connected to the region. This long Coastal Walkway would also provide an alternative being used to commute to workplaces as the traffic on the roads is getting more. E-bikes would experience another boost and our environment would be very grateful.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### **Comments**

There's actually no limit to boost our CAF as it's so important. Please spend as much money you can to protect our nature.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### **Comments**

Developing a multi-sport hub sounds great for the region and will attract people to visit the Taranaki region too. Don't forget about existing sport facilities that would love to get regular updates.

---

## What else?

I'm a bit worried about the public transport system in New Plymouth or Taranaki in general which I think is really poor. I know Kiwis love their cars and its independence so do I. As a support worker for Idea Services I have to provide my own transport to get to my workplaces within shift work. But NPDC residents who are working in 9-5-jobs should have more options to leave their cars at home more often without investing too much extra time for commuting. NPDC could improve existing services in particular to/from outlying suburbs. E.g. the community in Bell Block is growing fast and there are many subdivisions around.

Each new built house is operating at least two vehicles as there are not many alternatives to use public transport. The next busstop from my home is a 15min-walk away, especially in bad weather not funny.

There's a very poor service on Saturdays and none on Sundays/Public holidays.

Furthermore the existing Waitara-New Plymouth-service could easily swing in to the airport to pick up/drop off flight passengers and it won't cost that much more. In case of any event in the city centre, there's no chance to get back home on public transport at night and especially young people can't afford to pay for a taxi out to Oakura, Bell Block or Waitara.

A "Night-Bus"-service on weekends could be very attractive for young people and possibly decrease drink-driving-issues. Surely the people have to get used to these kind of services and it won't be successful right from the beginning. An extra charge might be necessary for a night service but I'm confident customers will understand.

## Boosting our Climate Action Framework

### ***Comments***

Plant fast-growing exotics to more quickly capture carbon and turn a profit to the community from harvesting of logs. Defer any vehicle fleet electrification until either the cost of electric vehicles reduces significantly (to the cost of petrol/diesel vehicles) or central government provides significant subsidies for the purchase of electric vehicles.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Spend ratepayers' money on the necessities, especially the 'three waters' issues, first, before spending on friveries like a multi sports hub. For certain the development costs will exceed the \$40M, and the ongoing operating costs will exceed the projected \$1.1M per annum.

And if there is any such hub developed, do not locate it at the New Plymouth Racecourse. Contrary to the wish of central government, per its adoption of the Messara Report, situating a sports hub at the racecourse will eventually destroy the horse industry which has been located there for nearly 125 years.

Horses, especially racehorses, are dangerous, particularly to those unused to them - which would be the majority of those attending a sports hub. It will take just one tragedy for the sports users to seek to close down the horse industry operating at the racecourse. The horse industry generates millions of dollars for New Plymouth (estimates range from \$25M to \$35M per annum), via owners, trainers, jockeys, vets, farriers, feed suppliers, tack suppliers, the hospitality sector, to name just some of those involved.

School (and it would be mainly school) sports will not generate anything near that level of income to the District. The loss of green-space, the guarantee of increased traffic danger and parking congestion, the unsightliness of and light pollution from the inevitable floodlights, together with the stormwater drainage issues affecting the racecourse land, make the racecourse a very bad option as the location for a sports hub.

If there is to be a sports hub - which, as stated above, I do not think should be funded by New Plymouth ratepayers while the necessities such as water and waste remain inadequate - it should be located somewhere like the industrial area of Bell Block, which would have adequate infrastructure and a lesser set of issues as regards traffic, parking and suitability for building.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### *Comments*

We need to think outside the square with New Plymouth growing taking the Sports Hub further out of town ie the old airport where there is room to expand. More parking available for the multi sports that will be using this facility. The race course is too small to accommodate the large number of sports and parking/traffic. Don't let this green space go, under a concrete jungle.

---

## What else?

Look at Whanganui sports set up the area a lot larger than the racecourse. The old airport area only 10mins from the city 2 mins from airport. Leave the race course alone

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Until racing is out of there altogether I don't want a sports hub. In fighting with the organization is not cost efficient and will be a bad look.

---

### **What else?**

Of course I love our community and some of the reason is the work that has been done by successive councils over the years. There is a trend away from attending to the core business of the safety and well being of the citizens with services like sewage, water, roading transport etc. then looking at what money is left over from that to attend to the more esoteric. Gobbling up parking spaces on the pretext of a beautification programme was not one of the best moves. As a pensioner I will certainly take a hit on a huge rate increase which is way above the cost of living but if it is going to sort out real services then c'est la vie

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### **Comments**

Tree planting target is unambitious. Work with the community to plant more. Focus on restorative planting. Plant across all communities but particularly focus on lower socioeconomic areas that will otherwise suffer from the urban heat effect with climate change. Plant the areas you currently graze as this will reduce emissions from the animals and then reduce emissions overall. Electric cars are great, they will save costs in petrol, so maybe accelerate that funding for the first few years until the cost comes down. Reduce your fleet whenever possible through ebikes. Invest in solar panels on Council buildings. Electrify the pool heating systems and whatever else you can.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

The racecourse should be replaced with an extension of Pukekura Park native bush areas

---

### **What else?**

Two issues. Lack of work on housing. And lack of investment in smaller communities like Inglewood and Bell Block

**Submission No: 3143**

**Robyn Mary O'Leary**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

Please can NPDC look at investing in a Recycling Station in Urenui. Those of us who live rural have to drive to the other side of Waitara to get rid of our bottles/cans/unburnable rubbish. - and hours are varied and often not suitable for farming days. If our community is serious about the environment and you want us to recycle rubbish, please make it easy for us - or do we go back to the old days of digging holes on our farms? Surely this is a basic in the Climate Change rhetoric we are constantly hearing.

Also I'd be keen to see a campaign at local and wider levels to educate children about keeping NZ Green by not littering. The roadsides are full of rubbish - people don't seem to care anymore. I fill black rubbish sacks of bottles and plastic etc often just on Piko Road where I live. When it rains, the flooding soon washes the plastic etc into the Urenui River, then it travels to the ocean.

Can we please get the fundamental basics right, to help us sort our rubbish responsibly.

**Thelma Luxton**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

It is important that there is continual maintenance done beside repairs and upgrading. If maintenance is continual then it is easier to repair problems

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Water meters are a good start in water saving but storage certainly needs up grading.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

This is a real problem locally. With upgrades it will make life easier and the homes drier and safer.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Refurbish and maintain the existing sports buildings and grounds. Making them suitable for the purpose.

---

### **What else?**

Do regular maintenance on all structure and underground facilities as part of the annual review. If this had been done in previous years they would be fit for purpose.

# NPDC's Draft 10 Year Plan

Office Use Only: 7312

**Submission No: 3145**

**Lindsay Willis**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

This should be the councils main priority. Once we have this up to date then you can consider the nice to haves.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Water meters should be a priority to save people wasting water 🧐

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Another thing we can't put off any longer

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

This is a nice to have and can wait

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

New Plymouth already has more trees and green area's than most cities. We don't need council to have electric cars, that are too expensive for most ratepayers and don't have enough mileage capability.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

This is definitely a luxury we can't afford at the present time. A stadium would be nice but not where it is proposed. Parking and traffic congestion in that area would be terrible

---

---

## Improving stormwater management in Waitara

---

## Extending our tracks and trails network

---

## Boosting our Climate Action Framework

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Why has this been the only option. Hickford Park , Bell Block would be ideal. Additional traffic, this is a biggy, according to NZTA, 15,000 vehicles, use Coronation Ave in one day. Has any thought been made to the traffic infrastructure. \$91millions why should I have to pay the short fall, it's bad enough that I'm paying for the while elephant "yarrows Stadium". Multi sports, it's only catering for a few sports. We already have hockey grounds. What is happening with the Pony Club? You appear to be giving to some and taking from other sports. What is going to happen to the big events like Womad. I think you need to go back to the drawing board.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 7314

**Submission No: 3147**

**Graeme Lindup**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

This is not the main priority for the district but something that should be worked on continuously.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

Reducing the District's the emissions is the most important issue facing us and reducing the transport component of that is something the Council can have a direct input into. So giving the majority of people greater options for active transport is vital for us, our children and grandchildren. Doing nothing is not an option! The Council's existing Cycling Strategy needs to be updated for the 2020's and then an Action Plan set up to implement the Strategy and the Council should be reporting on progress each year on each of its Strategy's to the ratepayers.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

#### **Comments**

There should be an active encouragement programme to get the District to behave more consciously about reducing all our carbon footprints.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Get rid of the racecourse and look to alter the use of the space for a more European style of living with economic housing, parks and spaces where there people including children are the priority, active travel allowed for and vehicles tertiary in priority.

---

### **What else?**

Urenui needs to be moved away from the use of septic tanks for each house and a scheme developed that looks after their waste in an environmental manner. Update your Active Transport Strategies and get plans in place to implement them and then report to us on how you are doing each year.

# NPDC's Draft 10 Year Plan

Office Use Only: 7315

**Submission No: 3148**

**Nick Jorgensen**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

Use the sport facilities that are already paid for by ratepayers.

---

## What else?

Stop removing perfectly good car parks and fix the Balls up on Gill Street. The car parks are too short for most cars now days and stick out too far try driving a service vehicle between them. Have the bin checkers check the council building's recycling bins because they are terrible and should be setting an example. The rate rise is far too much for most.

# NPDC's Draft 10 Year Plan

Office Use Only: 7318

**Submission No: 3149**

**Lindsay Toole**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Water meters need to be introduced. Its simple --user pays! Also look at new builds and make them put in a tank for roof water to be used for gardens etc. Storm water and waste water is your basic things that the council should be providing for everyone without breakdowns or overflows.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

See previous

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Walkways and tracks should be there for the physical wellbeing of everyone

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Taranaki needs to get a multi sport hub underway as soon as possible. Once again for the wellbeing of citizens. The closer to town the easier it is to get kids interested in the various sports. Take a look at Saxton Field in Nelson as an example of having all sports at one venue. Down there it works extremely well. As for the racetrack move it to Stratford or Hawera and use the extra space for the sports you are bringing in to the multisport hub.

#### **Comments**

It appears to be a problem right accross NZ where water infrastructure is not maintained to a sustainable level. It's not good enough for such an essential part of our cities services to be interrupted due to lack of maintenance and hope a clear plan is put in place to ensure continuity of this essential service exists for the peace of mind of all who reside here.

---

## Saving water and water meters

#### **Comments**

I don't feel having 3 options including water meters vs a 'do nothing' options is appropriate. You have intimated that only a 1/3 of respondents voted for water meters. Is there any evidence that introducing water meters will reduce water usage? The affluent will continue to use what they want and pay for it, but what about those at the lower end of the socio economic scale, who are only making ends meet. What will an additional cost mean to them? Have you considered encouraging home owners to instal water tanks to make use of water that would otherwise be wasted?

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Must be done, no community deserves to be living in fear of flooding where inadequate wastewater systems can't cope wit weather conditions

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Other infrastructure needs should have higher priority

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### *Comments*

I feel we need to support our young people to develop and that they have the facilities they need. They are our future and we should support them where we can. However, again, I emphasize the infrastructure projects that support Safety, Health and Wellbeing of our citizens should always take highest priority.

---

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

Only people who are connected to the water mains should be paying Those who have there own private water supply should not have rates increased

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

water meters only to be used to charge over excessive water use

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Local waitara groups should help pay for the investment

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

Dont rush the market will decide what is the best option for transport. There is still a long way to go before viable fuel for cars is found. Remember the Helen and the long life lamps. We now have a far better solution in LEDs

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Dont get into a fight with the horse racing club. It will be a waste of money. Taranaki has a large horse riding community who also use the race course. Rugby Park is under utilized. Build your hub there

---

### **What else?**

Please celebrate New Plymouth's multi cultural make up. Taking the bi-cultural route is insulting our joint cultural heritage

## Fixing our plumbing

**How much should we invest in our plumbing over the next 10 years?**

**How do we pay for fixing our plumbing?**

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

### Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

Higher priority for the coastal walkway extension than the Traverse

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

This is the basic council infrastructure that is what the council is responsible to ensure is maintained, necessity but as it hasn't been prioritised please don't make the rates increase to 12% to play catchup. with COVID you need to make wise decisions - bump council building upgrades before delaying basic infrastructure!

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

awareness of water consumption would be a good thing but feel that water meters could be something that could be delayed and spend this money on the backlog of basic infrastructure maintenance. reconsider 12% rates increase it will be crippling

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

this is obviously something that hasn't been prioritised as it hasn't occurred overnight! start somewhere!

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

these are nice things but focus on maintaining what we have with planning for extensions etc but stop spending my money on nice things ... get the basic infrastructure sorted and maintained and then start growing these nice things! they wont bring in revenue just cost cost cost!!

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

so much more can be done towards climate change than spending thousands on new fleet ... update as required and replace with electric as required. save this money for your big sport hub dream ... some things have to give ... don't increase our rates by 12% - this is NOT sustainable. I see no caution in your spending!!

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

this should have been a priority instead of yarrows stadium!! a big dream. would be a great asset to the region but some other things have to give - council building upgrade NO! stop spending our money!! crippling us, COVID effects will not be fully known yet

---

## What else?

Option 2 is what I think we should be targeting with a conservative increase in rates but sufficient to maintain infrastructure. your graphs show minimal new projects over the next 10yrs but this is NOT predictable nor realistic as new projects will evolve within that 10yr period! Our rates just seem to hike up and up ... other councils have ZERO percent increase, take a leaf out of their book!

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

It doesn't seem like saving x amount of dollars it's bringing in that much revenue from people already paying rates and their other multitude of bills. There are many projects that are required and absolutely need to be on charged but this is not one of them. Find other ways that bring in revenue that provide more than one of life's necessities

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

### *Comments*

Funding of this project shouldn't be passed on to rate payers it should come from the sale of leases

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### *Comments*

This is something that if done correctly can bring good tourism revenue.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### *Comments*

This is not paying it forward. This is a required need for our community. It supports both physical and mental wellbeing and has the opportunity to add jobs and for sport, recreation and play space to grow. Our tamariki, rangatahi and older people are already suffering. They get bumped from current (stadium) facilities for revenue gathering opportunities often, we have little kids playing sports all nights of the week and often late at night due to restrictions on courts, fields and turfs. Basketball, hockey and netball have already well outgrown their current spaces. This is a requirement that should be prioritized alongside essential services like water due to the essential service it provides people with to support health. Making us wait before starting construction is silly as this project has already been in the pipelines for years. Don't wait start the hub ASAP

---

### What else?

Don't increase the prices of district and New Plymouth swimming pools. This cost is already outside the means of many families in your district and something many people rely on for keeping active and mobile (people who have arthritis, fibromyalgia and other chronic pains, people who are over weight or with injuries trying to get back to physical conditions where they are able to mobilize and stay in or regain employment). It's a place for families to spend quality time together being healthy.

Perhaps higher user pay costs for places like the Len Lye centre would be more appropriate.

Spending millions upgrading the zoo is also not something that should be high priority when there is already a zoo that currently exceeds expectations for a free zoo. Either put a cost on that or hold upgrades until the things that affect multiple parts of health are addressed (water and sport and rec hub, keeping costs down at the pools). A free zoo is wonderful but a nice to have those other things are a need to have

**Tane Manu**

Organisation: Nga Mahanga a Tairi (Nga Mahanga & Ngati Tairi)

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

#### **Comments**

Nga Mahanga a Tairi are supportive of the significant (and overdue) investment in addressing the issues associated with our failing infrastructure with urgency. It is important to note that expectations (and legal obligations with respect to the RMA, NPS-FM etc) regarding engagement through these projects with tangata whenua must be factored into the project planning and associated resourcing to achieve these outcomes.

---

## Saving water and water meters

#### **Comments**

Our tupuna awa has provided water to the broader New Plymouth community for decades, at the expense of its health and well-being. Methods such as metering which reduce the take are supported. This must be balanced with those families that this will disproportionately impact (low income, large families, Marae, Papakainga, Maori reservation and reserve lands

---

## Improving stormwater management in Waitara

---

## Extending our tracks and trails network

#### **Comments**

Nga Mahanga a Tairi has developed a Cultural Impact Assessment to inform the proposed Kaitake Trail – Te Ara a Ruhihiweratini. This impact assessment has made a number of recommendations regarding the proposal; it is not clear if those requirements have been factored into the costing of the projects. Concerningly there does not appear to be any operation expenditure budgeted necessary to address some of the issues raised in the CIA. To be clear, Nga Mahanga a Tairi is not supportive of the trail as currently designed and proposed. Critical issues include the inclusion of cycling, the lack of detail regarding the remediation of the area, and the impact of this development on other restoration activities on Kaitake (predator control and returning those species which should be here like kiwi and Whio).

---

## Boosting our Climate Action Framework

### *Comments*

Nga Mahanga a Tairi is supportive of the proposed investment in planting our place, specifically this investment must be sufficient to take an eco-sourcing method in increasing the amount of vegetation cover within our urban areas. Ensuring on-going predator control in these areas and new habitat is also recommended to get the most impact of the remediation of an area.

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

## What else?

With projected population increases in the future other council services and service centres will need consideration for expansion to enable customer services and standards to continue to be met. Libraries are an important hub for the community enabling everyone access to information and technology that improves lives and allows contribution to society. COVID-19 and natural disasters such as the Christchurch earthquakes have shown the importance of libraries as an essential service that provide a place for people to connect and achieve what they need. They are also a place for life long learning. Please consider expansion and refurbishment of library spaces in the future so that Taranaki can continue to be a leading place where people want to live, work and play.

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Rate payers shouldn't have to pay more for the council's mistakes in not maintaining the water mains, Rural people especially who don't use mains should DEFINITELY NOT BE CHARGED

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

Rural people collect their own water I'm assuming they are exempt from the water metre system as they have paid already for tanks, pumps and pipework

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

While I love the walkway it's quite simple, it's not a necessity and we don't have the funds therefore it should have a pin in it until we are in a better position to spend the money on it

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

I'm all for planting, but electric cars for NPDC..NO

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

We paid for Yarrow Stadium for years with rates only to be having to pay again because council messed up and passed a building deemed unsafe, why should we pay for another sports ground, absolutely ridiculous

---

### **What else?**

Seems the council wants to spend money at the tax cost like it's their own personal income, We are paying huge rates as it is without adding 12% then 9% thereafter, the proposed water fix is the only thing that needs rectifying but you can not charge everyone to fix towns problem, Rural holders are not on mains water therefore should not have to fix - Walkway/sport hub both non essential, perhaps the council should budget better, they should be receiving alot more rates with all the subdivisions happening so where has the extra rate money gone.... Stop spending rates on stupid stuff!

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### ***Comments***

The NPDC should do its best to use only local contractors to undertake the improvements to the water network so at least the region can benefit in a small way to make up for the failures of previous NPDC members to effectively maintain our assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### ***Comments***

Water is a basic human right. Our rates are paid to cover such basic amenities and the lack of proper financial restraint by NPDC is now expecting the rate payer to rectify this poor use of hard working rate payers funds to fix these problems by finding additional capital by penalizing the rate payer in new ways.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### ***Comments***

With the current situation with our water infrastructure issues, tracks and trails are not essential and should be put on hold until such a time that the funds are available.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### ***Comments***

Planting trees is a good initiative. Electric vehicles on the other hand is another complete waste of tax payer money when other areas of infrastructure require these funds.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Don't spend what you don't have! Infrastructure (essentials first) niceties when you have a surplus.

---

### **What else?**

The rate payer is not responsible for the poor infrastructure management that we pay the NPDC to undertake. However I understand the funds must come from somewhere. The priority of the NPDC should now be to prioritize essential infrastructure over improvement and image as to not further punish the rate payer for the failures of the NPDC to look after our essential assets.

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

I think you need to start looking at all these new builds and incorporate a new water catchment area. Why should we be charged when I see businesses in the middle of summer watering their roof! When asked - they do it to keep their buildings cool (and yes I've reported it years ago) The council wants to charge charge charge with absolutely no regard on what that means for the home owner

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

You cant afford to do anything right now clearly

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

You guys have already got Yarrows Stadium wrong how many times? You will get it wrong again. Don't bother

---

## What else?

I think you have forgotten the people that pay the rates. We are just getting out of a global pandemic - people are struggling to stay afloat and the council wants to raise the rates 12%!? You are not listening to the people

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

No to water meters. We live in a region where there is more than enough water. Put money into capturing water. Water meters will only affect low/fixed income earners.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

### *Comments*

Get it done

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

We can't afford this right now. Park this idea for now.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

TOTALLY OPPOSED to this idea. The proposed location is ludicrous. There is too much vehicle congestion on Coronation Ave currently. Putting s sports hub in CBD will be make this part of the roads more dangerous. Our children ar both involved in sports and the current facilities are adequate for now. Not prepared for massive rate hike to fund a sports hub.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Plumbing is very important and should not be taken lightly.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Wow, water comes out of the sky for nothing. I live in the country and catch my own water. Why not use the water meter money to help people to put in water tanks, through education, adding it to their rates to soften the expense. If only to use that water for the garden hose to wash the car, wash the house, water the garden which a lot of people do whether they are allowed to or not.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Don't live there, don't know anything about their problems. It's pretty obvious but don't do any more development on low lying land.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Extending the walkway to Waitara is a good idea. I don't think spending our rate payers' money in Egmont National Park is a good idea that falls under DOC and they should get that money in their budget. Something needs to be done with widening Mangorei, Baker, and Carrington roads. This circuit is getting increasingly popular with runners and cyclists and is bloody dangerous. The road is not really wide enough to accommodate both, someone will eventually get run over. Maybe concreting a wide foot path down one side that could accommodate both up and down traffic, or just widen the road as far as possible. I know this seems like a big task but makes more sense than a sports hub or spending rate payers' money in the park.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

Up grade excising facilities, everyone go's on about the parking at the netball courts. Well just across the main road between the road and the railway is a heap of pine trees that could be turned into a car park, or at the end of Rimu street the bottom of Sacred Hearts field I'm sure there would be enough room there for a few parks also then its just a sort walk under the bridge and you are there. 40 Million is a lot of money to just to have all your eggs in one basket when there is a lot of other problems that should be addressed.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

## What else?

I am really struggling with the cost (\$250k each =%500k) of the 2x platforms on Devon st that were passed by the NPDC. What a neglectful waste of taxpayers money. The plate forms our awful to look at & have no shelter, from Sun , wind & rain. VERY DISSAPOINTEED in this decision to spend \$250k on the platform , I could build a small house for the cost of one platform. Who let this go through????? Please don't waste our hard earned money. Yarrow Rugby stadium is not getting any use , is this going to become the sports hub?

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### Comments

Make an insensitive to all new and existing houses to install water tanks.this could also be implemented to commercial buildings.the system / tanks could go onto trickle feed hence reducing infrastructure stresses.leaks in the current system could be fixed reducing water wastage and requirements for meters

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### Comments

Make Taranaki a destination for what we have to offer.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### *Comments*

The position for the hub is all wrong and there are plenty of other options for the facility.

---

### What else?

The ten year plan does not help out the two towns that introduce/welcome visitors to the area as you come into New Plymouth.the ten year plan for Inglewood is absolutely pitfall.I have spoken to roading council people on how to increase traffic flow for the town and to make it safer. With the buy back of the railway land this could be used in part for parking and get cars off the side of the road in turn winding the road for the amount of traffic that flows through the town.

I would like to see a roof over our pool so this can be used all year round. A lot of this district travel to straford and or New Plymouth for swimming lessons and training for 9 months or more when we have. Good facility on our door steps.Ten million over ten years for Inglewood is not suffice considering the potential Inglewood has to offer the region.

### Comments

Tree planting is a brilliant idea.

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I am against the multi sport hub going in at the racecourse. I don't believe a multi sport hub is needed. If space is needed then it needs to be utilised outside of the city boundaries for ease of parking etc. I am a resident of Welbourn and I know how congested the streets have become over the recent years. To take the racecourse away would be a HUGE mistake for our area. It's OUR green space and needs to be cared for. I think that green space is needed for the health of the park land and residents of New Plymouth, the birds. I play with my kids there on their ponies, enjoy pony club, walk our dogs. Please know it's a very special place just as it is.

---

### **What else?**

Please protect our green spaces and environment, as once those are taken away they don't come back.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

**Submission No: 3192**

**Gail Allison**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

User pays, I have to pay for my water, fix my own repairs, as I live in the country.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Good idea

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

The flooding is a hazard, needs fixing please

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

You don't have enough money for this?

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

### What else?

Our north Taranaki Rivers need fixing, plumbing from Urenui needs council input urgently, waste products need to go elsewhere, not Uruti please. Urenui needs upgraded foot paths, safety first, hazards with tripping. Thanks for making it safer for scooter drivers on state highway 3, Urenui crossing, but need a pedestrian crossing, cars still driving too fast in the 50 km zone. Would appreciate recycling bins in Urenui and Uruti. Thanks for reading

Office Use Only: 7486

**Submission No: 3193**

**Roger Hawkins**

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

This is because of the NPCC "razor gang; a couple of decades ago stopping surveillance monitoring.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Why in an area of known high rainfall, is it necessary to have water meters? If you lived in a desert area yes, but NOT in a province which relies on rain to grow grass! Installing water meters will mean another bureaucracy to administer and another addition to the budget.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

Option 1plus continue to develop low cost solutions for extending the Coastal walkway to Waitara AND OAKURA.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Option 1plus develop proper and suitable hubs for all sports as when necessary. Particularly NETBALL. Do NOT build erect structures on the inside of the NP Raceway.

---

### **What else?**

It is fact of modern day life that that organisations funded by companies, local and national government, particularly, sports trusts, promote their existence by planning evermore facilities. For an example, Taranaki Rugby Union, used to be run by a part time secretary and a groundsman, and its committees, players and coaching staff were enthusiastic, knowledgeable, keen, but unpaid. Compare that with today!

# NPDC's Draft 10 Year Plan

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Stop fixing issues in our beautiful city with a bloody band aide fix it properly the first bloody time so stop wasting money on no urgent shit

---

## Saving water and water meters

#### **Comments**

Water metre would be a good idea as long as you don't abuse it like you do our rates and increase it when and how much you please. The building department should introduce that all new builds should be made to put in water tanks to try help with the water issue

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

The walk way is a great investment off our rates and should be looked after and making it go out to Waitara and look after all and any future tracks we have or you make

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

Hell no way should you spend our rates on electrifying your cars a classic case off wasting our rates when it could be spent on fixing more important things in our city like the Main Street is a terrible sight compared to other cities the same size they have beautiful main streets

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

This want affect me personally but I am all for it and feel it needs to be done much sooner rather than later

---

### **What else?**

As a rate payer I feel you just do what you want any way no matter what the public have to say. Spending our rates on something's totally unnecessary. Like how many times are you going to keep Putting a band aide on the rod from the port all the way thru to the other end as I use this road every day it is nothing but bloody disgusting

# NPDC's Draft 10 Year Plan

**Alison Gillespie**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Fix the water piping in Urenui as the water pipes burst regularly - urgent within 2 years. We have rahui's on 2 rivers - Urenui River due to sewage from the storm water, cannot fish/swim - this is a big impact as there is the Urenui campground beside the river. Mimitangiatua from the pollution being released from Remediation NZ (Uruti worm farm), I understand that NPDC is pulling its submission supporting the reconstent of this business.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Ok with water meters - just concerned about people with lots of children will go over the limit and when they are on a low income what will be the financial impact to them. Also would like to see education on people catching water for use in their garden, being innovative reusing what we have - how many IBC's go in to landfill that could be repurposed (I know they need to be cleaned first)

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

While this is important, I think we need to sort out our infrastructure first.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

Look after core responsibilities first e.g the water piping - the Waitara Sports hub funded their project by themselves after getting turned down by NPDC, why is that changing for New Plymouth??

---

### **What else?**

Fix the infrastructure and river pollution first before the nice to haves like a sport hub. A recycling bin at Uruti and a coin operated rubbish bin I have to take all my rubbish to the dump, due to the hours its open, I have to keep it in my car and go down after work - Waitara 1-4pm, lots of people up Uruti dump or burn their rubbish on the land. The red bags used to be great as I'd drop mine off in Urenui outside a friends house.

**David Dick**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### ***Comments***

The Council must not let this slip behind ever, now we have to borrow to fix it.

---

## Saving water and water meters

#### ***Comments***

Water meters are a great Idea to make people more aware of how much water they are using. If water meters are used the water levy on the rates bill should be eliminated. Why can't we build another dam to collect water for town supply and drive a hydro electric power station producing renewable energy ? (The alternative is new gas fired power stations. ) The renewable energy could be used to power the surge in demand from Electric cars. This would be a win win all round.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### ***Comments***

The Waitara rates should be levied to pay for this.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### ***Comments***

Great way of spending our money to help improve lifestyles by opening up the area for locals and tourists.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

The council should plan for the supply of renewable energy before they want to use it to drive their cars. You can only build so many wind turbines in our back yard, and everybody wants to get rid of our local gas industry so where to from here? Build a dam and hydro power station which would solve the renewable energy supply problem and the water supply for the next 100 years !!!!

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I am all for a multi sports park inside the race course, BUT NO BUILDINGS to be erected and an under pass built under the race track. Do not push the only viable race course in Taranaki into a corner. Why not develop the Yarrow Stadium into something everybody can be proud of, like a multi sport stadium/complex. Lets face it the whole Yarrow Stadium is a stuff up which the council is throwing good money at trying to fix up their own mistakes. Who is going to use the Yarrow Stadium ? A few rugby games every year, what a complete waste of the rate payers money. Tear the place down now and start from scratch with the multi sport complex.

---

## What else?

On the whole I think the council are being very proactive. The Yarrow Stadium should be shared with a lot more sports and concerts, it is totally under utilized and designed for one sport only. Stop spending our money on the current structure, sell it or tear it down and start again.

**Greg Mawson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

I want it paid from rates, but that does not mean I agree with rate increases to do it. This is a core service and it should be done before arts and extending the walk way etc. We should have more users pays on "wants"!

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

I see water meters as another way to increase our rates and get more money coming into the council instead of being used to encourage less use of water. Are there any samples of how these rate payers will be charged if water meters were introduced?

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

This is a "want", not a "need". Fix our core services before wasting money on things that the whole population don't use.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

Thats not your job to solve. Leave it to the government.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I'll never use this sports hub, so why should I pay for it. User pays, let the people using it pay for it.

---

### **What else?**

Core Services are what you should be providing for in rates. If I said to my boss that I want my pay increased by 12% next year because I can't manage my household, he'd tell me its not his problem and where I can go, but the council can go to their employer, us rate payers, and demand what ever they like with us having no say. I can't see how alot of people can afford to pay their rates. I'm assuming some elderly will be leaving no inheritance to their children as their house will be sold when they die to recover their rates. Its disgusting!

# NPDC's Draft 10 Year Plan

Office Use Only: 7500

**Alison Gillespie**

Organisation: Urenui & Districts Health Group

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

The Urenui & Districts Health Group Committee are concerned about the health and well being impacts of the water cuts due to the water pipes regularly bursting in the Urenui village. The secondary impact is the river water quality due to storm water run off, there is a high level of e-coli in the Urenui river which has resulted in a rahui put on the river by our local Iwi Ngati Mutunga.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

We support improvements to people's health and well being from exercise and cheap transport options.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

Concentrate on core business- water infrastructure.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

While we back sport initiatives we think that the water infrastructure comes first.

---
