NPDC's Draft 10 Year Plan

Office Use Only: 3417

Submission No: 1501

Jolene Graham

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

Rates increase as proposed 12% and 6% after first year are exceedingly high and unnecessary. It is unsustainable for many homeowners. They should be much lower, find ways to reduce costs.

NPDC's Draft 10 Year Plan

Office Use Only: 3418

Submission No: 1502

Jessie OConnor

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3420

Submission No: 1503

Andrew Lodge

Organisation: TCUSA

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Re development of Pukekura Park so it can host international fixtures.

NPDC's Draft 10 Year Plan

Office Use Only: 3424

Submission No: 1504

David de Villiers

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Private water tanks

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Create funding from council business like the rest of us do. Stop ripping the guts out of home owners

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

There is no crisis for us, council is just posturing. The only crisis is central government killing off taranaki economically.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Man up and fight for taranaki. Labour is deliberate punishing us

NPDC's Draft 10 Year Plan

Office Use Only: 3426

Submission No: 1505

Liscelle Bocock

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Now is not the time when people are under stress from covid, job losses, reduced hours of work, house prices increased, food and power and petrol have all gone up. Our farmers are under stress already. Our people are under stress. Yes the plumbing is important but recovery from covid and job losses is more important.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

In Auckland the people are struggling to pay for living let alone pay for water. This will happen here Water is a human right. To pay for something that is a basic human right is wrong. Big families will pay more then small families. Farmers will pay more and yet they are keeping Taranaki going. Services that require water ect.. salons, their prices are already going up due to new minimum wage and yet it will have to go up again because of water rates. Rates are already at a point that people are struggling to pay. Are you just going to keep increasing rates to the point people can not afford it? I'm not talking about high class people I'm talking about middle class and lower class people. This is all happening at a time this area this country doesn't need the added stress.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Now is not the time

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I agree only with the planting. Are far as up grading cars... Now is not the time

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I have this idea and I think it would be amazing but now is not the time post covid. Wrong by time

What else?

Now is not the time to increase rates and add additional charges. Post covid. Job losses. Hours reduced. House price increase. Food and petrol increase. Yes minimum wage will go up but so will everything else so there is still no winning. Your community is struggling. Don't make it harder for middle class workers. Now is not the time.

NPDC's Draft 10 Year Plan

Office Use Only: 3427

Submission No: 1506

Julia Macphail

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3429

Submission No: 1507

Heidi Bir

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Wait, revisit this important issue in 2 years. Now is not the time.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is not essential at the moment. Post COVID economic recovery. Do essential stuff and tighten the belt for 5 years. We have a beautiful walkway as it is. Maybe aim to complete this within 10 years.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Not yet. Especially if it means 12% rate increases. Those who use it will be the privileged

What else?

Rate increase should be no more than 3%. Wages are not increasing, people cannot afford a big increase.

NPDC's Draft 10 Year Plan

Office Use Only: 3430

Submission No: 1508

Belinda Morgan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Free initiatives - such as Facebook posts etc with water saving tips to help reduce water consumption. Maybe having some form of monitoring system that shows a daily, weekly, monthly water use by suburb/town to make people more aware and show that small measures make a huge difference?? I think post Covid households can not afford water rates on top of increases in other areas and lack of employment.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I don't think post Covid and in this current economic state this is a necessary spend area. We already have great options that will provide options for the next 10 years.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I don't believe electric cars are necessary at this point in time. Especially with the efficiency of e-bikes and scooters. Are these cars actually necessary. Who uses them and are they more of a benefit for staff than necessary to complete work?

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

If it goes ahead it needs to happen sooner rather than later.

What else?

Our economy is struggling. Families are struggling. Rate increases and potential water rates are only going to add more pressure to families and in turn have a negative affect on other areas of the economy and our community. While I understand the need for growth and the importance of maintenance- I believe we need to be fiscally prudent over the next 10 years for the benefit of all people and our local communities.

NPDC's Draft 10 Year Plan

Office Use Only: 3431

Submission No: 1509

Jayden

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Climate urgency is a joke, we need more gas to make power for your electric cars.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3436

Submission No: 1510

Terrance Whitehead

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Raise the money by holding more events concerts, sports etc to keep rates down and stop wasting money on unessential items (windwand comes to mind) if it's costing so much to lift out and paint every few years get rid.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Do not bring in meters to private homes, business yes, or high users there is plenty of water utilize it better, build a bigger reservoir or storage facility or tape into high flow rivers.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

User pays. Hold events or fundraising to finance it.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electric cars are going to need better electricity understructure. As an alternative to petrol go LPG to reduce emissions and also use local fuel. Show the rest of NZ how it's done. Planting the trees is a good idea so get the public involved and let us plant some rather than council pay to do it

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I'm for the hub but why can't we hold concerts or sport events to raise the money. More events at the bowl could pay for this and more.

What else?

Alot of people are struggling, I ain't getting a 12% payrise so why put rates up that high. You will out price the affordability for lower income earners.hold more events council backed, I know u got to spend money to make money but if we held the right events, concerts we could lessen the rate money needed by earning more. Also NO to water meters, there is so much water in our province surely there is a better way to manage this resource and to fund repairs needed. Thanks Terry

NPDC's Draft 10 Year Plan

Jodi Metcalfe

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Instead of looking at water meters has the council thought about buying land to then have a water bank so we are able to save water over the winter where in summer we don't have to have restrictions and have enough water for everyone. Putting in water meters you are putting pressure on house holds who are only or not getting by and can't afford another expense.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The money can be spent else where. Stop spending money on stuff like this and put it to better use schools and food banks / struggling families

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Are rate payers still paying for rugby park to be fixed up? If so then why are we spending money on rugby park if you want a new sports hub???

What else?

I understand we still need to develop our town but when people are struggling why do you have to keep on hiking up our rates to pay for all these things when all people want is to be able to own their own house and pay their living expense. You are putting money pressure on all walks of life and I'm sick of having to pay for a rate increase every year when salaries are not reflected with the cost of living these days.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Sick of the council wasting money. Frustrated with the ridiculous p.r. Stunts by the mayor. Just deliver the basics and find the money from cutting waste expenditure. I can't believe the council expects we can afford a rates rise in the current economic climate when few people are receiving any pay increases. Also how can our assets be run down when rates have increased every year - bad management!

NPDC's Draft 10 Year Plan

Office Use Only: 3443

Submission No: 1516

Gary Walls-Renwick

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3447

Submission No: 1517

Prateek Pawar

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1: Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3449

Submission No: 1518

Hannah Watson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

Crown should pay under treaty settlement

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

I would like to see a park more like the one in Napier available for kids rather than another sports ground. I want to encourage play and family time for my little one.

NPDC's Draft 10 Year Plan

Office Use Only: 3450

Submission No: 1519

Diane Carr

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Saving water and water meters

Improving stormwater management in Waitara

Extending our tracks and trails network

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

It is essential that our tamariki have access to sporting facilities that are fit for purpose. Being involved with sport is an essential part of growing up so that they can have both healthy minds and bodies. We need sporting facilities which encourage our tamariki to participate in a multitude of sporting activities. The multi sports hub will guarantee our community has greater connection with each other and it will become a vibrant part of our city/province which will attract future citizens to our region. Lets do it!!

NPDC's Draft 10 Year Plan

Office Use Only: 3455

Submission No: 1520

Caroline Westlake

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Do not effect rates !

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Reduce stupid spending aka sitting area on Devon st that cost 250k !!!

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Look after our energy sector !!! People are losing their jobs !!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Stop wasteful spending !!! Make cuts up the top and no more stupid over priced fluffy projects !!!
People are already stressed and worried don't make it harder for them !!! Absolute joke. Council need a reality check !!!

NPDC's Draft 10 Year Plan

Office Use Only: 3457

Submission No: 1521

Christine Jury

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Get on with it !

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Far too much is made of the necessity for walking/biking tracks. What is wrong with using existing tracks/roads ? A large percentage of our population is paying for facilities they can never use.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3458

Submission No: 1522

Luke

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Don't you dare raise our rates horrendously to pay for this garbage

What else?

Stop wasting OUR money on unnecessary projects!!! We don't need a multi sport hub we don't need a longer walkway we don't need expensive "art". We need more affordable housing (not an unbelievably high rates increase)

NPDC's Draft 10 Year Plan

Office Use Only: 3460

Submission No: 1523

Natalie Avery

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Not at the moment Only do the necessities while everyone is dealing with Covid Spending this money is unnecessary

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

■ unnecessary

What else?

You lot need ■■■■■ to wake up You should be concentrating on necessary spending like fixing the water etc not spending on extending walkways or multi sports hubs All that can wait Wake up NPDC & actually start to listen to what people want!

NPDC's Draft 10 Year Plan

Office Use Only: 3461

Submission No: 1524

Shani Jonker

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Introducing water meters will put too much financial strain on those already struggling. It's hard worrying about how much power you need to use, I don't want the same stress applied to water use.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3467

Submission No: 1525

Gareth Miles

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

More storage tanks should be a priority also

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Councillors who have made decisions to invest in art instead of infrastructure should be held responsible for these decisions. The len lye building was a farce and water infrastructure could have been fixed with the money used for this. There is no excuse for this, head's should roll

NPDC's Draft 10 Year Plan

Office Use Only: 3469

Submission No: 1526

Brian Gnyp

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3471

Submission No: 1527

Jacob French

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Charge people more with water meters and make things even harder than they are? If reasonable use of water is not penalised then I don't see an issue, have a cap where under a certain amount of water used per household is not charged, over the cap gets charged, create this cap based on number of bedrooms per house

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Lived on Leslie Street backing onto River Bank and never noticed major surface flooding, don't feel its that big of a issue

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Focus on issues to do with infrastructure, water sewerage ect, spend money on "nice to haves" later

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Looking after this world is important, feel like hybrid vehicles are a better option at this stage opposed to full electric

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Will be good to have somewhere for sports ect, just doesn't need to be overly flash, it's for sport and practical use, not a art piece,

What else?

In general spend money on things that actually matter, infrastructure, flooding / stormwater, sports hub, climate change. other "nice to haves" or things more aimed at visitors to the region can be put on hold for a while, think people are getting fed up with all the projects the benefit visitors rather than spending money on things that affect the day to day life of people who pay rates in this district

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Invest in more water technicians so they can help with this.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Extend the walkway it not mountain to see right now.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Composting incentive.

NPDC's Draft 10 Year Plan

Office Use Only: 3477

Submission No: 1531

Carolyn Ellery

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Some serious issues regarding our plumbing have been known about for a very long time, but, despite a lot of earnest talk about repairs/replacement, absolutely nothing has been done. You must take responsibility for that. Shame on you.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Again, shame on the council for not doing anything about this serious issue. A lot of buck passing, but no action. For crying out loud, we elect you people to run our place effectively, but all you do is talk.

Improving stormwater management in Waitara

Comments

Regarding option 2. What would the \$9,000,000 be spent on? Surely, this amount of money would make a serious difference to flooding issues, but not long term. Of course, climate change issues are the major problem here, and no amount of money thrown at stormwater problems will solve the problem. Being such a low lying area, Waitara is bound for extinction unless immediate climate change action is taken, and all I hear is talk, and very little of that.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Seriously, we cannot afford to throw huge sums of money at projects that will not improve the lives of most residents. Yes, the council's preferred option is desirable, but it is more a case of needs, not wants. Each person is responsible for their own fitness and, generally, health, and there are a multitude of options already available to help with that.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Great, it's a start. But, instead of planting indigenous trees everywhere, how about a lot more community orchards? The council is to be commended for it's initiative in this regard already. Most people do not know about the existing orchards. So many citizens are really struggling to put healthy food on the table, and this could be a real help to a lot of people.

Developing a multi-sport hub

Comments

What about the \$50,000,000 currently being spent at Yarrow Stadium? A grossly underused facility. I understand the area would not be suitable for all sports, and there is the parking issue, but really, developing a brand new sports hub is way up there on the list of wants, not needs. It, too, would be unused most of the time. We need a large, green open space in New Plymouth, which we have in the racecourse, but the racing industry needs to take responsibility for paying it's way, which it currently is not. Is horse racing even going to be around for much longer? Could the area be put to better use? Some of the area used for sports, some for new housing? Specialised housing, perhaps, like care of the elderly plus family housing in the same area. This works well elsewhere.

What else?

A lot of time is wasted by a lot of talking around and around in circles. Action! And please, stop focusing on just one sector of our community. We are all citizens, and any decisions made affect us all. Regardless of our ethnicity. Anything less is apartheid.

NPDC's Draft 10 Year Plan

Office Use Only: 3481

Mike

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Walkway to Oakura instead of Waitara would be preferred

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Change EV's to hybrids. Continue with planting.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Allow space for temporary nets to be installed on cricket and rugby fields for a golf driving range

John McDonald

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

There was comment in the media that installing water meters will reduce the off take and also reduce the need to spend significant sums so soon?

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Comments

You cannot expect rate payers to find discretionary spend with a 12% rates increase. The council must learn to live within its means

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Stop Discretionary spend, reduce the rates increase, we cannot afford this !!!!! Promote other forms of emissions savings, less road and air travel by council staff members? More efficient planning

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

You cannot expect rate payers to find discretionary spend with a 12% rates increase. The council must learn to live within its means

What else?

Reduce your spending to reduce the rates burden on ratepayers. Live within your means like every other household has to. At a time when wages are flat or declining, you cannot expect families who are struggling to make ends meet to accept an exorbitant rates increase.

Erin Annabell

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Don't do meters. Too much money spent

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is not a priority with the current financial state of the world

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is not a priority. Fix the water. We have plenty of sports grounds around taranaki. If you centralised it you will ruin the stalkers regions

NPDC's Draft 10 Year Plan

Office Use Only: 3490

Submission No: 1536

Mandy Gilchrist

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3491

Submission No: 1537

Rebecca Caldwell

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Introducing water meters and charges to home owners is going to increase financial pressure on all ready struggling families.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

What we have currently is fantastic. Fix the antiquated water system that has clearly been overlooked for to long. That is a must do! Tracks and trails are a would be nice but not urgent.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3495

Submission No: 1538

Cyndi Torckler

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Needs to be done. But large rates increased won't be sustainable. Happy for smaller rate increase and other means

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Worried about increased cost for low income families. And children not being able to attend to basic hygiene cares as parents don't want to fund extra. Also people not being able to drink water without thinking increased cost. Let alone washing

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Would love for more but need other ways to fund. Maybe user pays for some tracks etc

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Are electric cars really the best option. Long term What are repair costs and other added costs

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This is needed now

What else?

Thankful for the many services council provides

NPDC's Draft 10 Year Plan

Office Use Only: 3497

Submission No: 1539

Brook Lester

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I live rurally and am on tank water supply and a septic tank. I do not want to be charged for upgrades to the water system at all. If the council is happy to manage those rates and not charge those living in the country then I am happy for the water systems to be upgraded, but I would not want to pay extra in my rates for this. I would be happy for the council to do what is required but not at my expense in a 12% rates increase

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I live rurally and am on tank water supply. I am happy for the council to do what is required to manage the water usage but not at my expense. Why should my rates increase by 12% when I don't use any of the town water supply.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

The council can do as the please but I do not want to be charge a 12% rates increase for works in Waitara when I live rurally in Omata. the rates should be increase based on the works required in each area

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I am happy with this. but 12% rates increase for this alone is not acceptable. Maybe stop charging me for rebuilding a stupid rugby stadium which I never go to and is hardly used and but the \$80 into parks and walkways which is used more often.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I say do nothing here but what i really want is to see the NPDC not \$1 million on fleet cars... why not come up with a better initiative like improve public transport and encourage the council staff to use it. Or do some fund raiser to get you new cars... don't charge the public

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

No interested in a multi sport hub... not when I'm being charge already for a stadium rebuild.... I would expect the stadium is used more first before I agree to this

What else?

I live in rurally in Omata. A lot of what the council is proposing around the water network has zero affect on me, and I do not want to be charged a 12% rates hike for these upgrades.. frankly its bullshit. I already pay \$80 extra each 1/4 for a ridiculous rugby stadium which is hardly used. If the council can manage its rates increases based on the areas that require work to be done then that's fine, but do not blanket increase the rates because its easy. I work in oil and gas, and think electric cars are going to cause more issues than what they're worth. I would preferer the council improve the public transport and encourage the council staff to ride it. don't sped \$1 million of fleet vehicles.... were battling a pandemic and you want to improve your company cars? what's wrong with you? you want to increase rates when people have lost jobs? this council is so out of touch and lazy I cant believe it.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This will bring more revenue into the province so makes sense to put this ahead

NPDC's Draft 10 Year Plan

Office Use Only: 3507

Submission No: 1544

S Bolam

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Meters not required.... Get govt funding under new requirements

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Conservation education only! Encourage more private rain storage for gardens etc like bigger cities

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Yes no building consents in prone areas

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Build wide enough for all users

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Encourage plant donations ...

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

A huge need and please include an upgraded swimming complex...

What else?

Not sure why rural land takes a bigger rate increase when few services used and generally already undertaken conservation planting of waterways and soil retention. Water meters are not for NP ... climate change means more rain/supply council can allow private collection of rain water for toilets and garden hoses/car washing/water blasting etc. Also fix the pipe leaks...developer levy!

NPDC's Draft 10 Year Plan

Office Use Only: 3508

Submission No: 1545

Michelle Ogle-Atkins

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Its disappointing to know that with rate that council has not kept up with maintenance let alone improvements

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

we have so many existing track and trails that if we keep them maintained they are appropriate ongoing. Consideration needs to be given to the current economic environment

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

No options given to split the proposal. I agree with the planting but considering the types of electric vehicles available along with current cost this seems unnecessary in the shorter term. As electric vehicles become common place in NZ the cost will reduce and the quality is likely to increase.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Given the current economic environment the the uncertainty whanau are facing this proposal seems like a 'slap in the face' when jobs and wages are not moving at this type of rate. Consideration really does need to be given to people

NPDC's Draft 10 Year Plan

Office Use Only: 3513

Submission No: 1546

Marion Bolton

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

A first priority. This must come before the 'nice to have ' items

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Water is a most precious commodity & residents must be encouraged to be careful with water use

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Put the extension of the coastal walkway on hold but continue the mountain to sea option as a contrasting walkway for the public

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

The proposed rate increases of 12% for one year & 6.7% for subsequent years are too high for many residents & businesses who are in many cases suffering uncertain job security and a down turn in profitability

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Comments

Essential works. The question needs to be raised in these difficult times why not use the Investment Fund to inject into the projects to keep the economy bouyant, sort out problems that have occurred over the years through lack of money, the investment funds will be experiencing low returns contributing little to rates reduction per ratepayer, cost of these projects will increase significantly over the next 10 years so suggest the budgeted rate increases unlikely to fund these projects fully going forward. Is this Investment Fund so tied up it is untouchable, we need the truth.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

If it controls leaks and or usage do it. Water will always be a problem, do it once and do it properly

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Growing population just do it. Increase cleaning maintenance whilst on the job, the number of grates regularly blocked with leaves etc. prevents rain during heavy downpours draining away. No provision or thought of controlling rubbish from the system flowing into the sea.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Essential to maintain an attractive environment. Also do not neglect existing parks and park maintenance. New Plymouth when I was a child was the Garden City, we are now the Energy City, we have to a degree lost our focus.

Boosting our Climate Action Framework

Comments

Involve Service Clubs and voluntary organisations to assist planting and designate various area to their organisation with naming rights. Involve the Community, run a donate and plant a tree campaign in conjunction with the TRC Riparian program.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Essential as many sports are deprived. New Plymouth self credits itself with the quality of its facilities, which in reality are lacking i.e. sports grounds in the bottom of gullies wet and cold during winter, poor grass surfaces and no parking. Pleasure to go to other cities i.e. Hamilton and see their facilities.

What else?

The Investment Fund would ideally be applied to this facility to invest in the youth of this city for today, tomorrow and well into the future. The fund on our House Rates contributes \$136.50 per qrtr

On one Farm	64.53
2nd Farm	55.57
Investment property	197.75
Totals	454.35

Total NPDC Rate Payment per qrtr we pay is \$5837 GST Excl.

NPDC's Draft 10 Year Plan

Office Use Only: 3531

Submission No: 1556

Grant Commerford

Organisation: Stratford Cricket

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3534

Submission No: 1557

Karen Luxton

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It is a priority. Forget the 'nice' things that people want..our infrastructure isn't frilly or pretty but it is absolutely the most important item to be fixed. Let's not leave it to the next generation.. fix it now. As well as water meters New Plymouth is growing and it needs a bigger water reservoir. We cannot continue to open up new subdivisions and build new houses without considering the need for more water and how the sewerage system etc is going to handle those new houses.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Yes to water meters but you still need to build a bigger water reservoir because there are hundreds of new houses being built in New Plymouth that will all be connected to the town water supply. Water meters will not solve the water storage problem. Does council consider water and sewerage when they approve new house builds in New Plymouth? Water meters will make people more aware of how much water they use but it is certainly not going to solve the problem of water supply... New Plymouth needs a bigger water storage reservoir.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

No..I think the option council is proposing is a good one.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Don't do anything...all discretionary funds should be going towards infrastructure.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

We cannot afford to do this if we want to fix the plumbing and sewerage problems. Don't be pressured by the Greens to spend money on climate change issues that we cannot afford. I don't believe council can afford to spend thousands on electric vehicles either. Think about what is most important....electric vehicles are not at this point in time.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

While I am reluctant to see that much money go towards a sports stadium I have to agree that we do need a sports hub as the stadium does not cut it anymore. It is often used for expos and sports teams are locked out when that occurs.

What else?

Council needs to be prudent in its own spending..ie running the council. Look at the systems..staffing etc.

NPDC's Draft 10 Year Plan

Office Use Only: 3535

Submission No: 1558

Erik Noack

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The long term (2031-2051) seem like just another way of saying it's a good idea but never going to happen. If funding is a problem, thought should be in simpler solutions such as pressing NZTA on cycle lanes on the side of highways, lower speed limits, and anything that enables people to commute safely between settlements in the district.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3537

Submission No: 1559

Maggy Calka

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

A lot of homes are rural that collect their own water so they should not be penalized for this in their rates.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The walk way is fine as it is, minimal people walk the length to bell block let alone going further to waitara. This is not necessary and will be a waste of money is done. There are already plenty of other walkways that people can use

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

With everything that happened with covid since 2019 this can be pushed out another few years

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is not necessary, find funding for it somewhere else not through rates.

NPDC's Draft 10 Year Plan

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3542

Submission No: 1561

Mark Probyn

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Why are we using out of town consultants when we have local specialized business that are capable and probably way more affordable to use. With a down turn in workload for some industry why not feed the work to local business and keep the money local.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Our rates are too high now, we have paid for water already. Why don't we encourage households to have own water catchment. Why don't we increase the councils water catchment. What happens to all the fees for new builds, subdivisions, and renovations?

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Where is the money for leasehold land purchases going? This is money that could be used for improvements.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

The coastal walkway is probably long enough at present, but coast to mountain opens up some very good landscape. Linking up the Mountain bike track to a walkway would be a great idea.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

When the council has spent money to research the hydrogen fuel option why are we going for electric? Maybe the council needs to have electric bikes instead.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The council has mucked up with Rugby park and the downtown carpark, these are projects that no one is accountable for , why should we trust the council to spend our money properly.

What else?

When the powerco shares were sold we voted against it , but it went ahead and we were promised to be rate free by now. We couldn't be further from it. A rates hike like you are planning is not right. People and business are hurting, would really like to see an overhaul of our top heavy council with more efficiency in place.

NPDC's Draft 10 Year Plan

Office Use Only: 3544

Submission No: 1562

Andrew Cotter

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

we obviously need to work on improving the issues we face in the district with our plumbing, but we need to ensure it is done in a cost effective, efficient way. one example of the shambles is the work currently happening on the water main replacement on richmond st in inglewood. the contractors have been at it for days, achieving bugger all - they spend half the day sitting in their vehicles or standing around, then they tell me that council has called them off to do other work, leaving this work half completed (of course they have to mitigate the trenches etc they have open, so wasting more time and effort). is anyone actually keeping an eye on how long this takes and to what standard? the scope seems to have changed on them half way through also. we need to be wary of cost we need to be wary of spending a heap of money, then if central government takes it all over as part of the three waters review, have we wasted our money and effort?

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Water meters, while unpopular, are probably the way forward obviously council has been introducing these where other works have been happening, for example I had a toby replacement and a water meter was then installed. great. however there has been no feedback or education around how much water my household uses vs the average. I understand how to read a meter and so on, but haven't been that motivated to work out my usage. I assume that there would be a heap of households out there that wouldn't have a clue how to work their usage out. I totally get and support that consumption needs to be dropped for everyone and wastage stopped. education is needed around this. could water meters be done in a more staged approach to reduce upfront costs? mock billing is a great idea for a few years to get people used to the idea for the average household, I would hope that the cost of water doesn't increase - obviously households are billed on a standard consumption charge currently, so if an average household under the new setup was still using average use, then they shouldn't be paying more for their water use. Higher use households should be paying more if they are using more water. Yes, bigger households may be lower income demographics, but this doesn't exempt them from paying for what resources they use, especially if they are being inefficient. Businesses, farms and commercial users should also be paying their fair share of costs for water supplied by Council. Council should be encourage the installation and use of water tanks for new and developed (and existing) properties for the likes of watering gardens and the like. This could be a subsidy type system for water tanks, or it could purely be a promotional/publicity type activity. alternatively look at sourcing and selling water tank systems at cost? Could council look at having some non-potable water filling stations for commercial or industrial users (or even domestic users) to take/purchase water from for the likes of watering gardens, roadworks etc? this could save on using

potable/more expensive water has council currently got much of a handle on if there are specific zones, areas, suburbs etc where water usage is particularly high? maybe this could be one way to focus on activities. education should happen for the district to have some knowledge on where our potable water comes from, what the limits, restrictions and challenges are, and the cost of treating that water this should include the consenting and allocation process (TRC), as well as the actual water takes, sources, treatment, limits and challenges, as well as info on the transmission on storage of water around the district. if NP district usage is so high, how much work has gone into leak detection and prevention? I know many identified leaks go unrepaired by Council contractors for extended periods of times. One example is a leak at the intersection of Richmond St and Carrington St in Inglewood which leaked for weeks if not more before it was repaired.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

With regards to the Waitara stormwater problem - Council should be discouraging the occupation of land which is in flood-prone areas, and in area which are likely to be subject to sea level rise. I believe that spending lots of money on infrastructure in these areas that are almost certain to be inundated on a regular or increasing basis is a waste of money. Could the funding from work that only affects Waitara residents come from a targeted rate on Waitara properties? Or from the fund created by the sale of the leasehold land?

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We need to be careful of this, I support SOME spending to increase tracks and trails, but not huge amounts. We need to focus on core infrastructure before we go chasing nice to haves. NPDC residents cant afford ever increasing rates increases year on year - these shouldn't exceed inflation. Council seriously needs to work on its own internal and external efficiencies.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

If an electrified fleet is the be all and end all approach, then the cost savings should pay for themselves. A climate emergency is a cop out. yes, we certainly need to improve our carbon footprint, but its not an excuse to splash ratepayer cash around maybe Council could look at its own fleet, how it is used, who is allocated what etc first. planting trees is great, but we need to be careful of costs - I can see huge ongoing costs coming from this for maintaining said trees in parks and reserves

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I do support the construction of a multi sport hub, but is this the right location to house it? Do the financials stack up? CARPARKING and traffic are going to be a huge problem - for what is proposed, is there enough parking for sport to happen here? What is going to happen to nearby residents access and so on? the intersections are going to be horrible.... Can Council get external funding? Sport Taranaki and other sporting codes are pushing this hard, but are they contributing to the funding and ongoing running/maintenance costs? How much of a cost blow-out are we going to see? with lots of this work happening into the future, whats going to change? can we involve some community work or other volunteer labour to help fund and construct this? How is access across the race track going to work? Will multiple codes (including racing/training) be able to happen at once safely and realistically? Is Taranaki Racing Club going to contribute financially to the use of the land a facilities? Where are the toilets/changing facilities etc? will there be enough for all of the sport that may be happening at once? Has Council considered any other income streams from users of these facilities and grounds? eg concerts, gypsy fairs, events, expos etc

What else?

Council needs to keep rates increases to a minimum, preferably none! work on efficiencies internally and externally bells and whistles are nice, but focus on core activities - arts are way way way down the list on being core. its all and well wanting to be a lifestyle capital, however our residents need to be able to afford to live here - constant huge rates increases are not sustainable for anyone. Council needs to listen to what our residents are saying, not just go off on pie in the sky glamour projects. with the zoo upgrade, if a space for a cafe or gift shop is included, these should pay market rates for lease to contribute to the running of the zoo. maybe more donation boxes or similar should be introduced, or consider a small fee for non-residents? this would help a small way with the ongoing running costs i support zero waste efforts. it sounds like better education needs to go into recycling efforts can council look at setting up or supporting private enterprise to set up other recycling and reuse efforts? - concrete recycling, tire processing/recycling, timber waste, food scraps and composting, dirt/clay processing/screening and supply etc an option could be to look into creating a local-private partnership or council controlled entity, and this could strive to be a default way for people to dispose of waste or to purchase recycled material or products what about recycling of plastics and soft plastics? this could become a good job boost for the region? with regards to feedback options and surveys council have been running - these seem to be too limiting so that people can only select one of a couple of options, not allowing it to be easy for people to give the right feedback. there has been a lot of comment on social media and the like, which obviously isn't part of the official feedback process - i hope this is being noted also.

NPDC's Draft 10 Year Plan

Office Use Only: 3545

Submission No: 1563

Richard H Shearer

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

How would central govt plans to become involved in 3 waters affect npdc planned budgets? If npdc covers this cost could it be recoverable from central govt in future?

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I worry that this is an additional cost especially for low income families. Perhaps there is some basic unmetered quantity, and then if above that qty is used then its metered and billed.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Get it done now, before it costs more. Same comment re can any of the cost be recovered from central govt?

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

We are lagging behind many areas of NZ with cycling network and tourism opportunities. we need to double down and get this happening asap. eg a Mt Taranaki cycle track with spurs down to villages/towns, or a white cliffs to parihaka cycle way. Could any of this be debt funded and recovered from fees? how have other areas financed these assets? eg new cromwell to clyde track about to open. finally on this, oakura to NP cycle link needed urgently.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I think benefits need to be costed out more. are your suggestions above truly the best efforts with most impact we can do for climate action? i dont think so. vehicle technology will change radically in next 5 years. what is full ROI with current ev's? i fully support planting and waste minimalisation. i think we need to think harder on this to get more bang for buck and involve more of our community and businesses rather than just npdc...

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Please get on with this asap.

What else?

What happened to greening huatoki plaza? Oakura to NP cycle/ walkway link. work with Iwi, hapu, marae to develop signage and stories of historical sites within NPDC area. Make this prominent.

NPDC's Draft 10 Year Plan

Office Use Only: 3553

Submission No: 1564

Mike McLorinan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Should be more options to assist people into greywater systems for more sustainable water systems and savings.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Nice to have, but current economic climate for most can't afford the additional cost. As a large number of people are having and to budget just to eat, I don't see it as fiscally responsible to increase costs on luxuries at this point in time.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Agree with planting, but the carbon foot print on EV still out ways to combustion engine. Do not waste our rates on this until the alternative is actually cleaner. Not just emission based.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Listen to the people, now is not the time to stamp your legacy as a council by setting up think big projects at the cost of the rate payer. Many are already struggling. Deal with the needs, the wants can come later or if alternative funding can be used PIF etc. Remember most of us don't get what we want.

NPDC's Draft 10 Year Plan

Office Use Only: 3555

Submission No: 1565

Stephanie Burgess

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Investing in our infrastructure is a must. Do it pragmatically and sensibly with the future in mind. Our province is growing and you must take this into account

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Invest our money in water catchment. We live under a mountain. If the only option is for water meters - then all must pay. Farmers, council (watering sports fields etc)

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

What we have is enough for now. With the state our 'plumbing' is in, you need to invest our money in things that are essential (plumbing and storm water) and we need to stop, for now, investing in 'nice to haves' We are an active family and our green spaces (parks, walkways, mountains) are used. They are not in a state that stop people using them. We are out and about all the time and always see people in our parks, walkways and up the mountain.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

We need to be future thinking, we need to invest in our planet.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Totally opposed to this for so many reasons. Proposed place is NOT right. Coronation Ave is contested already. From Elliot Street lights right up Coronation Ave. There are 3 large schools in and around this area (Boys High, Highlands, Welbourn) This stretch of road is a safety risk for everyone who walks, bikes and drives on this road on weekdays. This isn't even taking into account it is a corridor for all the trucks heading to the port. You simply CANNOT put another large venue here without putting more strain on the infrastructure. I have been parallel with Boys High school mid-week, midday on a regular basis due to the traffic conjection at Elliot Street lights. This is NOT the right place and NOT the right time for a sports hub. Also, with covid changing the economic climate we cannot build this sports hub now. It will put a strain on low and fixed income earners. I also note NPSC has a 'Greening" plan - how is putting a concrete jungle smack bang in the middle of "green" space aligned with your goals? Our Pukekura park reminds me of Central Park in NYC - if anything we should be extending this beautiful green space and promoting it as a provincial taonga (future thinking) not destroying it by buildings.

What else?

Do not build the sports hub! We simply cannot afford it. Put our money into infrastructure. You need to think of the greater good = and the rate hike is obscene! Covid changed everything -= we have a national housing crisis, people have lost their jobs. Put our money into infrastructure and be prudent and careful with our money.

NPDC's Draft 10 Year Plan

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

It's not like we don't get enough rain in this region, the saying goes "if you can see the Mt it's going to rain, if you can't see the Mt its raining" As we all know we have been hit hard with a pandemic which will cause a downturn in the economy of NZ. Also we have been hit by decisions from central government that hurts this region, in particular when it comes to industry and wealth creation. These forces combined are going to have a detrimental effect on the oncome of many in this region. There is no appetite or extra money in our pockets for another monthly bill in these unprecedented times. The council needs to take in to account those in lower Socioeconomic situations, many people can barely make ends meet as it is before slapping them with another bill! this will only lead to more over reach for those who can't pay. What would the consequences be if you end up in huge arrears because you owe money to the council or a company that deals in money collections? Water restricted to a trickle such as in Auckland? or house sales to pay you council bill? This is opening up a can of worms that could lead to deep resentment of the council.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

What we have now is sufficient. It's a nice to have but we are in unprecedented times. Perhaps in the future if economic stability returns.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Whatever we do in NZ can't stop the so called "emergency" so why should we pay, it's a bit like using a bucket to save the titanic...

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Again a nice to have but we are in unprecedented times. Perhaps in future..

What else?

Stick to the core functions of the council at as lower cost to the ratepayers as possible.

NPDC's Draft 10 Year Plan

Office Use Only: 3558

Submission No: 1567

Jo Furze

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Must fix the water quality as it needs to improve significantly if you want rate payers to pay for it. Currently New Plymouth water is the worst tasting water in NZ and 0.2 chlorine is the national standard and NP is 0.6 to 0.8 so its like drinking swimming pool water!. I have travelled in NZ a lot and lived in Wellington for 20 years and as a rate payer in NP now the council should be ashamed of the water quality and I have had to put a whole house water filter in. Only once this is rectified water meter options could be considered.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3559

Submission No: 1568

David Goodall

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters for general public and homeowners is ridiculous. Focus on the excessive use in agriculture

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Investing in this will generate future revenue for all businesses in Taranaki through travel and tourism

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Low priority. Especially investing in electric vehicles (unless you think that running costs will be significantly lower which would result in a pay back for the investment)

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This is a priority for the community

NPDC's Draft 10 Year Plan

Office Use Only: 3561

Submission No: 1569

Tom Moroz

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

rates from properties not connected to mains water should not be penalized to pay for those who are on mains.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

all to often water savings can be made but are offset by the need for water by industry (farming and others) - set the rates up in such a way as to not only save water but look at alternative ways to supply water for an ever expanding area, such as a de-salination plant. If the region is to keep expanding, water will only be a more drawn upon resource.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

In addition to the walkway, develop commercial and high density housing (apartments) along it. The coastal walkway is a major draw but the lack of facilities stop a lot of people from using it. Commercial areas such as a restaurant zone would bring more people to enjoy this facility.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Planting trees is a good idea. Electrifying the fleet could be taken at a lesser pace, say \$75,000 per year.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Current facilities are already adequate. Building a multi-sport hub unlikely to bring additional sports and events to the area that are not already here - or only marginal sports which would take away from the use of current facilities.

NPDC's Draft 10 Year Plan

Office Use Only: 3562

Submission No: 1570

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Get on with it! Also install flow meters at strategic locations on the network to identify network leaks. Consumer water meters will not identify network leaks.

Saving water and water meters

Comments

The options listed miss the point with our water supply system, and consumer water meters will not prevent it running dry in the future. We rely on Lake Mangamahoe which has operated as a hydro storage lake for over 80 years. The river that feeds water to the lake carries a high silt load during high flow situations which are common for most of the year. The lake acts as a large settling pond for the hydro. The lake is now substantially filled with mud. NB the hydro uses over 20 times more water than the WTP when in normal operation. During summer the water flow in the river, after a dry spell, falls to approximately 1.8 cubic metres/s (cms). Almost 1 cms is deliberately not diverted into the lake to maintain the health of the river below the diversion point. This means that only about 0.8 cms is diverted into the lake at this time and a substantial percentage of that water does not go to the WTP due to the intake pipe arrangements. We are getting close to running out of water supply during summer. Forget consumer water meters and address this issue!

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Ou parks, trails and walkways are a great asset.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Electrifying the NPDC vehicle fleet should only be done once the infrastructure is in place to power vehicles. Please be aware that there are a lot of technology improvements with hydrogen fuel cells taking place. Best not to rush into a choice between pure electric or hydrogen powered electric vehicles at this time.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3566

Submission No: 1572

Rowan Oldfield

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

No doubt the wheels are in motion with regards to giving customary rights to local iwi with regard to ownership of water, so how will this play out if we pay for the infrastructure through rates and then have to pay for the actual water? I think this will be a huge issue that needs to be openly discussed now. Unless I am completely misreading the future moves that I believe will be played.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Domestic water usage is a tiny portion of the issue . Water usage by industry and commercial interests is the major portion and should be charged appropriately. Resource consents should include charging industry based on volume , not residential usage.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Poorly designed development which causes the problem should pay for the rectification of the problem. Who is causing the problem, go to them and force them to fix it, don't expect people who have nothing to do with it to fix it for them.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Why only go North? Why can't the track go South to Oakura etc, why this South only approach. The benefits for health are huge and by providing a track North and South into and from New Plymouth would be wonderful. Get people out of their cars and onto bikes etc should be a priority; but don't just go North of the city. Omata and Oakura a deserving of consideration as well.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Planting more trees has in many cases not lead to them surviving over time. Many overseas efforts have failed due to lack of watering capability once planted. Electrifying vehicles are still vehicles on the road. During lock-down how did the council operate, did it still function without cars, are the journeys necessary at all? \$1 million for cars , really???

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

After the Yarrows Stadium debacle and waste of money towards rugby I have absolutely no faith in developing and putting our money into another venture that will no doubt be mis- managed and make a select few companies wealthier and a few sporting groups more powerful.

NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3572

Submission No: 1574

Neil Hart

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Water is a necessity for life and should be treated as the TOP priority for the council. Recent catastrophic failures in other districts should be enough evidence to direct your full attention to our water infrastructure.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

If the council shows the community it is dedicated to fixing the water infrastructure and not waste ratepayers money on the nice to have then the community will come on board with water reduction schemes. Having lived in 2 other cities where water meters were introduced, I know first hand that meters make NO difference to household culture. Education and a hand in hand approach is key to reduction. NOT the [REDACTED] approach that has been adopted by Mayor Holdem with his recent comments towards the ratepayers submissions to the 10 year plan.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

As development goes through the consenting process the appropriate actions for stormwater control need to be considered up front and not retrospectively repaired or developed.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Status quo to remain until council debt is paid down. a nice to have and not a need to have.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

As per option 1

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Ratepayers have the burden of paying for a sports facility already. Pay this debt off (Yarrows Stadium} before consultation over another venue and increased burden to the ratepayers. Another nice to have facility. Households can't live beyond their means so why should the Council. TIME to take stock of the spend.

What else?

For once in your lives, listen to the people who elected you in the first place. You as a council have become self centred and arrogant as demonstrated by the Mayor's recent comments. You talk about 12% increase followed by subsequent 6% increases Wages and salaries dont increase by anywhere near these rates and given the impact of Covid 0% adjustments will be the norm as businesses try to reconsolidate. Time to get real and spend according to the need to haves and not the nice to haves. Remember who elected you. YOU work for US!!!!

NPDC's Draft 10 Year Plan

Office Use Only: 3574

Submission No: 1575

Tecwyn King

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

This should be the priority and increasing rates exponentially is not a good idea considering the housing market and COVID 19 thinking creatively about other solutions and not blowing money on salary and nice to have options should be a start.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Not necessary more public awareness about wasted water such as sprinklers is needed

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Not a priority in the current state of the world this will not go away soon and people without jobs or stable income will not care about New Plymouth having more green spaces we already have a lot

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Raising rates by this amount is not good for first home buyers like myself. We've already worked hard to get where we are and this is fuel to move somewhere else like wanganui or Wellington to avoid such ridiculous plans and daylight robbery

NPDC's Draft 10 Year Plan

Office Use Only: 3577

Submission No: 1576

Brett Brennen

Organisation: Ducks and Drakes

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Water is fast becoming the most precious resource on earth. We certainly get enough rain here in Taranaki - we just have to harvest it as well as reducing waste and consumption. Go hard Councillors and get this right for future generations.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

User pays peeple. User pays. Reduce use - reduce cost.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Ensure Taranaki becomes a destination for this market -= more than it already is.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Get on with this project. The benefits to the region will far outweigh the costs from a social, health and economic perspective. This should start in year 2.

NPDC's Draft 10 Year Plan

Office Use Only: 3578

Submission No: 1577

Travis Gracie

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Water infrastructure is one of councils core business assets and should be at the top of any list of priorities. Council needs to look at other programs to trim costs from in order to keep rate at a reasonable level while properly looking after infrastructure assets for future generations. Council needs to have more of a mindset to reduce spending in all spending decisions.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

With a uniform charge there is no benefit to consumers to monitor or reduce consumption. When consumers are paying for the water they use then there is a financial incentive to repair leaky taps and monitor their use.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

The full costs of the project need to be put out for consultation. If \$20m is the first stage then what are the stages after that going to cost. This needs to be known before any decision is made on whether to start the process or not.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is a nice to have that should only be considered after core infrastructure assets have been paid for.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electrification of the councils vehicle fleet should be done as vehicles are up for renewal to reduce costs and not require additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The sports hub is a nice to have and should only be considered after core infrastructure assets have been paid for. Some venues are in need of investment and this should continue but a centralised hub is an expensive asset that the region cannot afford at this time.

What else?

Council needs to consider each and every spending decision in relation to its affect on rates. If each decision is made this way then a lot of small savings will add up to significant savings. "Look after the pennies and the pounds look after themselves". We too often hear of poor quality spending decisions that are brushed off as being small relative to the overall spend of the council.

NPDC's Draft 10 Year Plan

Office Use Only: 3581

Submission No: 1578

Anne Duggan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

No one wants it but it needs to be done. The council needs to stop asking the community about fixing/upgrading utilities. That's what they are elected to do. Get on with it.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Office Use Only: 3582

Submission No: 1579

Lynda Brittain

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I believe everyone is entitled to water at no cost -we maybe need to educate people on water consumption and usage rather than charging

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

fix the problem at a reasonable cost

Extending our tracks and trails network

Comments

I would suggest general maintaining of the facilities we have instead of spending more \$\$

Boosting our Climate Action Framework

Comments

All for Planting -totally support the Riparian Planting scheme -maybe "gift" bulk plants to lifestyle blocks ,schools,clubs etc to plant where they see fit

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

WHY???! We have plenty of suitable facilities in New Plymouth that are under promoted and used

What else?

My personal opinion is that the people of Taranaki are fed up with the continual Rate rises when most of us have had no pay /wages increases in the past 5 years !We are expected to agree with ideas floated by the council when we as residents are doing it tough ..How about the entire council has a reduction in there incomes and manages on what they have coming in with rates etc and budget sufficiently. One of the extravagant cost overruns could start with looking at the contracting for the maintance of our roads-the current contractor does a below standard of work and would be costing far more than should be for a substandard job eg works were done before Americana on a stretch of road outside of New Plymouth and the road has already degraded and needs repair,a constant observation over the years,whatever they are doing IS NOT working and is COSTING the Ratepayer unnessarily. (Rant over!) Have a fab day

NPDC's Draft 10 Year Plan

Office Use Only: 3586

Submission No: 1580

Simon Bishop

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Got to be done, it's been deferred by previous generations of ratepayers and should not be put on the shoulders of those yet to come.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I would like to see more in this plan about any awareness campaigns that could be undertaken to bolster this and change habits...?

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I'd also like to see more work proposed around extending / improving cycle routes and leaning on NZTA where appropriate. There's nothing out of Oakura. As a long time cycle commuter, I can testify as to how inadequate the 30 cm of shoulder going up tapuae hill is.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Way overdue.

Submission No: 1582

Geoff Leadley

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

This is a long term asset and is owned by council. The plumbing is used by the community and should only be funded by the council spreading the cost over 50 years with the cost to ratepayers being the payment of principal and interest over the expected life of the asset ie 50 years.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Meters provides a user pay so a high useage user such as a hotel or rest home complex pay for their use of the service and a low user such as a solo resident pays a much lower water charge based on actual use. Let the ratepayer pay for the meter and justify this by reducing rates by the amount of the current one amount fits all ratepayers in the rates notice.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

Let the Waitara land owner pay their share of the stormwater management.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

A good community asset requiring expansion and maintenance.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Just do it.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Let the sports clubs (users) pay for this. Why must you impose this cost/levy on ratepayers who may never use the facility. Most sports hubs worldwide run at a loss as does Eden Park in Auckland and Forsyth Barr stadium in Dunedin. Compare this to the argument you make for not building a Marina and providing a coastal playground for jetskiers, boatees and fishermen.

What else?

I wish to hear of planning to make SH3/One way system into and through New Plymouth able to cope with the increasing traffic. Even now the traffic has bottlenecks from traffic lights at The Valley and progressively in to the city. Can the councillors proposing this 10 year plan stand up and say that these plans will make New Plymouth a most live able city. Finally this council needs to earn ratepayer trust. New Plymouth Council has thrown aside a peoples referendum in favour of their own political agendas and a group of noisey activists. We can not trust this Council at New Plymouth. It has chosen not to reflect the 83% who voted for a particular policy in a recent popular referendum. It appears Council policy is to favour minorities and political activists who contribute nothing to our community except division and loathing. If the New Plymouth Councilors maintain their racist and divisive policy on ratepayer representation then put this into your 10 year plan. Ascertain the social cost and so that we can decide to leave to live in a community with fair and equal governance.

NPDC's Draft 10 Year Plan

Submission No: 1583

Ralph Bryant

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Council do not take any notice of this survey. The past speaks for it self.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Costs will only go up regardless of what is spoken here.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

You doing ok in your ivory tower Mr Mayor while others struggle to pay rates now.

NPDC's Draft 10 Year Plan

Submission No: 1584

Ken Taylor

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

As we have a self contained unit below our living quarters, and have done for 25 years, We are now in the unfair situation of paying twice for facilities that we receive only one of, eg: water, sewerage connections. This has been the case for the past 9 months. It is our intention to use the now rented, furnished unit into accommodation for family and friends once we become freehold and we retire which is going to start happening within eighteen months. When/if water metres are fitted will we receive one or the two we will be paying for?, we only have one connection. I am interested to know. I think it is very inequitable that we pay twice for everything, The Yarrow Stadium rebuild included when we have a 454 sq. metre section and only four people on the property with two toilets, two bathrooms and two kitchens in total.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

See previous comments. How many metres per connection?

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The Coastal Walkway as it is is more than sufficient.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I am fully in support of developing this as quickly as possible. As an athlete who found sports later in life, having a hub that connects these disciplines and removes some of the barriers for the clubs can only be a positive. It makes it easier for people to find their fit with a sport and connects up the communities. It also helps take some of the pressure off the clubs providing these sports, especially the smaller ones and allows them to offer higher value services in purpose built facilities. This is an investment that will save money and lives.

NPDC's Draft 10 Year Plan

Office Use Only: 3622

Submission No: 1593

Meri

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

My query would be surrounding research and quantitative comparisons measuring the average household consumption of water in contrast to businesses, co-operations and agricultural activities (farming) consumption of water. It is unfair that households that are already exacerbated by COVID-19 through job losses, a housing crisis as well as no profound wage increases in majority of sectors should fit the bill of water meters to measure water consumption since there is evidence that businesses are usually the culprits for high resource consumption, such as water. I picked option 2, as I do believe that water consumption is important, but I think that the conclusion of placing this solely on residents and households doesn't have the evidence to support that approach nor does the significant rates increase for households.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I agree with this as this is a highly populated Māori area and it is important that they are able to live in a healthy environment with regards to water management.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I think that water consumption, management as well as climate change should be the top priorities with all of the funding going towards this. The walkway as well as the multi-sport hub would be better suited eventually but because of COVID-19 and households struggling financially, I believe these two are not a priority at this given time.

NPDC's Draft 10 Year Plan

Office Use Only: 3626

Philippa Parker

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 3628

Submission No: 1595

Chris Stayt

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

The proposed repairs and improvements are both historical and for the future. As a consequence these proposed improvements should be spread over more than 1 generation of New Plymouth residents. The improvements will also affect all people that live in the district. It should not burden just the existing rate payers. Please ensure that the cost is spread over a long period of time and thus fully fund from long life assets.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Modest improvements over time would be a fair outcome. The high water table does not affect all Waitara areas. The new developments do not generally, have a water table issue.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

The New Plymouth District is at risk of living well beyond its means. The walkways are a valuable asset for the New Plymouth region, but the development needs to be extended slowly and the cost spread over a 20 year period.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I have lived and travelled around many parts of the world and have been able to observe much of what affects many Northern hemisphere countries. New Zealand does not have a climate emergency. But some northern hemisphere countries exhibit serious problems which affect climate. Re planting in the region should always be a priority. But electric cars should not. The technological features (particularly batteries) of EVs are not well enough developed. They are not affordable for the general public as yet, and thus should not be purchased by the NPDC as they are too expensive. Purchasing EVs is not acceptable to me. Hybrid cars would be a better option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I fully support the development of a centralized multi- sport hub. This should commence as soon as possible. I note one serious omission from the preliminary plans for the hub. This is the absence of an indoor tennis centre. These have proved very successful in Dunedin, Christchurch, Wellington, Hamilton and Auckland. Having such a facility in New Plymouth is long overdue. Tennis is the second largest participation sport in New Zealand and thus day & night tennis protected from all weather conditions, I believe, would be beneficial to the population of the New Plymouth region. Lets more forward with the hub with some haste.

What else?

New Plymouth & District , with a population of only approx 85,000 people needs to be careful to ensure that the region lives within its means. I have heard on many occasions that New Plymouth is considered an expensive region to reside in. We have a much too small ratepayer base, not sufficient well paid jobs and not enough people, generally, in local employment. With the onset of the downturn of the Oil and Gas industry, there is every reason to move forward with some financial caution.

NPDC's Draft 10 Year Plan

Office Use Only: 3629

Submission No: 1596

Steve Broome

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Increase condition assessment and renewals.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

What impact will the climate emergency have on the low lying areas, and what do the funding options go towards?

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Focus on the core infrastructure first that relate to public health, before the nice-to-haves like these walkways.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Focus on the core infrastructure first that relate to public health, before the nice-to-haves. What will be the economic paybacks from options 2 and 3? (Like, if we spend \$1 million on vehicles, how long will it take for the savings to pay for the additional expense?)

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Focus on the core infrastructure first that relate to public health, before the nice-to-haves. Year 6 is a balanced approach.

NPDC's Draft 10 Year Plan

Office Use Only: 3630

Submission No: 1597

Paula Frost

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters work for many places but people have access to water naturally that most donot have. Therefore it doesn't seem fair that the not everyone using water pays accordingly.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Think of the average below \$50K income people and get the backup you need for plans moving forward. Many of the financially wealthy don't actually care and are only ever minimally affected by changes proposed here.

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Maybe later but not now.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Believe there is no need for an update of the Brooklands Zoo until a later date. As there are more pressing issues to spend money on, e.g. water, plumbing and extending tracks and trails.
