# NPDC's Draft 10 Year Plan

Office Use Only: 2755

**Submission No: 1201**

**Keith Jordan**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### **Comments**

Leave funding for such projects private companies who will benefit from people using them.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### **Comments**

I don't, see a shortage of trees in our district and electrifying the fleet may not be climate friendly when the batteries need recycling.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Fix the plumbing first so we have a healthy place to live then get on to recreational projects.

---

### **What else?**

If there are people who can afford these hikes in rates let them contribute but many can't. You have tough decisions good luck.

# NPDC's Draft 10 Year Plan

Office Use Only: 2758

**Submission No: 1202**

**Andy Turner**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

#### **Comments**

Why on earth are you having to "fund" these projects. The population has been increasing year on year for a long time. Obviously the status quo was only ever going to last for so long. As a council you should have been managing this. Completely inadequate and incompetent.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Only selecting an option because I have to. Don't make council problems a rate payers problem.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Fix the water issues then look at development

---

### Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2760

**Submission No: 1203**

**Nicholas Joyce**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2769

**Submission No: 1204**

**Patricia Carrington**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

This is a huge Health issue as silly little signs are put up warning people about this issue but they are too small to read so children do swim etc where they should not be. Contamination from old dump sites by the sea are not being dealt with which are a danger to all people who use the beaches More large collection places for water --e.g. reservoirs---man made lakes. Houses should have tanks that collect rain water as is done in the country and this used for gardens and perhaps toilets

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Saving water at homes with built in tanks----Man made lakes and reservoirs

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Money from the sale of leasehold sections could be used as part of this

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

This would change the face of the Bell Block- Waitara area for residents and families and much safer for cyclists as they would be away from main roads and traffic. Investment in these areas would grow and perhaps the Waitara township would then get cleaned up and those dreadful buildings in the township either demolished or upgraded Amenities should also be part of the Coastal Walkway

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

Planting trees is fine but the electric cars is very silly as the country can't afford to supply the electricity for total cars in New Zealand. So I guess that means you would then import coal from overseas to help boost the electricity supply as mining has been stopped in NZ Maybe hybrid cars would fit the bill better Oil and Gas is still needed especially from on the land and all these things are going to negate each other and in the end cost us all a lot of money.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Forward thinking and planning is needed for the whole area and the development of multi purpose event and sport area so badly needed as the upkeep on existing building etc becomes too expensive mostly as they have not had money spent on them for many years and have just been left to fall apart

---

## What else?

Feel the Walkway should be a priority as it is a huge safety issue for people as the roads are too dangerous for walking and cycling and so many people do walk and cycle The areas are progressing with houses and there is more to come in the Waitara area so a better connection between New Plymouth and Waitara is badly needed Better roading is also badly needed as many of the entries and exits onto the Main Highway are dangerous and that probably also needs widening for the future and as more house are built then more traffic is inevitable and more of the basic amenities are required. The beach frontage needs attention with the sea breaking open the old dumps and lots of steel--bricks etc becoming exposed. This is very dangerous . Those dreadful coloured rubbish bins that appeared on the beach frontages are a complete eyesore. Could they have been better placed to fit in with the surroundings? Only hope the sea undermines them which is close to happening, and they will have to be moved

# NPDC's Draft 10 Year Plan

Office Use Only: 2771

**Submission No: 1205**

**John Wood**

Organisation: NP Community Patrol

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

NZ Community Patrol is funded from NPDC for expenses I.e. fuel and running costs. This has been halved from \$10k to 5,000 which has made it difficult to run our necessary program. We are an important part of various communities in NP. We are the eyes and ears of the police, and when on patrol we are in constant contact with them. At the moment we run our own fundraising efforts like secure plates, and BBQs. Our current level NPDC funds is inadequate for us to do our jobs well. Please consider that in the event of COVID-19, more people have lost jobs, and might resort to petty crime and make our services even more needed.

# NPDC's Draft 10 Year Plan

Office Use Only: 2773

**Submission No: 1206**

**Tim Petterson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Regardless of the long term plan one thing that needs to be done now is the storm water issue in Waitara along Queen St from Norfolk Lodge to past the high school. When it rains, even moderately, the footpath becomes totally covered in water and it is impossible to walk on it & keep your feet dry unless in gumboots. This has been like this for at least 13 years when I first returned to Waitara to live. It is a disgrace actually.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

My only thoughts about water meters, which I agree with, is that it maybe a bit unfair on big families. We have lots of gardens which we water regularly (within the water restriction guidelines!!!) and I am happy to pay for that.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

See comments I have written in the plumbing section.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

Coastal Walkway is amazing, I love it!! The Tuna walkway in Waitara is wonderful, I walk over it a lot. Extending onto Waitara would be great, although I do note it is mainly inland? Due to the airport?

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

If the NPDC cut some of its employees it might get more done more efficiently and also cut the number of electric cars needed.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Why should it take 6 years before you can start building?????? Too many steps to go through before anything actually gets done. Get rid of lots of the red tape and do it!

---

## What else?

I am bemused by the title given to one of your/our workers. "Network Access Officer" when dealing with the Xmas parade road closure- what on earth does that title mean!!! How about getting back to common sense and names that clearly describe a worker's job.

# NPDC's Draft 10 Year Plan

Office Use Only: 2777

**Submission No: 1208**

**Greg Hymers**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

An asset renewal program clearly needs to be implemented as well - this is crucial to ensure future generations are not faced with the poor maintenance and associated costs we are faced with now.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Water meters will be a complete waste of money and time - this type of project is forecast to save roughly \$4m/year. The cost will increase due to the councils inability to accurately forecast cost and stick to it. Water meters are not the answer, large amounts of water falls from the sky in New Plymouth, we just need to store more.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

There is no emergency. Complete waste of money. Decrease the fleet in the NPDC with more car pooling etc.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

We can't maintain our current sporting assets e.g. Yarrow stadium let alone add more sporting infrastructure. Inglewood and Stratford have beaten New Plymouth to the sporting hub venues and we should be using these instead.

---

### **What else?**

Will the council listen to the ratepayers over these issues? Previous experience has shown that the council will do what it wants, not what the population wants. e.g. the recent Maori ward situation where the overwhelming consensus told the council to do the opposite of what it did.

# NPDC's Draft 10 Year Plan

Office Use Only: 2781

**Submission No: 1209**

**Noeline R McCready**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Our plumbing is disgusting and needs immediate attention, our waterways are showing signs of sewerage and our children should not be swimming amongst this. We urgently need to put everything we have into this project NOW

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Water isnt the problem, storage is.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

About time we got something for our rates instead of it all going to Oakura and New Plymouth

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

It's a natural transgression of the walkway

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

would prefer not to electrify our fleet at this time, they are still developing this and the batteries just about cost more than the car or in some cases do cost more

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

There are far more important things that have to be done first

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2783

**Submission No: 1210**

**Kevin Fenwick**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

### Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

New Plymouth needs to cater for our our community and ensure it provides facilities equal to, if not better than, other cities around the country. These facilities will bring the community together providing a central hub to visit and participate in various activities. Our current facilities are insufficient to meet the current demand and a new bigger sports hub will ensure we go some way to meeting those needs.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2784

**Submission No: 1211**

**Wendall**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

unacceptable that this has happened, the anti-rates councillors should be held to account and made to pay for it.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

Look after our awa and then the awa will look after us

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

It costs \$100m to fully fix, but you are only putting up one-fifth of this?!? Should increase this budget to sort this out today. And have you factored in climate change?

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

This sounds awesome and is only a small amount more for heaps more tracks. create a long term vision of a coastal walkway from Urenui to Patea, and all main rivers having walkways to the mountain (Waitara, Waiwhakaiho, The Henui, Stoney, Patea etc)

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### ***Comments***

Yes. EVs are critical to getting emissions lower. Ignore the "studies" that they have higher environment costs, these are usually overseas and don't factor in how much of our power is renewable in NZ, or take into account the environmental impact of oil extraction and spills (but go on about mining for the batteries). But do you really need the EXTRA money when considering the cost savings of using electricity not petrol? Seems like lazy accounting, and should be cost neutral or cost savings over time. Also, tree planting is great particularly to get rid of the urban heat effect, so plant more and plant them everywhere.

---

## Developing a multi-sport hub

### ***Comments***

Happy with this, but I don't want to pay when we have so much other stuff. This nice to have is the straw that will break the ratepayers' backs. Do the basics, help move to low carbon world (both the climate change and tracks ones) but only do this if you get the funding from sports groups and fundraising not rates

---

## What else?

Housing?!? No action proposed?!? Shows how out of touch you are with the reality for the community. And where is the action to stop sewage leaks into the awa? We need a dog park so that dog owners have somewhere to go without having their mutts come up and annoy or scare the rest of us. And then ban them on the walkways and beaches.

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

This is LONG overdue. When travelling away to sports in other regions we are miles behind in sporting infrastructure. Our facilities are small and have had minimal investment over the last 20 plus years

---

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### Comments

Option 4, Include Inglewood in the regional push to be the 'Lifestyle Capital'. A pathetic \$120k has been pledged to fix the Windsor Walkway - an absolutely disgraceful piece of work that should not even be called a walkway. All walking and cycling infrastructure spending is happening on the coast, or in Oakura. Inglewood needs a decent piece of active recreation spending. A path which connects Trimble Hill to PG Nops, under the state highway to Joe Gibbs reserve, around the southern edge of town (which is zoned for development, so this path could end up running through this new housing zone), connecting in with the Waiongana-iti stream running north through the old Moa Dairy site (some of the most beautiful river boundary in Inglewood which was once public land - the owner is interested in opportunities) and then back around the northern boundary of town to connect back with Jubilee park. This could further split off and dovetail into the Windsor walkway - which needs a lot more than \$120k spent on it... This would seriously boost the active recreation opportunities in our town. We have many young families and are growing rapidly, and very little to do. Most people have to drive to New Plymouth or elsewhere for quality active recreation opportunities, so this is also a climate change issue.

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### **Comments**

Planting should be geographically dispersed and in area that have little existing tree cover. In Inglewood we have just 2.5% bush cover (vs New Plymouth at 9%), much of which is exotic. Our existing parks are very poorly if at all managed - full of pest plants etc. IT would be good if the basics are undertaken first - ie pest management such that the existing bush parcels we do have can heal and thrive. It is much harder to create a complex bush ecosystem from scratch than it is to restore an old-growth forest - and the latter is a much better carbon sink when functioning optimally.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### **Comments**

Until we see better geographic distribution of active recreation opportunities across the district - accessible to all, I will not support a Multi-sport hub. Council at present is denying the community of Inglewood safe everyday active recreation opportunities that are intertwined into the fabric of our place. We also have a multi-sport hub here in Inglewood which receives no council funding whatsoever - yet our kids (and adults) too need improved facilities - our charitable trust income is simply not enough to allow us to make bigger investments to improve our facility. We are at capacity and cater for 10 different sporting codes already.

---

## What else?

Inglewood Spending; \$950k in year 7 (2028) for Inglewood railway land purchase (basically a lie as no deal has been reached with Te Atiawa as of this point in time) \$120k in Year 2 Windsor walkway upgrades (a truly dangerous and shameful piece of council infrastructure) \$108K in year 4 Inglewood CBD upgrades (this will go far?) \$140k in year 6 Elliot St Precinct (I sit on the TET stadium board and Mel Cook chair of Inglewood CB does not know what this money is for) \$77k year 6 Pool shading Grand total for all recreational/lifestyle expenditure in our town next 10 years ~ \$1.3m - mostly occurring after first 3 years so outside of the tenure of this council (ie not likely). Realistically, there is about \$300k of genuine spending here. About another \$9m for various maintenance and renewal works - ie \$6m for the oxidation pond. The necessary Stuff, no complaints there. How about the rest of the region? Our friends in Oakura would be a nice comparison, given they are a small town on the outskirts of New Plymouth with HALF our population.. \$825k SH45 Dixon st to Corbett Park walkway - Year 2 \$125k Oakura to NP Coastal Walkway planning - Year 2 \$5.2m Kaitake trail - Year 1 \$1.25m Kaitake trail roading improvements - Year 3 \$800k SH45 pedestrian underpass and safety improvements - Year 2 \$unknown Weld Road toilet upgrades and walking trail Total \$8m + (all occurring in first 3 years, and plenty of State highway focused money too - we are constantly told the State Highway is not council controlled.) And what about other areas? \$11m being spent on the Council Civic Centre over next 10 years (more than the total capital budget for all of Inglewood over the 10 years) \$1.4m for a pedestrian overbridge over Waiwhakaiho river Fitzroy (because there isnt already a bridge there) \$1.1m Cycleway from top of Mangorei Rd to Mangamahoe along SH3 (the road the council tell us they have no control over) \$1.2m SH3 Rogan St Signals (SH3 again...) \$25m for safety improvements from Egmont Village to New Plymouth (SH3 again!) \$460k placemaking in Strandon Village (what is the difference between a 'CBD upgrade' and 'placemaking' - one has a very clear positive and engaged outcome for the community) Between NPDC, NZTA and TRC there is \$750mil allocated for roading maintenance and improvements (including pedestrian/cycleway work, Lets Go etc). No mention across either TRC or NPDC long term plans of Inglewood safety improvements (TRC has the NP to Hawera safety project which has an asterix next to it stating that NZTA will not pledge any budget, timeframes or resource to it and wont answer questions relating to its status) Inglewood is at the intersection of two state highways, is the largest 'unbypassed' town in

the district, is impossible to cross for children and adults alike, has myriad safety issues identified by your own council-funded research during the Kelly St [REDACTED] (and the district safety review), yet gets nothin in this LTP - shameful. We lost a young girl nearly 4 years ago due to council negligence of safety concern - she appears to have died in-vain. This LTP is really taking the piss. We in Inglewood are paying for a lot of everyone elses nice-to-haves. Very little of our pledged spending is either guaranteed, or timely, nor is it very much, nor is it focused on the issues the community continuously and have very clearly given council feedback on!

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Use the money from the sale of leasehold land in Waitara as per the documentation sent out to leaseholders, stating that the money would be used to fix/ invest in Waitara

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

We are not here to provide you with electric vehicles so you can feel good about driving to work! Get a grip NPDC. On the planting issue, is there not govt funding available to continue with this initiative?

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Worry about fixing current infrastructure and areas before wanting to build a multi-million stadium that will probably run over budget and cost more money that residents don't have

---

### **What else?**

Make rates affordable, we need more housing and ways for people to be able to get into it. That's an ongoing realistic concern when there's a housing crisis

# NPDC's Draft 10 Year Plan

Office Use Only: 2825

**Submission No: 1227**

**Josh Mills**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

It needs to be done.. new plymouth can benefit financially from this via hosting international games of multiple different sport codes.. therefore helping assist in the running costs of this and for our economic advantages

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2826

**Submission No: 1228**

**Deborah Tawa**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### *Comments*

The building of a multi-sport hub has been pushed out of the 10 year plan for nearly 30 years. There can be no better time to start this project than in the early part of the current plan

---

## What else?

I wish you luck with signing this plan off. I hope than all Councillors make informed decisions rather than bringing their personal views to the table.

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

With everything that has happened over the last year with Covid, lots of people don't have the income to have large rates increases, the impact of this will continue for quite some years. New Plymouth has enough to offer with walks, bike trails and things to do ect as it is, I would suggest that you cause minimum increases to rates, as many people simply can't afford large increases that you are proposing.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### ***Comments***

This is a must not a want by the council, we need to have the plumbing sorted specially with more and more housing putting a strain on it.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### ***Comments***

We currently pay for our water in our rates so we shouldn't need meters if this is managed properly by council and the money collected by rates is used for what it's intended.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### ***Comments***

No body likes surface flooding so this is a issue council need to look at.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### ***Comments***

This is not a must and a waste of rates the walkway already goes far enough and to extend it is just going to cost rate payers more and more to maintain, seems more of a want by council then a must there are lots of things I want too but have to stick to what I really need.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

We already have plenty trees in Taranaki and we don't need anymore pine trees, maybe encourage farmers to plant natives on land that can't be used. Again everyone would like to have a electric vehicle but most people can't afford one, again this seems like a want by the council not a need, maybe this could be looked at when prices of electric cars come down or when used cars become available, does the council really need brand new electric cars no, it's a want at the expense of the rate payer.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Last year we were told that the Yarrows Stadium was a multi sports hub and not just for rugby costing rate payers \$50 million now the council wants to add another major debt to the rate payer for something that we are already meant to be funding \$50 million for which is already meant to be a multi sports stadium. Again this is a want by the council which we don't have the money for, with Covid it's brought hard times on people but yet the council seem to have a deep purse when it comes to spending the people's rates. I was always told that if I can't afford something then either save up for it or wait until you can afford it specially if you don't really need it right away, another want by council.

---

## What else?

Council seem to have a lot of wants not things that are really needed.

# NPDC's Draft 10 Year Plan

#### **Comments**

Good to see Inglewood's infrastructure getting fixed and upgraded

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

It astounds me that we have so much rain in Taranaki but that we run out! Be good to collect and store more, but definitely educate people on water wastage.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Be nice to have some more tracks and trails in and around Inglewood as the Windsor Walkway is a dangerous main road. This is some of the reasons that people come to Taranaki so would be good to be leaders in this space and encourage visitors to them

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

#### **Comments**

Need to be leaders in this space

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Please make sure that it is a nice place in terms of plantings ie community gardens and used by other groups

---

### **What else?**

Inglewood seems to have lucked out in terms of spending. It needs pavement and pathway upgrades, they are cracking and crumbling, trees need trimming back, more trails and tracks, cover over the swimming pool so that it can be used all year round and install more pedestrian crossings! Be nice to have more picnic places or family friendly playgrounds. I love Inglewood and want to see it develop and prosper.

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### *Comments*

Water meters are not fixing the issue, all it does is make it more expensive for homes with more than 2 people!! We have a high enough rain fall so why not encourage saving of water in other ways....Get a local company to make narrow, box shaped rain water storage tanks that can be put against the side of a home to collect rainwater (in a range of colours to blend in with brickwork etc,) and perhaps have this subsidized by the council.....was a similar incentive years ago in Victoria. Have incentives for people to put in Hot water recirculation systems..... Find some land for another dam, as our population is only going to increase.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### *Comments*

Encourage developers of land to keep some of the existing older trees/plants rather than have this 'clean slate' mentality when doing subdivisions. It is taking the GREEN out of our city and reducing bird corridors. With sections getting smaller there is no room for people to plant trees.....It is such a shame that it is OK to bulldoze everything....you talk about initiatives to plant more trees, how about save some of the existing ones and be more considered when planning new developments!

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.

### ***Comments***

I feel to develop the sports hub at The NP racecourse is a terrible option!! Leave it open and green and put the hub further out of NP where more parking can be catered for and also there is space for further development in future years. The traffic on Coronation Ave can be appalling at times as it is so it does not need a sports hub to further congest things. It would be wonderful to have a sports hub but please please don't tack it on next to our beautiful park!

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

This is a very important Development for all the community and as we know its not Juts Sport! Over this Summer New Plymouth has experienced a number of concerts and large events, this has helped the business sector/ Hospitality sector get through some challenging times. By having this Community Hub starting in 4 years (or sooner) its like adding these type of spending events like concert's over Winter and Summer. EG a Basketball/Football/Netball Tournament over Winter will be a big boast to the Business sector in down times over these slower trading periods. Bring Millions of spending to our community without any risk to the council. The Sports codes with the support of Sport Taranaki will champion these events, and will boast all business as well as providing a much need boast for the CBD. The Sport codes needs it to start in year 4 and Our CBD and Hospitality/Business sector needs it now!

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### **Comments**

The extended coastal walkway is great but shouldn't be the only focus - boosting the network over ten years will be a tremendous asset for tourism. The cycle trails elsewhere in NZ have been a great investment and create jobs. Taranaki just had its best tourist season ever without international tourists. This was a huge relief for local businesses. We should take a long-term view to have the infrastructure in place that will keep tourists coming.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### **Comments**

Am very pro environmental policies from the Council but the efficacy of planting trees to mitigate climate change is mixed - hopefully the Council is also considering other options

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Seems the wrong time to make major decisions about this locally given a centralised system for three waters infrastructure is on the horizon. Also knowing the wait times to progress private infrastructure projects currently, do we have the capacity and capability locally to progress the amount of works proposed at the rate proposed? The infrastructure that is having negative environmental effects (i.e. on fresh water ways) should be prioritised).

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

This is an ambulance at the bottom of the cliff solution. Yes people may take more notice of what they are using if they are paying for it, but what is the flow-on effect of this charge on vulnerable populations? A more sustainable solution would be what Auckland has been doing for years, making sure that any new builds or renovations include a stormwater re-use tank (for garden watering, car washing etc) as part of their building consent. Then those that can afford to are fitting the bill and assisting with the saving of water that is currently wasted. Should prioritise metering the commercial use of water - Yarrow Stadium, the New Plymouth Racecourse etc are regular users of sprinklers during summer.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Waitara's stormwater upgrades are an important upgrade for this community. Consider how urban design (active transport, attractive connected communities, community surveillance) can be improved through the management of stormwater. In Europe overland flow paths are used as skate/bike paths in dry weather.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### **Comments**

Extending the Walkway to Waitara is a priority, however alternative route options need to be explored to minimise the cost while maximising the benefits (safety, visitor attraction). This cost seems out of step with other projects proposed. Also need to continue to support other tracks and trails development that connect our wider region.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### **Comments**

17ha is not a huge amount and this project is not really significant in terms of LTP decision-making or environmental benefit. A better first step would be to better look after the planting that is already in place - Hickford and Jubilee Parks for example both have diseased trees, pests, and noxious plants. Consideration should be given as to how NPDC could work alongside the local communities to improve and maintain areas like these ongoing. A more transparent relationship with DoC and TRC about duties or care could probably ensure the combined efforts are more effective. Developers should be encouraged to establish more native planting that is easy to maintain and provides for more green belts around the city and better protection of waterways.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

In a future where civil infrastructure will probably be centralised local governments will need to focus more on the wellbeing of their communities, particularly via the provision of quality social infrastructure. The proposed Multi-Sport Hub is a facility that responds to a major deficit in provision in terms of sport facilities; however the proposal is more than that it is a space where people of differing ages, stages, and backgrounds can come together to connect, to feel safe, to be active, to feel at home. While the Hub will offer a centralised location for the delivery of traditional sport (thus the ability for sport delivery to be more efficient, effective, and financially sustainable) much thought has gone into a design that encourages social activity, active transport and connections with other amenities, maximising economic impact, and opportunities for play, informal activity, and other wellbeing activities. The Hub has always been planned for Year 4, this is not 'faster' this is the time needed to continue the robust planning and fundraising programme undertaken to date. There is no significant benefit to delaying this project; the need is clear, the support is apparent (with 16 stakeholders committed to this project), New Plymouth needs to stand up and show it is willing to do what it takes to truly be a Lifestyle Capital. Other than confirming the Long-Term Plan for Year 4, NPDC needs to quickly make some hard decisions about how important subsidised central city horse racing is to our community!

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### ***Comments***

This should be priority number one. Never should have been left to get as bad as it has in the first place.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### ***Comments***

Happy to pay for what we use at home. Would like to hear more about how this will all work in a business. Particularly in a lease holding situation where infrastructure is shared across multiple tenants.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### ***Comments***

Extension of the walkway is a great idea however should be secondary to necessary water/sewage maintenance proposals.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

Shelve this idea (which is a fantastic one) for the time being.

#### **Comments**

The council knows and understands the importance of it's core function. As with any household or business, there are needs and there are wants. The integrity of our water supply is most important and obviously our council would be in agreement. If the "greening our place" project and the "paying it forward" project were shelved until our bank balance was in a healthier state, I would be happy to approve of this project being fast forwarded. Regarding rates; our councillors hopefully have sufficient business skills to run our city without increasing rates for "wants" and budget for "needs" We do not want New Plymouth to become a city which is affordable only for the upper income bracket.

---

## Saving water and water meters

#### **Comments**

I would like for us to appeal to the public to save water voluntarily for a year. See what a difference it v can make. If there are not sufficient savings, then I believe you would have the public on your side if you deem it necessary to put in meters. You need the goodwill of the public. You want to be seen as a progressive council, but also one who wants our beautiful city to be a happy place to live.

---

## Improving stormwater management in Waitara

#### **Comments**

If we shelve the wants and budget for the needs of the community, I believe we should progress with this project. I cannot, in good conscience, approve it if the 'Greening our Place' and "paying it forward" and 6% or 12% rates hike go ahead. Rents would increase and people would be driven out of New Plymouth with such a big increase. Please go back to basics.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

No more please. Let's keep the rates down and go back to fixing water and refuse problems. The tracks and trails are wants not needs.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Again, wants not needs. Encourage the community to live more sustainably. The big buses that you run are a waste of fuel. Why did you not buy smaller ones and have them full rather than enormous buses for our little city. They are always almost empty when I see them.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Again, a want not a need. People need homes they can afford to live in, and a basic infrastructure before we even think about this project. Please consider running the council within the income that you already have?

---

## What else?

Mayor Holdom and the councillors are running the risk of being seen as politicians rather than a group of people who have generously stepped up to serve the community. Please relax, we know you are doing your best. We don't need all the fancy stuff... We just want a good place to live. Nature is on our doorstep. We are able to enjoy its beauty for no cost apart from a little petrol. We are an outdoorsy community. We love our place. Let's be an example to the rest of the country on how to live simply and simply live in our own little piece of Paradise. :)

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Concur with Council plan.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

I don't believe the primary outcome will be water savings and also don't see how installing them will reduce new water supply assets (this is a cost increase). I believe the primary outcome will be ever increasing charges for water due to "unforeseen" or "a one in one hundred year event" reasons.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Waitara is growing and will continue to do so (as a result of the over price housing market in New Plymouth. Nation wide issue with all provinces). Therefore definitely need to invest in infrastructure to stay ahead of the forecast growth and minimise or eliminate the additional stress this will place on the stormwater system.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

One of the best ever investments for our region was the Coastal walkway. Definitely need to extend it to Waitara with the same passion as give to the original(I remember funding being brought forward to fast-track the walkway with full support from rate payers.) Multi-purpose benefits; 1. Alternative transport route for the fit. Less road traffic and trasport related pollution. 2. Recreational value. More people using the walkway, more healthy people. 3. Possible open to recreational events (running/bike racing events). Out of region visitors/increase spending in region.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

Goes without saying, it's got to be done.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

New Plymouth absolutely requires a fit-for-purpose central sports hub. This is long over due. The current status of facilities for some sporting bodies are beyond substandard for today's requirements. Also this will enable these sporting bodies to host major national sporting events (and possible international events if given enough vision by the NPDC) in New Plymouth therefore contributing to the regional economy.

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### **Comments**

Invest in push bikes and promote use of public transport for your staff. If you are going to invest in planting - work with your rural areas as well - supporting farmers and lifestyle blocks who are already investing there own money and time in planting, support those who are restoring wetlands.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### **Comments**

The 'multi-sports' hub is only focused on a niche number of sports in the area and doesn't include the minority sports. I don't think it will be well thought out, or developed with a practical long term strategic plan.

---

## What else?

Given the current situation with the ongoing impact of COVID and the current governments focus on reducing even more jobs within the region - I don't think that increasing rates is necessary - it would be great if you could consider the current impact on rate payers and 'live within your means' - reduce the amount of funding provided to community groups, reduce the 'development' of expensive temporary outdoor decking along Devon Street East and focus of the basics of what rates should be paying for. Start providing support/development to the other areas outside of New Plymouth who pay rates to NPDC.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

Do not increase swimming pool prices, this is already costly for families with larger families. Maybe have a different cost for non residents if you are wanting to make money there. Swimming at the local pools is a great active activity for people and an awesome way for people to learn to swim and learn about water safety, especially those who cannot afford lessons.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### **Comments**

It would have been nice to know the breakdown between the walkway and the mountain to sea instead of lumping them in together. I live in Wills Road and walk this end if the walkway pretty much every day and fervently believe that NO extension is needed. The amount of people this walk this end of the walkway is small it really is. With the financial state we are all in personally and as a nation I think spending 36-60m on this is a gross misuse of money. There is kms and kms of walkways everywhere already!

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### **Comments**

Happy with the planting only. Not convinced electrifying our fleet is the answer especially with battery life.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

\$40M is a heck of a lot of money but I can see some benefits. Rather have that than the walkway extensions. Make sure the person of people who stuffed up the stadium NEVER get to have any input because another mess like that is would be the straw that breaks an already cost overloaded camels back. Whoever designs the thing needs to be capable of doing the job correctly.

---

### **What else?**

Really feel for the next few years money should be spend on necessities only. Seriously we live in a great place and there are plenty of walks and mountain tracks to keep even the most discerning happy. There's probably barely a person in our district that walked/run/cycled every single one of them.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

While our plumbing may be in a state of disarray, the council has for years been spending money or "wasting" as I could call it on non essential things. You have spent thousands of dollars of ratepayers money of worthless items in town, removed car parks in the process and generally do not have a lot to show for it. Once you get serious about spending our money wisely then we as ratepayers will be more interested in when you want to actually invest money properly.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Yes stop sending our water through the tiny power station. Who agreed to renew this to waste precious water from our water supply? This is not the best use of our water. Once council stops wasting water themselves through these methods, then ratepayers might be more agreeable to more investment. All you are going to do with water meters is cost people more to live.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

How about first investigating if you have the rights to develop this hub? My understanding is the land is not available for the council to even develop the hub. Shame you didnt put the money from the Yarrows stadium into this instead....

---

### **What else?**

I feel council dont spend rate payer money how it should be and many others feel the same. and whether you take that on board is another thing, however, people are getting frustrated, reduced in funding and ability to live a standard life. Putting rates up in high figures may be warranted, however make sure the investments for this are sound and actually offer ratepayers value. This will have a massive impact on the low to medium income earners, and perhaps thats your goal, push us all into the low area?

In 6 years our children won't get maximum use of it or any use. Sooner the better

---

### **What else?**

Our local playgrounds compared to that of Hamilton Lake & Christchurch's Margaret Mahy Playground are rather lacking.. these two examples would be awesome here in New Plymouth. Lastly, we may need to consider the roads in Bell Block - we will need to cater for the population growth, travelling out of Bell Block in the mornings often are at snail pace as there are only two exists to turn right towards town. (One of which is a very dangerous intersection - Wills Rd). The other the overbrige is poorly designed - for people coming from Waitara direction wanting to turn into Bell Block over the over bridge is impossible.

---

## Fixing our plumbing

**How much should we invest in our plumbing over the next 10 years?**

**How do we pay for fixing our plumbing?**

Option C: Fully debt fund long life assets.

### *Comments*

In our no exit street in Bell Block when it rains water pools and seeps up through pavement, driveways, under hones and grass areas. When concerns raised to NPDC were told too expensive to fix, as when property developed no waste water infrastructure. Totally unacceptable in my view.

---

## Saving water and water meters

### *Comments*

This is not a plan. Council is only offering water meter options and I disagree with plan. There needs to more consultation with the public and options discussed., as well research and input from tangata whenua.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

If there wasn't serious issues with infrastructure then I would be supportive, however the money saved by investing in the infrastructure would ensure any rate increase minimal.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I strongly object to the multisports hub at this stage due to infrastructure issues and costs which are a essential need. I appreciate the idea however why can't this be funded privately by corporations and other regional identities such as TSB, with leased land to benefit rate payers. Currently with the issues facing rugby staduim and the following complications which were costly, it is apparent serious consideration needs to be undertaken before investing in this. I feel there needs to be more consultation on this and not to be emotive in discussions.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Go ahead and fix the "plumbing" but drop the ridiculous idea of water meters and improve water storage instead. There is no shortage of water, just the ability to store it over dryer periods. If you're going to charge for water, target heavy users and not households per sale.

---

## Saving water and water meters

#### **Comments**

See previous comment on water. Ensure a leak-free reticulation network; charge heavy users such as industry, farms, private pool owners, etc and not householders; improve storage capacity. Water meters for households is just revenue collecting. Then charging 12% more for rates is an insult to your citizens.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Just be sure the council knows what its doing. "Local government, too needy, too grassroots, not enough expertise." (Taken from a recent Stuff article)

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

We need to start investing in this infrastructure

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### *Comments*

Now while I do agree that we need to find ways to extend the life of our existing consented supply, I disagree that universal metering should be the main driver for this 1. The cost does not meet the opportunity cost threshold. If we invest \$14m now we could save \$40m in 30yrs? My argument is that if we left the \$14m in the PIF we would have more than \$40m in 30years 2. While I disagree with the universal approach, metering is generally good. I assume that every new build includes a meter? This should be extended to every building consent so to pick up some of the older stock. Hence meters increase at not cost to Council. All installed meters should be read and recorded to confirm the assumed overall demand. Who knows the leaks might be greater than thought? Has happened before 3. What are we doing to encourage residents to collect water? 60% of domestic demand does not actually need potable water. Every new build should include 25m3 storm water storage complete with dual plumbing systems. This would not only increase capacity but also help reduce the surge on the storm water systems. Oh, and at no cost to the Council. What else can we do to encourage the older stock to do the same? 4. The biggest waste of water is in sink waste disposal systems. What are we doing to stop these now that we have collected composting systems? This also reduces the load on the sewerage management systems 5. It disadvantages the poor and vulnerable. This group generally live in rented older stock homes which do not include modern water saving devices and have no ability to effect change here. They will simply just have to pay the bill. They also are more likely to purchase less efficient appliances as they are cheaper adding to the problem. This group of people will pay more that the average cost of water and have little ability to change this 6. The whole nation has a problem with the cost of water infrastructure and is seems probable that Council water assets will be centralised. If this should happen they will only pay the depreciated cost of the meters and why would we give up an appreciating asset and hand this over to the government. Let them put the meters in So in summary while I agree that we should do much in getting more out what we have and becoming more water efficient, in this plan we are overlooking many opportunities to do this at the cost of those who can afford it. Universal water metering does not stand up financially, does little to build real capacity, (only behaviour, which may be achieved in other ways) and adds unequal cost to the poor in our city

---

## **Improving stormwater management in Waitara**

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

### ***Comments***

They have waited long enough

---

## **Extending our tracks and trails network**

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### ***Comments***

Put it back 3 years. We are heading into uncertain times

---

## **Boosting our Climate Action Framework**

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

While I am ok with the cost I think the framework is too specific. Every decision made should be seen through the lens of the climate. It would be better to widen the scope of the fund to allow for other renewals that for a few extra dollars has a large impact on the climate. Replacing the fleet should only as they come up for replacement and that the cost/benefit threshold is met. Following the crowd is not always the best thing to do

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Will be an asset to the city but will need some long term partners

**Submission No: 1294**

**Leslie Bloemen**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### **Comments**

Develop a multi-sport hub out of the CBD. This survey fails to include an option whereby a multi-sport hub is built in another location. That is my preference. We do not want to lose this iconic, green, open 'lifestyle' space in the middle of NP city. Sports hubs can be built anywhere. Once green space in a city is gone, it is gone forever.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### *Comments*

Supply our own water and pay for it all ourselves... not overly interested in paying more rates for those in town who have no clue about water conservation!

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

### *Comments*

Fund from Waitara Harbour Leases revenue or sales

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

I would prefer that the existing city/suburban footpaths be fully maintained and funding reinstated for maintenance and renewal. The condition of footpaths over the last 15 years has fallen considerably. Some older suburbs (say Vogeltown) the curb, channel and footpaths are in a very poor state. Many calls and requests to the Council about this have fallen on deaf ears. This is not to blame the hard-working staff, but I suspect that the Elected Members need to include a substantial budget back to fixing up suburban footpaths instead of spending more money creating walkway extensions to outreach areas. \$36 mil would go a long way towards a renewal programme. We should take pride in our City and District infrastructure and maintain what we have first before embarking on new construction. Visitors to cities judge them by the quality of roads, footpaths and parks etc.

## **Boosting our Climate Action Framework**

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

The money spent on installing water meters could be used for making improvements after all the community is to pay anyway

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

### *Comments*

This is stormwater! Don't build in flood prone areas

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

Walkways should have better signage concerning safety

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

Cheaper option would be to get community volunteers to do it and to encourage plantings on private land of natives in their correct locations as per waikato

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

About time. Stop funding the len lye centre and use it for a youth centre/sports facility. Len lye centre has been a drain on funds and benefit just a few people cut it loose

---

### **What else?**

The rates here are over the top for a small town, I would not want the place to stagnate but you are going to rate older people out of their homes the rate relief is useless and a second tier of rates should apply to over 65s

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

The general household has no control over the maintenance of the water network and therefore those responsible should cover a majority of the debt to repair. However a contribution from ratepayers is acceptable as it is a service we all use and is important to have issues remedied for both our own and future generations.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

It is unreasonable to have additional charges for the use of water. Instead it would be better to educate people of water use and how to become more proficient with "grey water" Encourage installation of home water tanks to capture rain. Families are struggling enough with the cost of power, rates, rent, food, petrol etc without an additional charge for using water. Strongly oppose the thought of water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

It is obvious that this needs to be rectified - however again the problem seems to have multiplied over many years. This is not a sudden issue rather it has just been overlooked. One hopes that home owners are not being asked for money via rates increases.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Fix the existing issues that have been in previous questions before spending money on recreation. Taranaki is full of existing wonderful parks, walkways without the need to add more at tis time. All it will do is increase the cost for maintenance of the newly introduced extensions. This is a money making exercise to encourage tourists. Look after those that live in the province and keep rates down by using any money tagged for these projects to fix the water issues. That is an everyday issue!

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

Fully support the above.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

We need activities for mid aged youth (other than the skatepark). which offers a safe, family friendly environment. Support this project but hope it will not just be aimed at "teams" but also include other recreational activities available for a small fee. (keep fees low and they will be used multiple times and it is more obtainable to the average income family).

---

## What else?

The council should not assume anything. Yes, this questionnaire is available but for many they are not aware of it (I wasn't until I read the article in the daily news). And most feel that the council will do what it wants regardless to the voice of the people, there is an air of arrogance and a feeling they do not have any idea of the "real world". Times are hard, money is tight, a lot of families are struggling financially. Take a look at what can be done to help the average homeowner rather than continually increasing rates especially for one of life's essential items - water! Thank you for this opportunity to share thoughts.
