Infrastructure category

Water supply (consumption) (NPDC reticulation)

(1) Volume of water (Litres per day per property) averaged over 7-day week—**excluding** facilities listed in water and waste water table below.

Waste water (removal) (NPDC reticulation)

(2) Volume of waste water (Litres per day per property) averaged over 7-day week—**excluding** facilities listed in water and waste water table below.

Stormwater (impervious area)

(3) Total impervious area of proposed development (includes roofs, carports, paving with runoff coef. > 0.45), ramps, loading bays, swimming pools, etc.)

Traffic movements

(4) Calculated by estimating the number of customer and staff vehicles per day and the number of trucks (single and with trailer) per day, averaged over a 7-day week, and then multiplying each by its relevant factor.

Vehicle source/type	Total no. per day	Multiplying factor	Total daily movements
Customers		2	
Staff		4	
Truck		6	
Truck + trailer		10	
Total traffic movements/day			

} Averaged over a 7-day week

Water and waste water (kitchen, washing and toilet facilities only)

Facility	No.	Facility	No.
Bath		Sink - kitchen	
Basin		Sink - cleaner's	
Bidet		Shower	
Dishwasher		Toilet pan (WC)	
Drinking fountain		Urinal (each or at 1 per 600mm)	
Laundry tub
